<sup>1</sup> Data is missing for Italy.

<sup>2</sup> Data is missing for Italy and Luxembourg.

<sup>3</sup> The asylum-seekers are granted with a form of international protection.

<sup>4</sup> Including recognition under the 1951 Refugee Convention, the 1967 Protocol, or the 1969 OAU Convention.

<sup>5</sup> An asylum-seeker may be granted a complementary form of protection. This refers to formal permission, under national law, to persons who are in need of international protection, to reside in a country, even though they might not qualify for refugee status under conventional refugee criteria.

<sup>6</sup> The asylum-seeker is found not to be in need of international protection.

<sup>7</sup> Those decisions which are defined neither as “rejections” nor as “positive” (withdrawals of applications, write-offs, abandonment of cases, any discontinuation of a claim not included in positive decisions or rejected applications).

## Annex 3

### Existing EU asylum measures

The main achievement during the first phase of the CEAS (1999-2005) was the adoption of several **EU instruments**, establishing for the most part common minimum standards. As these instruments were often Directives, they had to be transposed into national law.

- **Council Directive 2003/9/EC** laying down **minimum standards for the reception of asylum seekers**: the Directive guarantees minimum standards for the reception of asylum seekers (certain material reception conditions, family unity, medical and psychological care, access to education for minor children), in order to ensure a dignified standard of living, comparable in all EU Member States.
- **Council Directive 2004/83/EC on minimum standards for the qualification and status of third country nationals** or stateless persons as refugees or as persons who otherwise need international protection and the content of the protection granted: it establishes common criteria for the identification of persons who need international protection and ensures a minimum level of rights and benefits in all Member States for those granted protection.
- **Council Directive 2005/85/EC on minimum standards on procedures** in Member States for granting and withdrawing refugee status: the Directive is intended to ensure fair and efficient procedures for granting and withdrawing the refugee status, to reduce the disparities between national examining procedures and to safeguard the quality of decision-making in the Member States.
- **Council Regulation (EC) No 343/2003** establishing the criteria and mechanisms for determining the Member State responsible for examining an asylum application lodged in one of the Member States by a third-country national: the regulation (also called Dublin II Regulation) is intended to identify the Member State responsible for examining an asylum application in a time-efficient fashion, to establish reasonable time limits for each of the phases of determination of the Member State responsible, and to prevent abuse of asylum procedures in the form of multiple applications. The basic principle is that each asylum application should be examined by one, and only one, Member State and the system is designed to prevent phenomena such as "asylum shopping" (where a third-country national goes to several Member States to seek asylum) and "asylum in orbit" (where no Member State considers itself responsible for examining an asylum application).
- **Council Regulation (EC) No 2725/2000** concerning the establishment of 'EURODAC' for the comparison of fingerprints for the effective application of the Dublin Convention: it establishes a system for comparing the fingerprints of asylum seekers and illegal immigrants in order to facilitate the implementation of the Dublin II Regulation. Indeed, by comparing fingerprints, the EURODAC system enables Member States to determine whether an asylum applicant or a foreign national which is found to be in an illegal situation within a Member State has previously claimed asylum in another Member State or whether an asylum applicant entered the Union territory unlawfully.

Other relevant instruments in the area of asylum and international protection are identified as follows:

- **Council Directive 2001/55/EC on minimum standards for giving temporary protection** in the event of a mass influx of displaced persons and on measures promoting a balance of efforts between Member States in receiving such persons and bearing the consequences thereof.

- The **European Refugee Fund (ERF)**: the ERF promotes economic and social integration, as well as fostering solidarity between Member States by supporting their efforts in the reception of refugees and displaced persons in the event of a massive influx. The Fund, which was initially set up for a period of five years (2000-04), has been extended twice: for the 2005-2010 period and for 2008-2013.
- The **Regional Protection Programmes (RPPs)** do not have a precise legal base but are currently being implemented and financed as Community cooperation programmes with third countries in order to improve the protection available and the asylum systems in specific regions of the world.

It is important to note that the different times of adoption of the legislative instruments mentioned above have entailed a certain lack of consistency. For instance, the procedural guarantees of the Procedures Directive are not included in the Dublin procedures as the Directive was adopted two years after the adoption of the Dublin Regulation. The same occurs with the scope of the Dublin Regulation, which does not cover applicants for subsidiary protection, as that status was created by the Qualification Directive (adopted after the Dublin Regulation).

## Annex 4

### Assessment criteria

In this section, a systematic comparison of the policy options is presented, by using a common grid summarizing the **preliminary assessment** of each policy option with respect to a set of criteria. This analysis will form the basis for ranking the various policy options and formulating a judgment on the expected success of each of them.

