ADDENDUM 1 TO OUTCOME OF PROCEEDINGS

from: Council
on: 16 December 2013
No. prev. doc.: 16607/13 ADD 1

Subject: Fifteenth Annual Report according to article 8(2) of Council Common Position 2008/944/CFSP defining common rules governing control of exports of military technology and equipment

Delegations will find attached Table A1, part 1 (Albania-Ecuador).

TABLE A.I

Figures of Table A.I are broken down per Member State, and where possible per EU Common Military List category where (a) = number of licences issued; (b) = value of licences issued in euros; (c) = value of arms exports in euros (if available)¹.

Total EU licence refusals to each destination, region and worldwide are provided, broken down by EU Common Military List category; (d) = number of licence refusals (small discrepancies may appear between breakdowns and totals due to refusals concerning more than one ML item or refusals for items other than those appearing in the ML²); (e) = criteria numbers on which refusals are based (the approximate number of times each criterion is invoked is indicated in brackets).

NB:

Statistics are compiled differently by each Member State: no uniform standard is used. Consequently, owing to current procedures in the area of arms export reporting or data protection legislation, not all countries have been able to submit the same information³ :

¹To make the table more readable, nil values and/or the mention 'not available' are omitted, and empty rows deleted.

²Concerning refusals (row (d)), totals do not always correspond to the sum of the refusals shown per military list item; this is because in some instances one refusal concerns more than one military list item, and in some instances refusals which have been issued in accordance with the Common Position for items which do not appear on the military list (for example dual use items for military end-use) are included in the total.

³ (i) Concerning Austria: with regard to items covered by the EU Common Military List, the Austrian law distinguishes between 'war material' (as stipulated in the Austrian War Material Act and Regulation) and 'equipment on the Common Military List not listed as war material' covered by the Austrian Foreign Trade Act. As to category c) value of actual exports by Military List Category, figures may be inaccurate in particular as such data regarding equipment of the Common Military List not listed as war material is available to the competent authorities only after expiration or full utilization of the individual export license.

(ii) Concerning the Czech Republic: In rows a) and b) are not included General transfer licences and Global transfer licences pursuant to Directive 2009/43/EC, which could cover goods of more than only one ML Category and allow exports to more than only one Member State. In addition to that, some other licenses issued cover goods of more than only one ML Category and their value is the total value of all covered goods. Due to this fact, in rows b) are not included these types of licences. The sums in rows c) are based on information provided by exporters and also contain actual exports made in 2012 based on licences issued in a previous year.

(iii) Concerning Denmark: it should be noted, that Denmark is listed as the recipient in two cases despite the fact that the export licenses granted related to other countries (Germany and Sweden). The reason for this is that in those cases Denmark was in fact the final recipient.

- With regard to actual exports authorised by EU Member States (row c)), it is important to note that Belgium, Denmark, Germany, Poland, Greece, Ireland and the United Kingdom could not supply these data while France and Italy have reported total values only. No aggregation is therefore reported at the EU level, except for destinations where all the EU Member States that exported to the destination in question can report under row c).

- With regard to the use of global and general licences notably applied to intraEU transfers pursuant to Directive 2009/43/EC, it is important to note that the actual value of arms transfers and exports under global and general licences is generally reported by EU Member States. This is however dependant on the Member States' ability to report on actual values (row c)) as described above and to possible additional national specificities as explained in footnote n°3.

(iv) Concerning Germany: some licenses issued cover goods of more than one ML Category (e.g. one license for the export of rifles and their ammunition). In reporting in table A.I., each time a license concerns a ML category, it is counted as one single license, so the sums in rows a) and column "Total per destination " do not always reflect the actual numbers of licenses granted, but a slightly higher figure (i.e. the number of times a ML category has been affected by a license for that destination).

(v) Concerning Greece: the reported export licences include temporary exports for overhaul, repair, exhibitions, demonstrations and field trials.

(vi) Concerning France: exports to Hong Kong are included in the figures for China (Mainland). Exports to Greenland, the Faeroe Islands, Aruba, the Netherlands Antilles and the islands associated to the United Kingdom are considered without object; exports to New Caledonia are not included (but can be found in the national report).

(vii) Concerning the Netherlands:

- As values of global licences cannot always be attributed to individual military list categories or individual countries, quoted total values indicated under the worldwide total are higher than the sum of the values per ML category or per destination.

- The figures on actual exports reported by the Netherlands are based on information provided by exporters in 2012, and may reflect exports based on a licence issued in a previous year. Although much care has been given to the collection of the data on actual exports, the actual export figures for 2012 may be higher than the values quoted in this report.

(viii) Concerning Portugal: For the year concerning the current report, data regarding the values in euros of exports of hunting and sports guns and relating ammunition (all of Portuguese ML1 and ML3 exports), were not statistically collected and therefore are not presently available.

(ix): concerning Hungary: data provided includes figures of both general, global and individual export licences. Transfers of military equipments to the Hungarian Forces deployed in various missions (table AII) are not considered regular foreign trade transactions, because there is no actual payment taking place.

It is important to bear in mind that exports to destinations subject to EU arms embargoes comply with the terms, conditions and possible exceptions set out in the decisions imposing such embargoes. The full list and details of embargoes is available at:
