Introduction

1. This is the Chief Coroner's annual report to the Lord Chancellor. It is the fourth such report. It is the first report from the second Chief Coroner of England and Wales, His Honour Judge Mark Lucraft QC. In this report the Chief Coroner will provide an assessment of the current state of the coroner service and make recommendations for the future direction and progress of the service.
2. Section 36 of the Coroners and Justice Act 2009 (the 2009 Act) provides that the Chief Coroner must give the Lord Chancellor a report for each year.

Contents of report

3. As required by section 36(2) of the 2009 Act the Chief Coroner wishes to bring a number of matters to the attention of the Lord Chancellor. These include the development of the statutory reforms which came into force in July 2013, the additional reforms which the first Chief Coroner devised and which the second Chief Coroner continues to develop, and actions taken by the Chief Coroner under his powers and duties in the 2009 Act.

The Chief Coroner

4. The post of Chief Coroner of England and Wales was created by section 35 and Schedule 8 of the 2009 Act which came into force for appointment purposes on 1 February 2010.
5. His Honour Sir Peter Thornton QC took up the post with effect from September 2012 for a three year term. In April 2015, the Lord Chief Justice, Lord Thomas, after consultation with the then Lord Chancellor, the Rt. Hon. Chris Grayling MP, extended Judge Thornton's term of office as Chief Coroner of England and Wales until 1 October 2016. Peter Thornton completed his term as Chief Coroner on 30 September 2016 and retired as a Senior Circuit Judge on 18 October 2016. In the Queen's Birthday honours 2017 his work with the coroner service and the administration of justice was marked by the award of a knighthood.
6. On 18 August 2016 it was announced that the Lord Chief Justice, after consultation

with the then Lord Chancellor, the Rt. Hon. Liz Truss MP, had appointed His Honour Judge Mark Lucraft QC as the Chief Coroner of England and Wales with effect from 1 October 2016 for a three year term.

7. The extent of the Chief Coroner's jurisdiction is England and Wales.
8. His Honour Judge Mark Lucraft QC was authorised to sit as a Deputy High Court Judge under section 9(1) of the Senior Courts Act 1981 on 22 November 2016 and was appointed as a Senior Circuit Judge at the Central Criminal Court (Old Bailey) on 7 February 2017.
9. The Chief Coroner also sits in the Divisional Court of the High Court on coroner cases, either applications for judicial review or applications for a fresh inquest (brought with permission of the Attorney-General) under section 13 of the Coroners Act 1988 (as amended). He divides his time between his duties as Chief Coroner and sitting as a judge at the Central Criminal Court and in the Court of Appeal (Criminal Division).

The Chief Coroner's role

10. The Chief Coroner leads the coroner service of England and Wales, sets national standards in the coroner system, maintains a national framework in which coroners operate, and oversees the implementation and development of statutory and other coroner reforms.

Reforms and planning for the future

11. The first Chief Coroner devised and developed a package of reforms. They were designed to create across England and Wales a more modern, open, consistent and just coroner service, and to reduce unnecessary delays. The second Chief Coroner has continued with those reforms. In these reforms, statutory and otherwise, the Chief Coroner maintains as central to his thinking the essential concept that bereaved families must at all times be at the heart of the coroner process.
12. In April 2015 the first Chief Coroner formulated a 77 point Development Plan for 2015-2016. The Plan set out objectives and progress under a number of headings: structures, investigation, inquests, reporting to prevent future deaths, High Court, changes in the law, training, guidance, speeches, meetings, visits and complaints. The second Chief Coroner has updated the Development Plan for the

year 2016-2017 and 2017-2018. The document is to be found at Annexe A.

13. The first Chief Coroner drafted a blueprint for now and the future entitled 'A Model Coroner Area' (June 2016). The blueprint remains an aspirational document for the coroner service in its present local area structure. The plan has been amended in a few areas. The current version of the document is to be found at Annexe B.

The Coroner Service

14. The coroner service of England and Wales remains essentially a local service. There is no national structure. Coroners are appointed and paid locally, the service is funded locally including the provision of courts and other accommodation, and coroners' officers and support staff are employed locally by police and or local authorities.
15. There have been numerous calls for a national service, with coroners appointed and the service funded and run centrally, like other judicial services. This has not happened. The Chief Coroner supports calls for a national service. There is much to be gained from such a move in terms of standardisation, consistency and implementation of reform.
16. In the meantime, the localised nature of the present service produces inevitable inconsistencies between coroner areas. Coroners have to an extent worked in isolation, unsupported by a sound framework and network of coroner resilience. The Chief Coroner has continued to work towards greater consistency utilising many of the plans put in place by his predecessor.
17. There is inconsistency in the provision of resources across coroner areas depending on the approach of individual local authorities. Some areas are well resourced in terms of the provision of coroners' officers and support staff, others are not. As set out in the third annual report in coroner areas in different parts of the country, where there are approximately 2,500-3,000 deaths reported to the coroner each year, the number of officers ranges from 2 to 11. Shortage of coroners' officers adds to the stress on those staff in post with inevitable knock-on delays.
18. In West London there have been particular issues over staffing levels. The Senior Coroner for West London was suspended pending an investigation into his conduct. An assistant coroner was asked to step in as an Acting Senior Coroner to lead the coroner service in that area for the duration of the period of suspension. The Chief Coroner has held regular meetings with the acting senior coroner, representatives of the local authority and representatives of the Metropolitan Police to monitor the provision of resources.

19. The Chief Coroner has continued to meet with representatives of the local authorities. Most local authorities play a supportive role in working with the senior coroner. We all appreciate that public funding is tight, but careful planning – merging areas together, tendering for services, bringing the coroner and all support staff together into one location, sharing resources and working collaboratively with other areas – help to reduce costs and generate greater resilience.
20. The Chief Coroner is devising an appraisal scheme for coroners. The scheme will apply, at least initially, to all assistant coroners. It will then be extended to area coroners and senior coroners as well. The Chief Coroner will work with the local authorities on the scheme. An appraisal scheme should help to improve a consistent approach to practices and procedures as well as consistency in outcomes. It should also assist in monitoring the bedding-in of the national training carried out through the Judicial College. The feedback to the Chief Coroner from coroners and local authorities is very positive. Many assistant coroners welcome a scheme that will appraise their abilities and performance against the whole spectrum of skills required to undertake the post and to help in tailoring training needs.