The criteria for performing the comparison between the different policy options considers the policy objectives, the expected impacts as well as the other issues influencing the EU action in the field of asylum.

On these bases, the expected impact of each policy option has been assessed by using a synthetic evaluation code. In view of the broad scope that a Policy Plan on a Common European Asylum System can have, the assessment is inevitably carried out according to macro and intermediate impacts of each policy option, given the need to consider the interrelated effects that each policy area has on the other. Thus, the assessment is carried out on a purely qualitative basis and the judgment of policy options is expressed on a 'intuitive scale' of positive impact from one to five (√ = little positive impact; √√√√√ = extremely positive or easily feasible). Neutral effects are highlighted by the sign "0".

Moreover, in the grid used for the comparison, the motivation of the rating is provided as well as a brief analysis of each policy option with respect to the assessment criteria.

### Assessment of each Policy Option

| <b>Main Impacts identified</b>                                 |  |
|--|--|
| <i>Main areas of impacts</i>                                   | <i>Specific impacts</i>  |
| <b>Social impacts at EU and national level</b>                 | Flows of asylum seekers into the EU<br>Flows of illegal immigration from third-countries<br>Secondary and illegal movements between Member States, human trafficking and other illegal trafficking<br>Perception of refugee population                       |
| <b>Economic impacts at EU and national level</b>               | Matching EU demand for migrant labour<br>Illegal working and informal economy  |
| <b>Financial impacts at EU and national level</b>              | Kind and level of material reception conditions<br>Level of services and facilities granted to asylum seekers<br>Administrative costs  |
| <b>Impacts on persons seeking for international protection</b> | Effective access to international protection<br>Equality in protection and uniform status throughout the EU<br>Legal certainty<br>Economic (access to labour markets) and social integration (acquisition of residency)<br>Access to services and facilities |
| <b>Impacts on third-countries</b>                              | Impacts on countries of origin<br>Impacts on countries of transit  |

| <b>Main Impacts identified</b> |  |
|--------------------------------|--|
| <i>Main areas of impacts</i>   | <i>Specific impacts</i>                                      |
|                                | Impacts on countries neighboring conflict areas              |
| <b>Fundamental rights</b>      | Dignity  |
|                                | No torture or inhuman or degrading treatment                 |
|                                | Right to liberty and security                                |
|                                | Protection of personal data                                  |
|                                | Right to asylum  |
|                                | Protection in the event of removal, expulsion or extradition |

## Annex 5

### Cost assessment

The sign (–) before √ means a saving.

0 means no cost.

The more √, the higher the cost.

### Policy Option B1: Full scale harmonization of EU legislation

| Overall financial and administrative costs assessment   |
|---|
| <p>The considerable <b>amendments and additional legislative measures this policy option entails can only lead towards increased financial impacts on EU and MS.</b></p> <p>Given the <b>high degree of harmonisation</b> this policy option aims to achieve, the additional requirements regarding especially <b>procedures and reception conditions</b> all would have considerable effects on <b>costs</b> to be sustained, increasing the financial and administrative burden MS have to bear.</p> <p>The positive aspect is that <b>the modifications concerning procedures and reception conditions</b>, associated with the system of <b>structural solidarity</b>, would determine a <b>redistribution of incoming asylum flows between Member States</b>, eliminating the situation of overburden currently affecting some Member States, and generating a more equitable financial costs' allocation between them. Furthermore, the harmonized and unconditional access to the labour market would allow asylum seekers to be more self-dependent, possibly cutting service costs and gaining from labour taxation.</p> |

