Number of hits on vehicles covers also the hits on licence plates. High level of H forms outgoing on art. 95 is because on one hand hits on flagged alerts, on other hand by cases where the surrender procedure is held without arrest or for judicial reason (not delivered EAW within limit, errors in EAW) is the surrender procedure finished without surrender.

We are not able to indicate on which articles we have received the mentioned G-forms. The total number of G-forms is indicated in the last line(banknotes)in the hit table. In the table for Consultation procedure we have indicated the total number of O and N forms, as this is the only way to count our consultation cases. We are not able to provide the number of own alerts with a flag. Best Regards Sirene Praetorius, Head of Sirene.

Slovakia's current technical solution does not allow to provide the statistical data as it is requested to separate the number of outgoing/incoming G/H forms to each category of the alerts 95-100. Data which could be provided you only is following: total amount of incoming G forms: 4676; total amount of outgoing G forms: 1269; total amount of incoming H forms: 325; total amount of outgoing H forms: 402.

Remark to statistics field HITS: Due to technical reasons SIRENE Switzerland cannot distinguish between effective hits and incoming/outgoing G + H forms currently. Furthermore a small part of the statistic was established manually. It may differ in a small percentage from the effective data. For year 2012 we will be able to provide a fully-automated statistic (upgraded WFS).