Positive developments

21. Although there remain some problems with a local as opposed to a national coroner system, there are positive developments to report.
22. The Chief Coroner met with the Judicial Office to look at support that may be provided by on issues such as human resources and in dealing with the media. All full-time and part-time coroners and assistant coroners are judicial office holders. Complaints against coroners are dealt with through the Judicial Complaints Investigation Office, and yet there is a perception that coroners are not always within the wider judicial family. The Chief Coroner is seeking to address this by discussing what scope there might be for greater support on issues such as human resources and media assistance, particularly in those cases where the coroner may not have support on that issue from his or her local authority. It is hoped that, alongside some support from the Judicial Office on these issues all coroners will be supplied with judiciary access. This will make communication far easier with all coroners.

Statutory framework

23. The view expressed in the 2015-2016 Report that the structure set out in the 2009 Act has worked well, remains to be the case.

24. The Government's promised review of the coroner service is still awaited. Reference was made to the review in the third annual report last year, but as yet it has not been published.

Mergers: reduction in number of coroner areas

25. There continues to be considerable benefit from the reduction in the number of coroner areas across England and Wales. In the period since implementation of the 2009 Act in July 2013, the number of areas has reduced from 110 to 92. In the First Annual Report of the Chief Coroner it was stated that under the then current planning with the Ministry of Justice, the target of a reduction to about 80 coroner areas in total for England and Wales in the relatively short to medium term was realistic and that 75 was the longer term objective. That remains to be the case. The natural time to consider a merger is with the retirement of a senior coroner for an area and part of the audit carried out by the Chief Coroner this year has had this issue in mind. To date all mergers have been effected by agreement.
26. There are a number of advantages to mergers. Not only does it lead to areas of similar size throughout England & Wales, but it helps in achieving greater consistency of approach to issues.
27. Although no mergers have taken place in the course of this year, there are a number under consideration. Some of those will come into effect soon, such as Central Lincolnshire and South Lincolnshire. It is envisaged that a merger between Preston and West Lancashire, East Lancashire and Blackburn, Hyndburn and Ribble Valley will be implemented by the end of this year, subject to the formal consultation process. The possibility of a merger between Hartlepool and Teesside is under discussion.

Model Coroner Area

28. In June 2016 a draft of a blueprint 'A Model Coroner Area' was provided at Annex B. The latest version of this document is appended to this report.
29. The document sets out recommendations for the ideal coroner area. It describes the recommended size for coroner areas, the need for smaller jurisdictions to merge, the role of the senior coroner and the team of coroners, assisted by coroners' officers and administrative support staff. The document also outlines the work of coroners in investigations and inquests, in reports to prevent future deaths, timescales for referrals of deaths to the coroner, release of the body by the coroner, opening and completing inquests and the holding of pre-inquest review hearings. The document also deals with pathology services, 'out-of-hours' services, tendering for contracts, training and

discipline.

Statistics

30. The Chief Coroner is pleased to report to the Lord Chancellor further positive trends in a number of this year's statistics.

Cases over 12 months

31. The Chief Coroner has a statutory duty¹ to report to the Lord Chancellor on these cases. Set out in annexe C is a table by coroner area showing the numbers of cases over 12 months and the percentage those cases represent by reference to the number of cases reported to the coroner in that area. The table sets out the figures for each of the years 2014 through to 2017.
32. As can be seen from the table, following the introduction by the Chief Coroner in 2014 of a standard procedure for reporting on cases over 12 months, there has been a marked decrease in the numbers of cases outstanding. There has been a reduction from 2,673 cases first reported in 2014 to 1508 cases reported in 2017. This figure is approximately 0.5% of all deaths reported.
33. In 2014 seven coroner areas had over 100 cases over 12 months old and two had over 200 cases. In 2015 there was one area with over 100 cases over 12 months old. Save for the caveat in the next paragraph, there were no coroner areas with over 100 cases over 12 months old in 2016 and only one coroner area in 2017 reported 100 cases over 12 months.
34. There is one coroner area where no figure is given for 2017 and the figure provided for 2016 is subject to review: West London. The Acting Senior Coroner informed the Chief Coroner that he had caused a full audit to be undertaken of all cases on the books in October 2016. That audit is on going and the full position for 2016 and 2017 will be reported to the Chief Coroner as soon as it is available and that figure will then be reported to the Lord Chancellor.
35. The wording of the 2009 Act and the Coroners (Inquests) Rules 2013 reflects the concern of the public and Parliament that cases had not in the past been completed by coroners in a timely fashion. Rule 8 requires that a 'coroner must complete an inquest within six months of the date on which the coroner is made aware of the death, or as soon as reasonably practicable after that date.'
36. What amounts to 'reasonably practicable' depends on the particular facts and

¹ Sections 16 and 36, Coroners and Justice Act 2009.

circumstances of each case. There are often good and clear reasons why some cases are outstanding. For example, if there are ongoing police enquiries, criminal investigations and prosecutions, investigations overseas, Health and Safety Executive [HSE] or Prisons and Probation Ombudsman [PPO] inquiries, Independent Police Complaints Commission [IPCC] inquiries or investigations by one of the specialist accident investigation bodies, the coroner's inquest is put on 'hold' pending the outcome of those enquiries or investigations. In some cases, those other investigations are very lengthy. The net result can be that a coroner can only hold an inquest on a case after a period of two years or more. Homicide investigations by the police, manslaughter or health and safety investigations by the HSE and investigations by the IPCC or PPO will have a particular impact on the figures for cases over 12 months in those coroner areas covering the major cities of England and Wales where the majority of homicides take place and where the major prisons are located.

37. In some areas there has been a problem with coroner resources. In the period since 2014 the senior coroners in those areas have worked with their local authority to ensure that adequate resources are provided to ensure that cases can be dealt with as expeditiously as possible.
38. The Chief Coroner welcomes the reduction in the numbers of older cases. He is grateful to those senior coroners and local authorities who have made strenuous efforts to address issues around older cases, and to all coroners and local authorities for continuing to ensure that work is undertaken to address these cases.
39. There is more work to be done. In some areas additional resources are required so as to ensure that the number of cases over 12 months is just a handful of cases².

Average time to inquest; post-mortem rates

40. From the annual Ministry of Justice statistics³, there are several matters to note. The average time of all cases from death to inquest completed has fallen further to 18 weeks. The figure has reduced substantially over the last two years. The figure in 2014 was 28 weeks and so there has been a drop of 35.7%. The percentage of deaths in which coroners required post-mortem examinations is now at 36% of all deaths reported to coroners. This is a further reduction on previous years. By comparison the figure 10 years ago was 48%. 5 years ago it was 42%.
41. As with the last annual report, these further reductions are welcomed, but must come with a note of caution. These figures will to some extent have been affected by cases involving Deprivation of Liberty Safeguards (DoLS). There were 11,376 reported DoLS cases in 2016. In 2015 there were 7,183 and so an increase of 58%. As a post-mortem

² See Chief Coroner's A Model Coroner Area

³ Coroners Statistics Annual 2016, England and Wales (11 May 2017)

examination will rarely be required and the inquests should normally be completed within a week, the number of DoLS cases will have affected the national picture for both sets of statistics. Now that the definition of 'in state detention' has been amended⁴ with effect from 3 April 2017, it will be interesting to see the figures for both these measures next year.

Overall figures

42. The number of registered deaths in England and Wales has been relatively static over the last few years. It has been around 500,000. In 2016 the provisional figure for registered deaths is 524,723, a slight reduction on the figure of 529,655 for 2015. All deaths are registered with the local registrar of births and deaths in order to create a complete record of how people die. Most of these deaths are from natural causes, certified as such by a general practitioner or hospital doctor. But in every case where it is not clear that the death is from natural causes, it must be reported to the coroner.
43. 241,211 deaths were reported to coroners in 2016, the highest figure to date. This is an increase of 4,805 (2%) from 2015. This increase is almost certainly as a result of the numbers of deaths under a DoLS authorisation reported to coroners. Comparing the percentage of deaths reported to coroners over the last five years, it has been in the 45% to 47% bracket. The number of reported deaths that require a full investigation with an inquest is a small proportion of the overall numbers reported. Many cases reported to the coroner are signed off by the coroner after preliminary enquiries, with or without a post-mortem examination, as being deaths from natural causes. In these cases a formal investigation under the 2009 Act is not required and therefore there is no inquest.
44. The number of cases that require investigation and inquest in 2016 was 40,504. The figure had been reducing over a number of years, but in 2015 and again in 2016 the number has increased as a result of DoLS cases which accounted for over 11,300 inquests in 2016. The total number of inquests is still only 17% of all deaths reported to coroners. Removing the DoLS cases would reduce this figure to 29,128 or 12% of all deaths reported. Nevertheless, the number of hearings is very much higher than any other comparable jurisdiction internationally, and as the Chief Coroner recommends at paragraphs 167-172 below, they could be substantially reduced by a special procedure for non-contentious cases.
45. In 2016 there were 576 inquests held with juries. The number of jury inquests had shown a downward trend until 2013, but has then increased year on year since 2014. The number of jury inquests is approximately 1% of all inquests. The number for 2016 represents an increase of 119 compared to 2015. To some extent this increase mirrors the upward trend in the number of inquests and the upward trend in deaths

4 By section 178 of the Policing and Crime Act 2017

in state detention. There were 574 deaths in state detention (excluding DoLS) in 2016⁵. This represents an increase of 26% over 2015. Of the 574, many concerned deaths in prison or police custody under section 7 of the 2009 Act. Deaths in custody are of particular concern to coroners. Many coroners make reports to prevent future deaths from such cases.

Appointments

46. The appointments process for all coroners has been the subject of further work in the last year. The Chief Coroner recently completed a thorough audit of all coroner areas seeking information as to all coroners within a coroner area as well as details of the sitting pattern of all assistant coroners.
47. A questionnaire was sent to each senior coroner asking them to provide detail of individual coroners in each area, appointment dates, contact information and how many days each assistant coroner has sat in the last three years. Other important contact details for local authority managers were also sought.
48. A table setting out some of the results of the audit survey is to be found at Annexe C.
49. The audit had a number of aims. One aim was to provide a clearer pattern of the likely appointments to be made over the coming years. The audit should inform the potential merger issues with coroner areas as they key time to consider such a move is on the retirement of a senior coroner.
50. The Chief Coroner is keen to look into the possibility of regional recruitment of assistant coroners rather than each local authority running separate competitions to appoint, as well as developing a programme of workshops for those assistant coroners interested in seeking appointment as full-time coroners and those seeking appointment as assistant coroners. The Chief Coroner is keen to ensure that all appointments are made from the widest pool of the most meritorious applicants.
51. The appointments pack⁶ has been substantially revised in consultation with representatives of the Coroner's Society of England and Wales, the Ministry of Justice and with representatives of local authorities.
52. The Chief Coroner is closely involved with each appointment process. Although local authorities make all appointments, each appointment is subject to the consent

5 Deaths comprise 298 in prisons, 10 in police stations, 1 in immigration removal centres, 252 Mental Health Act detention cases, 1 in probation approved premises, 2 whilst on temporary release on licence for medical reasons, and 10 where released from custody within the last 7 days.

6 The pack comprises: step by step guide for local authorities on recruiting a coroner; template adverts for senior, area and assistant coroner; Chief Coroners guidance No.6; Guide to Judicial Conduct; Guide to Equality and Diversity; templates on recording sift scores and declarations.

of the Chief Coroner and the Lord Chancellor. The Chief Coroner takes the view that being involved in all the stages of the recruitment process - advertising a vacancy, considering the applications, and sift or proposed shortlist of candidates, the constitution of an interview panel and with presentations and questions for final interview - provides the best picture of the process.

53. For all senior coroner and area coroner appointments the Chief Coroner or one of his nominees will be present at the final interviewing stage. Although not voting in the process of selection, his presence (or that of a nominee) ensures that the Chief Coroner can see the process is open, complete and fair, and informs his report to the Lord Chancellor for the purpose of giving his consent.
54. All appointments are announced by the relevant local authority and appear in the Chief Coroner's newsletters. Appointments of senior and area coroners are also published on the judiciary website. The Chief Coroner also announces the retirements of senior coroners in his regular newsletter.
55. This year there have been 4 senior coroner appointments, 4 area coroner appointments and 20 assistant coroner appointments. As with previous years the majority of those appointed as assistant coroners, the entry point to judicial appointment in the coroner service, are women. The age range of those appointed is between 35 and 69.

Training

56. The Chief Coroner trains approximately 1,000 people in coroner work each year: 380 coroners and approximately 600 coroners' officers. This training, under the auspices of the Judicial College (which trains all judges and tribunal members), has been highly successful. Training is delivered through a combination of two-day residential courses, which are all compulsory. These include an induction course for newly appointed assistant coroners, continuation courses for all coroners and continuation courses for all coroners' officers as well as one day events. This year the annual continuation courses for coroners focus on disaster victim identification and preparedness for mass fatality incidents. The first continuation course has taken place and met with universal approval.
57. Last year the coroners' continuation courses concentrated on mental health issues in investigations and inquests. This year the annual continuation courses for coroners focus on disaster victim identification and preparedness for mass fatality incidents. The first and second (of five) continuation courses have taken place and met with universal approval.

58. Last year the coroners' officers training covered topics including sharing best practice generally, DoLS, deaths of children, mass fatalities, organ donation, the Human Tissue Authority and deaths abroad. This year the focus has been on a death through a heart attack where issues over hospital treatment occur.
59. The feedback from all the courses is positive and shows that the training has been well received, with high levels of achievement in learning outcomes, aims and usefulness. Great emphasis is placed on work in syndicates. Through discussion participants learn how best to tackle practical problems.
60. The training is devised by the Chief Coroner's Training Committee which is comprised of the Chief Coroner, those coroners who are course directors, representatives of the Judicial College, and officials from the Chief Coroner's office. They are all supported by two experienced coroners' officers.
61. The Chief Coroner has been most impressed with the quality of the work and the commitment of the course directors. All course directors are appointed following an open selection process at the Judicial College. There are currently 9 course directors. A number of new course directors will need to be appointed with effect from February 2019.
62. In addition to the annual residential courses, there have been a number of one-day training events in the course of the year. They include the Chief Coroner's annual conference for senior coroners and a day course on medical issues. This year the Chief Coroner's annual conference focussed on two key issues: ethical issues arising in investigations and inquests and leadership challenges. The event was held at Westminster Central Hall and was led by the Chief Coroner. A highly experienced barrister, David Etherington QC led the session on ethical issues and the Bishop of Ely, Stephen Conway spoke on leadership challenges from a different context before the coroners present were taken through a series of leadership challenges in syndicate workshops.
63. The first in a series of one-day course on medical issues took place in 2015-2016. The subject matter was the head and the brain. In 2016-2017 the course will focus on the heart. There will be a one-day training event for local authorities in October 2017 as well as two pilot workshops on appointments: one for those assistant and area coroner seeking appointment as a senior coroner and another for those seeking a first appointment as an assistant coroner. The first of these workshops will take place in October 2017. Demand has been strong and it is likely the workshops will be repeated later in the year and in early 2018.

Guidance and Advice

64. To support and add to the training, and with a view to increased consistency and enhanced national standards, the Chief Coroner continues to produce written guidance for coroners (and others), all of which is published on the judiciary website⁷. There are now 25 separate pieces of written guidance.
65. In the last 12 months the Chief Coroner has issued revised guidance on DoLS. Updated versions of earlier guidance and of the law sheets have also been issued and published. Guidance is being prepared on the issue of organ donation.
66. In addition to formal written and published guidance, the Chief Coroner has given advice to coroners (as a group and individually) on various topics.

The Chief Coroner has published a number of newsletters to update all coroners on a number of topics. Each newsletter sets out the meetings and events attended by the Chief Coroner, any new appointments made, news of any retirements of senior or area coroners as well as articles on new cases of interest.

Juror Notices

67. Professor Cheryl Thomas of University College London has undertaken research at the invitation of the Lord Chief Justice on the understanding of jurors as to the offences of misconduct and the warnings given in relation to potential misconduct offences whilst acting as a juror. The research follows a number of prosecutions of jurors in criminal trials for misconduct. The result of the research has been a pilot scheme in the crown court of a new Juror Notice. A document setting out the 'do's and don't's' in jury service has been provided to all serving jurors. Professor Thomas has adapted the notice for use in coroner's courts. Guidance will be provided along with the notices for use in all coroner's courts in England and Wales with effect from the end of July 2017. This will be accompanied by guidance on the need for notes from jurors in retirement to be in written form. A suggested template will be circulated with the guidance.

Memorandums of understanding

68. On 29 September 2016 the High Court gave judgment in the judicial review decision of *R (on the application of the Secretary of State) v. Senior Coroner for Norfolk and British Airline Pilots Association* [2016] EWHC 2279 (Admin). At the conclusion of the judgement the Lord Chief Justice stated: *".. It would also be desirable for the Chief*

7

<https://www.judiciary.gov.uk/related-offices-and-bodies/office-chief-coroner/guidance-law-sheets/>

Coroner to reconsider the terms of the MoU (memorandum of understanding) with the AAIB in the light of the judgments in this case and for the future be responsible for the guidance and arrangements contained within the MoU.”

69. Following that decision, the Chief Coroner has carried out a wide review encompassing all existing memoranda. This exercise has considered the wording of each document. As part of the review the Chief Coroner has liaised with the other agencies and with coroners. In due course each memoranda will be available through the judiciary website along with guidance.