| Policy Option B1: Full scale harmonisation of EU legislation |        |   |
|--|--------|---|
| Field of intervention  | Rating | Motivation of the rating and aspects of the policy option necessary to achieve the impact   |
| <b>Legal Framework</b>                                       |        |   |
| Reception conditions   | √√√√   | <p>The <b>extension of legislation to subsidiary protection status</b> and the confirmation of the <b>applicability of legislation</b> to situations of <b>detention</b> in those MS where such provisions are not already in place are likely to produce <b>significant</b>. The expected increase of costs would seem to be strongly dependent also on the necessity of <b>taking the financial allowances</b> provided in some MS to an <b>adequate level with reference to national standards</b> (social aid or minimum salary), and on the expenditures related to the granting of <b>full access to health care</b> (gap between current and full access rights). Moreover, these costs will need to be sustained in a <b>continuous and long term perspective</b>.</p> <p><b>Limited</b> implementing costs are foreseen in relationship with the <b>legal duty</b> of facing the situation of <b>persons in need of international protection with special needs</b>, due to: (i) <i>una tantum</i> costs related to <b>training of staff</b> involved in individuating special needs; (ii) <b>permanent costs associated to obligation of information</b> on special needs on behalf of the staff.</p> <p>Finally, there could be long-term <b>cost-efficiencies</b> given from providing harmonised and unconditional <b>access to the labour market</b>, which would allow asylum seekers to be economically more independent and to contribute to Member States' tax systems.</p> |
| Qualification  | √√(√)  | <p>The establishment of a <b>single uniform status for both refugees and beneficiaries of subsidiary protection</b> could <b>significantly increase</b> costs.</p> <p>A <b>quite relevant rise in costs</b> will be observed in those <b>MS</b>: (i) with a <b>narrow definition of international protection statuses</b> in national legislation with respect to the common definition to be established at EU level; (i) with a <b>narrow set of rights granted to non removable persons</b> with respect to what will be established at EU level. In this case, the financial and administrative costs are expected to be on a <b>permanent</b> basis.</p> <p>Finally, costs will increase in a <b>limited amount</b> in relation to the <b>new system aimed at managing the situation of non removable persons</b> who do not currently receive protection (expenditures for their reception conditions, etc.).</p>   |

| Policy Option B1: Full scale harmonisation of EU legislation |        |   |
|--|--------|---|
| Field of intervention  | Rating | Motivation of the rating and aspects of the policy option necessary to achieve the impact   |
| Procedures   | √√√    | <p><b>Permanent and quite significant</b> costs will be generated through the definition of <b>harmonized types of procedure with common attached guarantees</b> (i.e. legal assistance, suspensive appeal). These additional costs will be <b>mainly sustained</b> by those <b>MS which currently grant more feeble guarantees related to procedures</b> compared to the planned stronger common guarantees, also due to the necessities of <i>una tantum</i> <b>training to administrative personnel involved in the management of the procedures</b>.</p> <p><b>Extending the scope</b> of application of the procedure directive (i.e. to Dublin cases and to subsidiary protection status) would require additional but limited costs in terms of <b>personnel assigned to the performance of these procedures</b> or in terms of <b>man/hours needed</b> for such procedures.</p> <p>Finally, the setting up of <b>additional common procedural safeguards</b> to answer situations of mixed arrivals or interception at sea will generate costs partly dependent by the expenses for the <i>una tantum</i> training of staff, but that will be mainly related to the incidence of exceptional and specific situations like mixed arrivals or interceptions at sea.</p> |
| <b>Practical cooperation</b>                                 |        |   |
| Institutional framework                                      | 0      | No additional financial or administrative costs would be generated.   |
| <b>Promoting responsibility and solidarity</b>               |        |   |
| Responsibility determination                                 | √√√    | A more effective implementation of the Dublin system could lead to higher costs (more transfers would take place)   |
| Solidarity mechanism   | √      | <p>In this case <b>costs will increase for those MS which are currently less affected by the asylum phenomenon</b> because of the <b>burden sharing mechanism</b>, but at an overall EU level there should not be any increase in costs determined by the introduction of measures on structural solidarity between MS.</p> <p>Also, a <b>limited rise</b> in costs will be created with the introduction of a legally <b>binding instrument providing for common procedural standards for Protected Entry Procedures (PEPs)</b>.</p>   |
| European Refugee Fund  | 0      | No additional financial or administrative costs would be generated.   |
| Cooperation and solidarity with third countries              | √      | <p>There will be a <b>permanent rise in costs</b> due to the <b>establishment of a mandatory resettlement scheme at European level</b>. Moreover, a relevant increase in financial expenses will depend on the funding of <b>Capacity building programmes</b> for third countries, including <b>Regional Protection Programmes</b>.</p> <p>In the first case, the <b>costs will arise mainly in terms of reception conditions</b> for accepting <b>additional flows of people in need of international protection</b>, while in the second case the rise in costs will be driven by the <b>financial support</b> to be granted for the implementation of <b>capacity building programmes (Regional Protection Programmes)</b> in third countries.</p>   |

