Subject : Implementation of the "Prüm Decisions" regarding fingerprints
 – Search capacities

Pursuant to Article 13 of the "Prüm implementing Decision" (Council Decision 2008/616/JHA of 23 June 2008), Member States shall submit declarations to the General Secretariat of the Council in which they lay down their maximum search capacities per day for dactyloscopic data of identified persons and dactyloscopic data of persons not yet identified.

Delegations comply with this obligation by completing the tables set out below. Such information is also necessary for other Member States to plan their system developments and their resources to deal with the follow-up to hits.

The figures marked in *italic* are the *requested* throughput. To ensure that these are not too high for the other Member States, Member States will have to agree on the acceptable figures. Agreed figures will be indicated in normal print.

Since EL was not in a position to submit numbers by 15 April 2010, the figures for EL have been deduced by setting the number of requests the corresponding Member States wish to send.