Medical examiners

70. The Chief Coroner is of the view that the investigation of deaths in England and Wales will be greatly enhanced by the proper implementation of the Medical Examiner (ME) system as set out in the 2009 Act⁸. The ME scheme should supplement and complement the work of the coroner service. Working alongside coroners the ME scheme should provide a more comprehensive independent system of death investigation in England and Wales. It should mean more accurate medical certificates of the cause of death (MCCDs) and ensure more appropriate referrals of deaths to coroners. It should also produce more accurate data about the causes of death, particularly in hospitals.
71. The Government consultation entitled *Consultation on the introduction of medical examiners and reforms to death certification* in England and Wales closed on 15 June 2016. The first Chief Coroner’s response to the consultation was published on the judiciary website⁹. The Government’s response to the consultation process is still awaited. The first Chief Coroner welcomed the ME scheme. He expressed some reservations. These reservations focussed on the likely increase in the workload of coroners without the provision of additional resources. It is generally believed that the involvement of MEs will mean a significant increase in the number of cases referred to a coroner. These are likely to be cases that will proceed to an inquest and are likely to be more difficult and complex medical cases. Quite how great this increase will be, is unknown. The pilot schemes have not been complete. The pilot in Sheffield, by way of example, did not deal with community deaths. Despite that, since the pilot in Sheffield started, there has been an increase in inquest work of some 35%
72. The Chief Coroner hopes that a decision will be made soon about the implementation of a ME system. It is also hoped that the scheme will bring with it for the first time statutory criteria for referrals (see paragraphs 118-126 below) and will also lead to a reduction in the number of post-mortem examinations.

⁸ See Part 1 of the 2009 Act.

⁹ <https://www.judiciary.gov.uk/wp-content/uploads/2016/06/chief-coroner-cp-response-medical-examiners>

73. The Francis Report made a number of recommendations about coroners and inquests. The majority of the recommendations concerned the benefits of the introduction and application of MEs.
74. Training focused on the interaction between the MEs and the coroner will be essential if the system is to work as hoped. An early decision as to implementation will allow for that to be planned and delivered.

Service deaths

75. The Chief Coroner has a statutory responsibility¹⁰ for the monitoring of and training for investigations into deaths of service personnel on active service or in preparation for active service. The Chief Coroner requires senior coroners to notify him of all such investigations and to update him on their progress and the outcome.
76. In 2013 a special cadre of coroners was created to conduct such investigations if and when necessary and special training was arranged. Specific guidance on the use and function of the cadre was provided¹¹.
77. Since the withdrawal of many armed forces from Afghanistan there have been relatively few service deaths reported to the Chief Coroner under section 16 of the Coroners and Justice Act 2009.
78. Since July 2013 there have been 22 relevant service death inquests. The most recent concerned training and related activities. There is to be a second inquest into the death of Private Sean Benton at Deepcut Barracks with His Honour Peter Rook QC, a retired senior judge as coroner.

Reports to prevent future deaths

79. Coroners submit reports to prevent future deaths (PFD reports). Each report is an important statement by a coroner raising a concern arising out of an inquest on action that should be taken to prevent future deaths¹².
80. Between July 2016 and June 2017 there were 375 PFD reports issued by coroners. All reports are published by the Chief Coroner on the judiciary website (sometimes with redaction for data protection purposes). Through this route the reports are made public and accessible to all who may have an interest in them. Email alerts are available.

10 Section 17, 2009 Act.

11 Guidance No. 7: 'A cadre of coroners for service deaths.'

12 Paragraph 7, Schedule 5 to the 2009 Act.

81. For this annual report, some work has been done on analysing the reports by reference to the coroner areas submitting the reports and the themes within the reports. My office focused on a sample of ten of the PFD reports on deaths in prison in 2016-17 in order to identify any common themes. Whilst all PFD reports are different, because they deal with individual cases, the following themes could be identified as appearing in several reports issued concerning deaths in prison in 2016-17. These themes include:
- Evidence of a lack of awareness amongst some staff about procedures (for example on PFD Report highlighted the lack of awareness amongst staff of the different procedures in day and night working)
 - Lack of clarity amongst staff about how to trigger an emergency medical response
 - The inconsistent application of procedures (this is a common observation in reports; for example, in one report it referred to the inconsistent or incorrect application of established procedures for such as cell observation checks)
 - Failure to pass on information between agencies and within institutions
 - Issues around buildings and estate (such as exposed ligature points in cells)
 - Several reports also identified the need for extra or reinforced training for staff
82. The Chief Coroner encourages all coroners to write and submit PFD reports where appropriate.

Faith communities

83. The Chief Coroner continues to work with faith communities, particularly Muslim and Jewish, so as to try and comply with two main religious requirements: avoidance where possible of so-called invasive post-mortem examinations; and early burial.
84. The Chief Coroner attended a conference at the 'Gardens of Peace' Muslim Cemetery in Fairlop at the invitation of Mohamed Omer. It was an opportunity for the Chief Coroner to speak to over 100 representatives of the Muslim community in England and Wales about the role of a coroner and the Chief Coroner and to answer questions posed by those present about the process of an investigation, issues over the release of a body and the service provided by differing coroner areas. The Chief Coroner has been invited to meet representatives of the Muslim community in Wales and he intends to do so this autumn. The Chief Coroner is also due to meet with the Board of Deputies of British Jews in the coming months.

Post-mortem imaging

85. Post-mortem imaging by means of a CT scan as an alternative to more invasive post-mortem examination (autopsy) continues to develop but slowly. As the law stands, an autopsy is free of charge to the family and is paid for by the state. CT scanning is more expensive and there is no state funding for it at present. There are only a limited amount of post-mortem scanning facilities provided by the state although private companies have provided these services in some areas. Provision is geographically variable and in those parts of England and Wales where it is available, families usually have to pay for it. However more facilities are becoming available and the Chief Coroner encourages its availability and use.