## Policy Option B2: Further harmonization of EU legislation

| Overall financial and administrative costs assessment  |
|--|
| In an optic of comparison, the less binding characteristic of the present policy option would entail <b>lower costs in comparison to a full-scale harmonisation process</b> . There are however measures such as the extension of reception conditions to beneficiaries of subsidiary protection and the stronger guarantees related to procedures which inevitably <b>entail higher financial and administrative costs compared to the current CEAS</b> . Finally, the improved <b>access to the labour market</b> can slightly dilute the overall financial impacts. |

| Policy Option B2: Further harmonisation of EU legislation |        |   |
|---|--------|---|
| Field of intervention                                     | Rating | Motivation of the rating and aspects of the policy option generating costs  |
| <b>Legal Framework</b>                                    |        |   |
| Reception conditions                                      | √√     | <p>The <b>extension of legislation to persons applying for subsidiary protection status</b> and the <b>applicability of legislation</b> to situations of <b>detention</b> in those MS where such provisions are not already in place are likely to produce <b>significant</b> financial and administrative costs (to be assessed in specific IA for amendments of the Reception conditions Directive). The expected increase of costs would seem to be strongly dependent also on the general level of <b>material reception conditions</b> (costs for increasing in kind and/or financial allowances). Moreover, these costs will need to be sustained in a continuous and long term perspective.</p> <p>There could be long-term cost-efficiencies given from providing <b>access to the labour market</b> which would allow asylum seekers to be economically more independent . Although the administrative costs for providing labour market services may rise in relative terms, these would be compensated by these people's fiscal contributions through labour taxation.</p>   |
| Qualification   | √(√)   | <p>The financial and administrative costs are expected to be marginally high for those MS whose <b>definitions of international protection statuses</b> are narrower than the programmed harmonised definitions, given that these MS would have to include a wider range of people within legislation. Costs of the amendments to the Qualification Directive will be specifically assessed in the IA for the amendment of the Qualification Directive.</p> <p>Limited and mainly <i>una tantum</i> bureaucratic costs would arise from the definition of a <b>transfer of protection mechanism</b>.</p>  |
| Procedures  | √      | <p>The costs are likely to be <b>relatively limited</b>. They will be assessed in the specific IA for the amendment of the Procedures Directive</p> <p>However, marginally high and continuous costs are foreseen for the definition of a <b>single procedure</b> through the harmonization of <b>stronger common attached guarantees</b> (i.e. legal assistance, suspensive appeal). These costs will be mainly sustained by those <b>MS which currently grant more feeble guarantees</b> related to procedures compared to the planned stronger common guarantees. Limited <i>una tantum</i> costs would also occur for the necessity of <b>training administrative personnel involved in the management of the procedures</b>.</p> <p><b>Extending the scope</b> of application of the Procedures Directive (i.e. to Dublin cases and to subsidiary protection status) would require unpredictable but possibly permanent costs in terms of personnel assigned to the performance of these procedures or in terms of man/hours needed for such procedures. The additional personnel costs are however expected to be limited.</p> <p>Finally, the setting up of <b>additional common procedural safeguards</b> to answer situations of mixed arrivals or interception at sea would generate limited costs partly dependent on the expenses for the <i>una tantum</i> training of staff. The costs would however be mainly related to the incidence of exceptional and specific situations like mixed arrivals or interceptions at sea.</p> |
| <b>Practical cooperation</b>                              |        |   |

| Policy Option B2: Further harmonisation of EU legislation |        |   |
|---|--------|---|
| Field of intervention                                     | Rating | Motivation of the rating and aspects of the policy option generating costs  |
| Institutional framework                                   |        | No additional financial or administrative costs would be generated.   |
| <b>Promoting responsibility and solidarity</b>            |        |   |
| Responsibility determination                              | √√     | <p>The financial and administrative costs are expected to be <b>relatively limited</b>. These would be generated by the <b>improvement of the existing Dublin mechanism and will be specifically assessed in the IA for the amendments to the Dublin and EURODAC regulations</b>. These provisions would require a permanent increase in personnel costs (i.e. number of staff in charge of procedures, training of staff) as well as an initial limited expense for legal adaptation.</p> <p><b>Freezing returns</b> would entail limited and <i>una tantum</i> costs in circumstances of particular asylum pressure (on a responsible MS) for those MS where asylum seekers would stay (instead of being transferred to another MS). With the temporary and unpredictable nature of this mechanism, this option would generate relatively limited costs in the long run.</p> <p>Limited costs of legal adaptation and subsequent implementation would be borne by the EU and MS when defining modifications to ensure the <b>consistency of legislation with the evolved asylum acquis</b> as well as <b>improving the existing EURODAC regulation</b>.</p> |
| Solidarity mechanism                                      | 0(√)   | <p>The financial and administrative costs are unpredictable but are expected to be quite limited given that the definition of a <b>principle of exceptional financial solidarity</b> would simply require <i>una tantum</i> costs. Its implementing costs are described in the “European Refugee Fund” cost assessment below.</p> <p>Those MS which currently do not use <b>PEPs</b> would incur limited permanent costs in terms of administrative personnel needed to guarantee the implementation of the new procedure.</p>  |
| European Refugee Fund                                     | √      | <p>The financial and administrative costs would be limited for <b>incrementing the budget</b> since this measure would only respond to cases of particular asylum pressure on certain MS. This would mean a pooling of MS financial resources for occasional events which, because of the sharing of the financial solidarity burden itself, would be <i>una tantum</i> and limited.</p>  |
| Cooperation and solidarity with third countries           | √      | <p>The only costs that would have to be sustained are the legislative ones needed to establish a <b>voluntary resettlement scheme</b> at EU level. Additional costs would be incurred only by those MS which decide to participate to such a scheme and these would mainly be in terms of reception costs provided for the resettled quota of people in need of international protection.</p>   |

