17	megaphone		1	
18	Launcher * (grenade with rubber balls)		6	
19	Fire extinguisher		1	

The table contains individual and collective equipment for a platoon to deal with crowds.

* Launcher a special device (similar to a funnel-cup), is mounted on the mouth of the barrel of a rifle-shotgun appropriate and serve to eject the shell with rubber balls. The grenade is placed in cup-launcher which goes in the muzzle and a special bullet shoots the grenade in the desired direction at an angle of about 45°. This is very convenient because it avoids throwing the grenade manually, which in a crowd can cause side effects if in the discharge by hand, you can attach a piece of equipment from a member near you.