Out of hours services

86. The time taken to release a body burial or cremation varies depending on the circumstances of the death. There is also some variation across coroner areas and this can be as a result of resources. However early release for burial or cremation, where possible, is the aim for all. This not only benefits faith communities, but is also of benefit to the public as a whole that bodies can be released for burial or cremation as early as possible. However it cannot always be achieved, especially in those situations where death occurs out of normal working hours.
87. In some coroner areas there are formalised out-of-hours services. In other areas there are informal services and in a few areas, there are no provisions in place at all.
88. For an out-of-hours service to operate fully, it requires not just for there to be a coroner on duty over weekends and public holidays, but also some resource from police and local authorities, as well as pathologists. For a system to work effectively there needs to be, for example, an effective rota of coroners' officers to take calls from the public or from funeral directors and to conduct any investigations on behalf of the coroner. The local registrar's office needs to be open for part of the weekend or public holiday and if there is a local public mortuary that may also need to be open. The coroners for an area (senior coroner, area coroner (if one is in post) and assistant coroners) should be paid for being on a rota to cover these periods. Different local authorities have different views about the funding of out-of-hours services.
89. In some parts of England and Wales, the demand for a more formal out-of-hours scheme has grown. The Chief Coroner wishes for there to be a scheme in place across all coroner areas. The extent and resource required needs to be the subject of agreement between the senior coroner and relevant local authority and police.

Second post-mortem examinations

90. Any post-mortem examination may cause distress to a family. Additional post-mortems add to that distress. Inevitably there will be some cases where there is no alternative other than a second full forensic post-mortem, but the Chief Coroner hopes that the numbers of second post-mortems can be reduced. They should only be carried out where there is a good and reasonable justification for them.
91. The first Chief Coroner proposed a scheme where control of decisions on second post-mortems where criminal charges are brought, would pass to a Crown Court judge. The essential elements to the proposal are:
- Comprehensive first post-mortem examination by forensic pathologist; fully recorded and documented
 - Right of a defendant to a desktop review of pathologist's findings and conclusions
 - Requests for further post-mortem examination to be decided by judge in Crown Court proceedings; guidance to be given to Crown Court judges
 - Where there are no criminal proceedings, coroner to review options with pathologist and police
 - Release of the body by the coroner as soon as possible
 - Bereaved families to be informed of the process at all stages
92. The Chief Coroner's proposal¹³ was the subject of consultation and discussion through to the end of July 2016. The next stage is to consult further with the senior judiciary and the Council of Circuit Judges and, if agreed to run a pilot scheme to assess the impact of the proposal in terms of the numbers of second post-mortems sought, decisions made and the resource implications on the Crown Court.

Treasure

93. As set out in the third annual report, Chapter 4 of Part 1 of the 2009 Act, which provides for the appointment of a Coroner for Treasure and other provisions on treasure investigations, has not been brought into force. The provisions on treasure finds in the Coroners Act 1988 therefore remain in force. The Chief Coroner has taken steps to modernise and simplify the arrangements for treasure investigations and inquests. Treasure: A Practical Guide for coroners which the Chief Coroner issued

13 *Second Post-Mortems* (2 March 2016).

on 12 November 2015 is a public document and can be read on the Chief Coroner's website:

<https://www.judiciary.gov.uk/related-offices-and-bodies/office-chief-coroner/guidance-law-sheets/advice-from-the-chief-coroner/>

We are still awaiting the review on the code of practice published under the **Treasure Act 1996** and the possible extension of the definition of treasure. The Department for Culture, Media and Sport (DCMS) is working with the British Museum and other stakeholders in preparation for this. 24 September 2017 marks the 20th Anniversary of the commencement of the Treasure Act. Since that date, over 13,000 discoveries have been reported to Coroners as potential Treasure under the Act. The British Museum has created a website (<http://blog.britishmuseum.org/treasure-20/>) listing all of the museums around the country that are displaying items of Treasure with the 'Treasure 20' logo.

International

94. The Chief Coroner continues to have oversight of the arrangements for major cases involving deaths overseas. Following major incidents the Chief Coroner liaises with coroners, the Foreign and Commonwealth Office (FCO), the Cabinet Office, the police and local authorities in order to ensure that the arrangements for repatriation of bodies to England and Wales and subsequent investigations are sound.
95. The Chief Coroner requested that the Lord Chief Justice nominate a judge for the inquests arising out of the deaths of 30 British holidaymakers in Sousse, Tunisia, in a terrorist attack on 27 June 2015. The inquest were conducted by His Honour Judge Nicholas Loraine-Smith and took place at the Royal Courts of Justice, London with the proceedings made available through various satellite courtrooms in England and Wales to enable families living a distance from London more fully to participate. The inquest concluded on Tuesday 28 February 2017 with conclusions of unlawful killing in relation to each death.
96. The Chief Coroner continues to have oversight of the arrangements made in Leicester City and South Leicestershire coroner area following the Malaysian Airlines Flight MH17 disaster over Ukraine in July 2014, and the arrangements in the Kingston-upon-Hull and East Riding coroner area following the Lufthansa Germanwings Flight 4U9525 in the French Alps in March 2015.
97. In disaster cases a co-ordinated strategy is followed. The Chief Coroner works with a cadre of disaster victim identification coroners, the FCO and the police, whilst having in the forefront of any arrangements the wishes of the families who have lost loved

ones. In all of the cases so far, each Senior Coroner has provided the families with written advice about the details of the coroner process.

Nomination of judge to conduct an investigation

98. The Chief Coroner has a power to request the Lord Chief Justice to nominate a judge to conduct an investigation into a person's death¹⁴. The Lord Chief Justice must consult the Lord Chancellor before making a nomination. This year the Chief Coroner has made four such requests for a nomination. In each case a judge has been nominated by the Lord Chief Justice and in each case the Lord Chief Justice has consulted the Lord Chancellor before making the nomination. The cases and the judges are set out below.

- His Honour Sir Peter Thornton QC (the first Chief Coroner and a retired Senior Circuit Judge) was nominated to conduct the resumed investigations (including inquests) into the deaths of 21 people killed by bombs which exploded on 21 November 1974 in two public houses near New Street station in Birmingham.
- The Recorder of London, His Honour Judge Nicholas Hilliard QC was nominated to conduct the investigation (including an inquest) into the death of Alexander Perepilichnyy who died in Surrey on 10 November 2012.
- His Honour Peter Rook QC (a retired Senior Circuit Judge) was nominated to conduct the investigation (including an inquest) into the death of Private Sean Benton who died at Deepcut Barracks, Surrey on 9 June 1995. There was an earlier inquest and the High Court ordered a fresh inquest on 14 October 2016.
- Dame Linda Dobbs (a retired High Court Judge) was nominated to conduct the resumed investigation (including an inquest) into the death of Ellie Butler who died on 28 October 2013.