## Policy option C: Cooperation and exchange of best practices

| Overall financial and administrative costs assessment   |
|---|
| <p><b>Financial costs are likely to rise</b> due to the need to back up the various cooperation measures with adequate financial support (i.e. shared financial support to projects and training, financing capacity building programmes in third countries). <b>Administrative costs are also inclined to grow</b> given the increased utilization of asylum personnel necessary to respond to the foreseen cooperation measures and to effectively conform to the EU guidelines covering the various asylum issues. The creation of the <b>European Support Office (ESO)</b> would however help national administrations to moderate the increase in administrative costs in the long term.</p> |

| Policy option C: Cooperation and exchange of best practices |          |  |
|---|----------|--|
| Field of intervention                                       | Rating   | Motivation of the rating and aspects of the policy option generating costs   |
| <b>Legal Framework</b>                                      |          |  |
| Reception conditions  | <b>0</b> | No additional costs would be generated.  |
| Qualification   | <b>0</b> | No additional costs would be generated.  |
| Procedures  | 0        | No additional costs would be generated.  |
| <b>Practical cooperation</b>                                |          |  |
| Institutional framework                                     | √√√(√)   | <p>The <b>creation of the European Support Office (ESO)</b> will produce <b>quite significant</b> financial and administrative costs extremely <b>concentrated in the short term</b> at EU level, mainly related to: (i) costs for the structure of the ESO; (ii) costs for the personnel to be involved in the ESO. These costs will be assessed in the separate IA following the ongoing feasibility study on how to improve support for practical cooperation activities.</p> <p>In the long term the national costs will decrease as the ESO will take up some of the national costs related to practical cooperation.</p> |
| <b>Promoting responsibility and solidarity</b>              |          |  |
| Responsibility determination                                | √        | The financial and administrative costs are expected to be limited since the facilitation and improvement of the <b>implementation of the Dublin mechanism</b> through cooperation between MS would generate additional costs for a limited number of actions such as <i>una tantum</i> creating and distributing information or possible permanent costs of personnel for improved coordination  |
| Solidarity mechanism  | <b>0</b> | No additional costs would be generated.  |
| European Refugee Fund                                       | <b>0</b> | No additional costs would be generated.  |
| Cooperation and solidarity with third countries             | √√(√)    | <p>Limited costs would have to be sustained on a permanent basis for the personnel needed to coordinate a <b>voluntary resettlement scheme</b> at EU level and capacity building programmes with third countries.</p> <p>Additional costs would be incurred only by those MS which decide to participate to such a scheme and these would mainly be in terms of reception costs provided for the resettled quota of people in need of international protection.</p>  |

## Policy Option D: Overall comprehensive legal instrument on Asylum

### Overall financial and administrative costs assessment

The **considerable amendments and additional legislative measures** this policy option entails can only lead **towards increased financial impacts on EU and MS**.

Given the **high degree of harmonization** this policy option aims to achieve, the additional requirements regarding especially **reception conditions** all would have their effects on the **financial and administrative costs** to be sustained would likely be considerable, increasing the financial and administrative burden MS have to bear.

The positive aspect is that the **modifications concerning reception conditions**, associated with the system of **structural solidarity**, would determine a **redistribution of incoming asylum flows between MS**, eliminating the situation of overburden currently affecting some MS, and generating a more equitable financial costs' allocation between MS. Furthermore, harmonized and unconditional access to the labour market would allow asylum seekers to be more self-dependent, possibly cutting service costs and gaining from labour taxation.

Moreover, it must be stressed that the financial and administrative costs would probably be extremely **high in the short term** due particularly to the creation of the **European Asylum Authority**, whereas the centralized management of the CEAS would subsequently lower them for the functioning of the European Asylum Authority and its relative bodies (i.e. the European appeal authority) and the reduction of competent national administrations.