99. The Chief Coroner liaises closely with the judges nominated to deal with these cases.

Recent events

100. In the period between 22 March 2017 and the final preparation of this Annual Report there have been a number of events that have resulted in mass fatalities. Westminster Bridge, the Manchester Arena, London Bridge and Borough Market were the subject of terrorist activity with the loss of many lives and numerous serious injuries. On 14 June fire broke out at Grenfell Tower. The fire developed and engulfed the tower. The

14 Paragraph 3, Schedule 10 to the 2009 Act.

final number of fatalities will not be known for some time. The investigation at the scene is on-going and is likely to last some considerable time. Each of these horrific incidents has led to the extensive involvement of the coroner service and of the local senior coroner.

101. When a mass fatality incident occurs, depending on where and how it takes place, the senior coroner with responsibility for the area will be notified by the police and will be involved in the process of the identification of the victims. The coroner will be part of the response along with the emergency services.
102. The identification of those killed (and those injured) in any incident – whether it be a terrorist incident, a suspected terrorist incident, or a fire in a tower block – can be a lengthy process. The site where the incident takes place may not be safe and where terrorist activity is the cause, there may be a live investigation to ensure there are no other devices. In other incidents the scene may well be a crime scene and the police will need to have an eye on securing evidence for any prosecution that may ensue. If the incident is an explosion or a fire it may have caused substantial damage to the fabric of the building where it has taken place as well as causing substantial disruption to the bodies of those killed.
103. The coroner and all others involved in the safe removal of bodies from a scene work to internationally agreed standards of identification.
104. Events worldwide have shown that it is important to deal with the process of identification in a clear and methodical way to make sure that the correct identifications are made. Where a plane crashes on to open land the plane manifest will provide an accurate list of those on the plane and will be a key feature of the identification of those involved. A bomb explosion in a public space or a fire in a tower block poses many questions. There is unlikely to be any fully comprehensive manifest or list of those present. The formal identification process seeks to reconcile ante-mortem and post-mortem elements to ensure accurate identification. Where available fingerprint records, dental records and other similar records are compared to the body that has been found. The coroner and others engaged in the aftermath of events work as quickly as the conditions allow to formally identify those involved. There can be nothing worse than confirming to the family or friends of someone that their friend or family member has died only for that to be proved wrong. Once identification of a body is confirmed to the satisfaction of the coroner through trained family liaison officers (FLOs) there will be discussions with families as to the next stages.
105. The Chief Coroner has worked closely with each of the senior coroners in the coroner areas where these incidents have taken place. Two of the incidents have taken place in one area – London (inner West). Dr. Fiona Wilcox is a very experienced senior

coroner. The Grenfell Tower fire continues to be her focus of attention. The Chief Coroner has appointed additional assistant coroners to that area to assist with the other cases that need to be covered. Nigel Meadows is the Senior Coroner for Manchester City. He worked on the Manchester Arena incident along with two of his neighbouring senior coroners – Prof. Jennifer Leeming (Senior Coroner, Manchester West) and Joanne Kearsley (Senior Coroner, Manchester North). Dr Andrew Harris is the Senior Coroner for Inner South London. He was the coroner for the London Bridge and Borough Market incidents. The Chief Coroner received regular updates from each as the incidents developed and monitored the coroner response.

106. As set out in this annual report the training programme for all coroners in 2017 to 2018 has as its focus mass fatalities, and any lessons learned from the coroner response to these incidents is being added to the training programme.

Northern Ireland and Scotland

107. Northern Ireland has a separate coroner service which is outside the Chief Coroner's jurisdiction. Scotland has no coroner service.
108. The Chief Coroner and his office maintain close links with both the Coroners Service for Northern Ireland and the Lord Advocate and Crown Office and Procurator Fiscal Service in Scotland. There are regular meetings to discuss subjects of mutual interest.

Stakeholders

109. The Chief Coroner continues to meet regularly with a wide range of relevant stakeholders. The Chief Coroner meets with coroners of all ranks, coroners' officers, Ministers (at the Ministry of Justice, Department of Health and Ministry of Defence), senior judges, local authorities, senior police officers, registrars of births and deaths, pathologists, toxicologists, funeral directors (through the national associations), lawyers, the Director of Public Prosecutions, bereaved family members, the Coroners' Court Support Service, bereavement organisations and charities.
110. Over the last year, among the many meetings, he has met with senior members of the Coroners' Society of England and Wales on a wide range of topics including the reforms to appointments, appraisals and mentoring, with the Chief Inspector of Prisons Peter Clarke on deaths in prisons and detention, with representatives of the Air Accident investigation Branch, the Marine Accident Investigation Branch and the Rail Accident Investigations Branch on reformulating memoranda of understanding in those cases where they and coroners have roles, with the Royal College of Pathologists and others on the deaths of children including SIDS (sudden infant death syndrome)

and SUDI (sudden unexpected deaths in infancy) and pathology issues generally, with His Honour Judge Nicholas Loraine-Smith who conducted the investigation and inquest in relation to the Sousse deaths, with Government departments about intelligence and intercept material, with the FCO about deaths overseas, with the Home Office and others about forensic pathologists, with a number of representatives of the NHS on issues surrounding coroner investigations and inquests, with the Office of National Statistics over the ways in which coroners record inquest findings, with the Chair of the House of Commons Health Select Committee on suicide conclusions in inquests and pathology services, with representatives of the Coroners' Courts Support Service on generating greater financial support for their work and expanding the service across all of England and Wales, and with various charities and other groups such as RoadPeace and the Campaign for safer births.