### Policy Option D: Overall comprehensive legal instrument on Asylum

| Field of intervention  | Rating | Motivation of the rating and aspects of the policy option necessary to achieve the impact  |
|------------------------|--------|--|
| <b>Legal Framework</b> |        |  |
| Reception conditions   | √√√√   | <p>The <b>extension of legislation to subsidiary protection status</b> and the confirmation of the <b>applicability of legislation</b> to situations of <b>detention</b> in those MS where such provisions are not already in place are likely to produce <b>significant, but unpredictable</b>, financial and administrative costs. The expected increase of costs would seem to be strongly dependent also on the necessity of <b>taking the financial allowances</b> provided in some MS to an <b>adequate level with reference to national standards</b> (social aid or minimum salary), and on the expenditures related to the granting of <b>full access to health care</b> (gap between current and full access rights). Moreover, these costs will need to be sustained in a <b>continuous and long term perspective</b>.</p> <p><b>Limited</b> implementing costs are foreseen in relationship with the <b>legal duty</b> of facing the situation of <b>persons in need of international protection with special needs</b>, due to: (i) <i>una tantum</i> costs related to <b>training of staff</b> involved in individuating special needs; (ii) <b>permanent costs associated to obligation of information</b> on special needs on behalf of the staff.</p> <p>Finally, there could be unpredictable long-term <b>cost-efficiencies</b> given from providing harmonised and unconditional <b>access to the labour market</b>, which would allow asylum seekers to be economically more independent and to contribute to MS tax systems.</p> |
| Qualification          | √√√(√) | <p>The measure on <b>establishing of a single uniform status for both refugees and beneficiaries of subsidiary protection</b> is directly linked to the <b>significant increase</b> in financial and administrative costs already analyzed and mentioned in case of reception conditions.</p> <p>Instead, a <b>quite relevant rise in administrative costs</b> will be observed in those MS: (i) with a <b>narrow definition of international protection statuses</b> in national legislation with respect to the common definition to be established at EU level; (i) with a <b>narrow set of rights granted to non removable persons</b> with respect to what will be established at EU level. Also in this case, the financial and administrative costs are <b>unpredictable</b>, but expected on a <b>permanent</b> basis.</p> <p>Finally, costs will increase in a <b>limited amount</b> in relation to the <b>new system aimed at managing the situation of non removable persons</b> that do not currently receive international protection (expenditures for their reception conditions, etc.).</p>  |
| Procedures             | -√     | <p>Costs concerning procedures will <b>decrease significantly</b> due to the <b>processing of applications at EU level</b> by the European Asylum Authority. This measure will indeed generate <b>savings on the current system</b> managed at MS level, which implies problems related to: (i) <b>multiple applications</b>; (ii) <b>inefficient resources allocation</b> (cost of personnel with the system managed at EU level vs cost of personnel with the system managed at MS level); (iii) <b>transfers under the Dublin system</b>; etc.</p>  |

## Policy Option D: Overall comprehensive legal instrument on Asylum

### Overall financial and administrative costs assessment

#### Practical cooperation

|                         |        |  |
|-------------------------|--------|--|
| Institutional framework | √√√(√) | <p>The <b>creation of the European Asylum Authority</b> will produce <b>high financial and administrative costs extremely concentrated in the short term</b> at EU level, mainly related to: (i) costs for the structure of the Authority; (ii) costs for the personnel to be involved in the Authority. But, on a <b>long term perspective</b> (as already stressed in the section on procedures) the substitution of the national structures dedicated to procedures and Dublin system with the centralized Agency will produce an <b>efficiency in costs</b> for the entire system.</p> <p>A <b>low permanent increase</b> in the level of costs will be also implied by the activities to be performed in order to <b>make effective the established Quality Review Mechanism</b> (obligation of information to be respected, <i>una tantum</i> training of staff dedicated to the activities, personnel involved at EU level), while a <b>minor and una tantum cost</b> will be associated also to the creation and implementation of <b>adequate guidelines on the new asylum system</b> (<i>una tantum</i> training of staff dedicated to the realization of guidelines at EU level, <i>una tantum</i> training of staff dedicated to the implementation of guidelines at MS level).</p> <p>An unpredictable but permanent <b>low decrease in costs</b> will be determined thanks to the <b>higher level of efficiency</b>.</p> |
|-------------------------|--------|--|

#### Promoting responsibility and solidarity

|   |     |  |
|---|-----|--|
| Responsibility determination                    | 0   | <p>As already stressed in describing the costs associated to the creation of the European Asylum Agency, <b>costs would stay level and then decrease</b> since MS staff dealing with Dublin system would be substituted with staff at EU level dealing with physical allocation and long-term cost efficiencies could be reached by a central institution.</p> <p>Concerning the costs depending on performing allocation of asylum seekers between MS, it is not predictable if they would be lower or higher than the costs sustained currently for the transfers under the Dublin system since it will be dependent by the analysis case by case.</p>   |
| Solidarity mechanism                            | √   | <p>In this case <b>costs will increase for those MS which are currently scarcely affected by the asylum phenomenon</b> because of the <b>burden sharing mechanism</b>, but at an overall EU level there should not be any increase in costs determined by the introduction of measures on structural solidarity between MS.</p> <p>Also, a <b>limited rise</b> in costs will affect, in accordance with the introduction of a legally <b>binding instrument providing for common procedural standards for Protected Entry Procedures (PEPs)</b>, those MS with no PEPs compared to the common standards on PEPs that will be established.</p>  |
| European Refugee Fund                           | 0   | No additional financial or administrative costs would be generated.  |
| Cooperation and solidarity with third countries | √√√ | <p>There will be a <b>permanent rise in costs</b> due to the <b>establishment of a mandatory resettlement scheme at European level</b>. Moreover, a relevant increase in financial expenses will depend on the funding of <b>Capacity building programmes</b> for third countries, including <b>Regional Protection Programmes</b>.</p> <p>In the first case, the <b>costs will arise mainly in terms of reception conditions</b> for accepting <b>additional flows of people in need of international protection</b>, while in the second case the rise in costs will be driven by the <b>financial support</b> to be granted for the implementation of <b>capacity building programmes</b> in third countries.</p> |

## Preferred policy option: Further harmonization of EU legislation (B2) associated with cooperation and exchange of best practices (C)

| Overall financial and administrative costs assessment  |
|--|
| <p>The less binding characteristic of option B2 would entail <b>lower financial and administrative costs in comparison to a full-scale harmonisation process (option B1)</b>. There are however measures such as the extension of reception conditions to beneficiaries of subsidiary protection and the stronger guarantees related to procedures which inevitably <b>entail higher financial and administrative costs compared to the current CEAS</b>. Finally, the improved <b>access to the labour market</b> for asylum-seekers can slightly dilute the overall financial impacts.</p> <p><b>Measures of practical cooperation will entail additional costs</b> due to the need to back up the various cooperation measures with adequate financial support (i.e. shared financial support to projects and training, financing capacity building programmes in third countries). <b>Costs are also inclined to grow</b> given the increased utilization of asylum personnel necessary to respond to the foreseen cooperation measures. The creation of the <b>European Support Office</b> would however help national administrations to moderate the increase in administrative costs in the long term.</p> |

| Cooperation and solidarity with third countries   | √√√    | For a general overview on the financial and administrative costs refer to the assessment of policy options B2 and C. |

## **Annex 6**

### **Glossary**

#### **Asylum**

Asylum is a form of protection given by a State on its territory based on the principle of ‘non-refoulement’ and internationally or nationally recognised refugee rights. It is granted to a person who is unable to seek protection in its country of citizenship and/or residence in particular for fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group or political opinion.

#### **Common European asylum system**

Rules and principles at European Union level leading to a common asylum procedure and a uniform status, valid throughout the Union, for those granted asylum. The major aims and principles were agreed to in October 1999 at the European Council in Tampere (Finland) by the Heads of State or Government. The second phase in the establishment of the common European asylum system started with the adoption of The Hague programme in November 2004.

#### **Dublin system**

The Dublin Convention and its successor, the Dublin Regulation, set the rules concerning which Member State is responsible for handling an asylum application. The objective of the system is to avoid multiple asylum applications, also known as ‘asylum shopping’. The Dublin system comprises the Dublin and Eurodac Regulations and their implementing regulations.

#### **Eurodac**

The Commission has launched a database called Eurodac to store fingerprints of asylum-seekers, in order to help Member States to determine whether a person has previously applied for asylum status in another Member State.

#### **Geneva Convention**

The convention relating to the status of refugees done at Geneva on 28 July 1951. The convention is supplemented by the New York Protocol of 31 January 1967. All Member States are party to the convention and the protocol, which are the basis on which the Common European Asylum System is built.

#### **Mixed flows**

Mixed flows are created when persons in need of protection move/travel together with migrants whose motivation is mainly the search of better living conditions, without protection motivations. Within these flows it is often difficult to identify the persons in need of protection, who therefore risk ‘refoulement’. These flows are increasingly important at the Southern EU maritime border.

## **Non-refoulement**

The key principle of international refugee law, which requires that no State shall return a refugee in any manner to a country where his/her life or freedom may be endangered. The principle also encompasses non-rejection at the frontier. Its provision is contained in Article 33 of the 1951 Convention Relating to the Status of Refugees and constitutes the legal basis for States' obligation to provide international protection to those in need of it. Article 33(1) reads as follows: 'No Contracting State shall expel or return (refouler) a refugee in any manner whatsoever to the frontiers of territories where his life or freedom would be threatened on account of his race, religion, nationality, membership of a particular social group or political opinion'. Article 3 of the European Convention for the Protection of Human Rights and Fundamental Freedoms, in the light of the jurisprudence of the European Court of Human Rights and Article 3 of the UN Convention Against Torture and Other Cruel, Inhumane and Degrading Treatment or Punishment, are also considered as bases for 'non-refoulement' obligations.

## **Non-removable persons**

In general, these are the persons covered by the principle of non-refoulement. The expression however often refers to the persons who are in a Member State and who have not been granted any type of international protection status but who cannot be returned to their country of origin. For example, certain persons do not qualify for obtaining international protection (because they are not being persecuted or because they do not fulfil all the requirements to receive international protection) but cannot be sent back for humanitarian, medical or other reasons. Currently there is no common approach for the treatment of these persons.

## **Protected Entry Procedures**

These are procedures implemented from diplomatic representations of some Member States, allowing a non-national to approach the potential host country outside its territory with a claim for asylum or other form of international protection and subsequently to be granted an entry permit in case of a positive response to that claim, be it preliminary or final. Protected entry procedures, if they are well crafted, can drain parts of the market for human smuggling and partially eliminate the problem of returning the rejected caseload. There are currently no EU rules on this type of procedure.

## **Refugee**

A person who fulfils the requirements of Article 1(A) of the Geneva Convention, Article 1(A) defines a refugee as any person who, owing to a well-founded fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group or political opinion, is outside the country of his nationality and is unable or owing to such fear, is unwilling to avail himself of the protection of that country; or who not having a nationality and being outside the country of his former habitual residence as a result of such events, is unable or, owing to such fear, is unwilling to return to it.

## **Refugee status**

This is defined in the EU legislative instruments as the status granted by a Member State to a person who is a refugee and admitted as such to the territory of that Member State. In terms of the Geneva Convention refugee status is defined as the status possessed by a person who fulfils the requirements of the refugee definition as laid down in the convention.

### **Regional Protection Programmes**

Regional Protection Programmes were first proposed by the Commission in a 2005 Communication as a tool to enhance the capacity of areas close to regions of origin to protect refugees. The aim should be to create the conditions for one of the three Durable Solutions to take place – repatriation, local integration or resettlement. The development of Regional Protection Programmes, in cooperation with UNHCR and third countries in regions of origin requires the coordination of EU, refugee, humanitarian and development policies to address the full range of protection needs as well as the impacts of refugee populations on local communities to ensure that benefits are maximised for all. However, humanitarian aid operations in favour of refugees are not as such part of the Regional Protection Programmes. Currently there are Regional Protection programmes being implemented in Tanzania, Ukraine, Moldova and Belarus.

### **Resettlement**

Resettlement means the transfer of third-country nationals or stateless persons on the basis of an assessment of their need for international protection and a durable solution, from a third country of first asylum to a Member State, where they are permitted to reside with a secure legal status. UNHCR usually advises the Member States which implement resettlement programmes on the most adequate caseloads of refugees to be resettled. The main countries of resettlement of refugees in 2006 were the US (41,300 resettled refugees), Australia (13,400), Canada (10,700) and Sweden (2,400). Only a limited number of EU Member States implement resettlement schemes and there is currently no common EU resettlement scheme.

### **Subsidiary protection**

The EU Qualification Directive created the subsidiary protection status in order to give protection to certain categories of persecuted people, who are not covered by the 1951 Geneva Convention on refugees. It grants a lower level of rights than the Geneva Convention status.

### **Tampere European Council**

In October 1999 the Tampere European Council adopted a comprehensive approach to put into practice the new political framework established by the Treaty of Amsterdam in the area of Justice and Home Affairs. The Council set ambitious objectives and deadlines for action in all relevant areas, including asylum and immigration, police and justice cooperation and fight against crime.

### **Temporary protection**

People sometime need temporary protection after being temporarily displaced from their homes, e.g. Kosovo in 1999. The EU adopted a directive on temporary protection in July 2001, the provisions of which have not been enacted so far.

## **The Hague programme**

The Tampere programme, adopted at the Tampere European Council in 1999, set the agenda for work in the area of Justice and Home Affairs for the period 1999-2004. Likewise, the European Council adopted in 2004 the Hague programme, which covers the period 2005-2010, and provides, among others, for the continuation of the efforts in establishing common European asylum and immigration policies.