111. The Chief Coroner has continued to complete an extensive schedule of speaking engagements. He has spoken at senior coroner continuation seminars and at coroner officer training. He has attended and spoken at a number of events including the Muslim Burial Conference, the National Association of Funeral Directors and at the annual Inquest seminar. He has also been a guest speaker at various law firms in England and Wales including No.5 Chambers in Birmingham.
112. The Chief Coroner is deeply indebted to the work and support of all his team in the Chief Coroner's office. The team is ably led by James Parker (Head of the Chief Coroner's Office). The Chief Coroner values the support and assistance he has received throughout the year from James as well as from Brenda Jones (Deputy Head of the Chief Coroner's Office), Gary McKenzie (Assistant Private Secretary, Chief Coroner's Office) and Amy Jabbal (Assistant Private Secretary, Chief Coroner's Office).
113. In the course of the year there were a number of personnel changes within the Chief Coroner's office. Elena Borisova, (Chief Coroner's Legal Advisor) left to take up an appointment elsewhere in the Civil Service and Sarah Murrell (Assistant Private Secretary, Chief Coroner's Office) left to take up promotion within the Ministry of Justice. Both were valued members of the team and their contribution is greatly missed.
114. Eve Naftalin joins the Chief Coroner's office as the Legal Adviser with effect from 3 July 2017.
115. The Chief Coroner also wishes to express his sincere thanks for the regular working cooperation from those in the Ministry of Justice part of the Coroners, Burials, Cremations and Inquiry Policy Team in the Ministry of Justice led by Judith Bernstein and Glenn Palmer, the team at the Judicial College led by Sheridan Greenland, the officers and members of the Coroners' Society of England and Wales, representatives from Local Government, the police and others, as well as all coroners and coroners' officers.

116. The Chief Coroner wishes to express his particular thanks to those coroners who have assisted with devising and delivering training, those who have been consulted throughout the year on draft guidance and on outline plans and other aspects of the Chief Coroner's work. The Chief Coroner is deeply indebted to them all.

Issues of concern

117. As with previous years, there are a number of issues affecting the coroner service that remain unresolved. The Chief Coroner repeats a number of the issues from previous years' reports that remain to be considered. They are each important and deserve consideration. Some may require statutory change.

(i) Reporting deaths to the coroner

118. In the third Annual Report concern was expressed as to the lack of statutory or other clear criteria for medical practitioners reporting deaths to coroners. This has created uncertainty and inconsistency. When should a doctor report a death to a coroner? The answer to this question is not definite.
119. More than 241,000 deaths were reported to coroners in England and Wales in 2016. The vast majority of them were reported (referred) to coroners by GPs and hospital doctors. Any yet there are no statutory criteria for doctors on when to report a case to the coroner.
120. The notes for doctors attached to the Medical Certificate of Cause of Death state, under the heading *When to Refer to the Coroner*: 'There is no statutory duty to report any death to a coroner.' The notes, therefore, do no more than encourage doctors to adopt the criteria for registrars and report any death which should be referred to the coroner by the registrar of births and deaths.
121. But this is no requirement or instruction. Doctors are not bound by it. There is, therefore, a lacuna in the law. Doctors need clear statutory guidance for reporting deaths to a coroner¹⁵. It would be provide a clear framework for referrals to coroners and it would form the basis for better education and training for doctors and regular discussion with the local coroners about when a death should be reported. Doctors would develop greater confidence and accuracy about death certification, registration and referrals.

122. At the same time statutory criteria would also guide local coroners. It would preclude

15 Francis Report, Recommendation 277.

them from promoting their own policies for reporting deaths locally. At present there is inconsistency of practice among senior coroners. Some, for example, request doctors to report all still births and all child deaths. There is no legal basis for this approach and a neighbouring coroner area may have no such policy. This is confusing for doctors who travel and work in different parts of the country.

123. It is therefore a matter for Parliament in regulations to decide what types of death should be referred. Some other countries provide detailed criteria for reporting, for example in the New Zealand Coroners Act 2006 and the State of Victoria Coroners Act 2008 in Australia.
124. In England and Wales Parliament has envisaged that the Lord Chancellor could make regulations 'requiring a registered medical practitioner, in prescribed cases or circumstances, to notify a senior coroner of a death of which the practitioner is aware'¹⁶. As stated in the third Annual Report this task should be completed as a matter of urgency.
125. There are two possible routes for this. If the ME scheme is implemented, draft Death Certification Regulations are ready to be brought into force. Alternatively, free-standing regulations should provide the necessary criteria.
126. Once implemented, doctors should make referrals to coroners electronically, not orally as is often done at present, by email or other means, such as a web-based solution. The Chief Coroner is continuing to work on a recommended standard reporting form.

(ii) Pathology services

127. There remains considerable concern amongst coroners about the ever dwindling availability of pathologists to carry out post-mortem examinations at the request of coroners.
128. Section 14 of the 2009 Act permits a coroner to request a post-mortem examination (autopsy), either before or during an investigation into a death which has been reported to the coroner. Each request is a judicial decision made at the discretion of the coroner.
129. The vast majority of these autopsies are carried out by histopathologists (coroner's pathologists)¹⁷. Most of them are employed by health trusts or boards to carry out other pathology work (often on the living). The work for coroners is not usually conducted under their formal contracts or job plans, but independently. Their work for coroners often takes place outside their normal working hours. Arrangements vary across areas.

¹⁶ Section 18 (not yet in force) of the 2009 Act.

¹⁷ In a small number of cases, autopsies are carried out by forensic pathologists who are accredited by the Home Office and employed in private practice.

130. In a small number of cases, mostly suspected homicide cases, autopsies are carried out by forensic pathologists who are accredited by the Home Office and employed in private practice. In those cases their fee is paid by the police but they also act at the request of the coroner.
131. Approximately 86,000 autopsies were ordered and conducted this way in 2016. Unfortunately, despite that significant number of autopsies, the number of histopathologists available to carry out this work for coroners is decreasing. As a result, local pathology services are stretched and coroners are forced to delay releasing the body to a family for burial or cremation. Coroners and medical examiners around the world release bodies within a timescale of approximately 24 hours. In England and Wales many coroners continue to struggle to achieve a three day timescale. In routine cases delays in excess of three days is not acceptable.
132. As set out in last year's annual report the provision of pathology services to coroners was described by a senior pathologist as 'an already hard-pressed service on the edge of a complete meltdown'. In his Review of forensic pathology in England and Wales (March 2015)¹⁸, Professor Peter Hutton described the immediate future of forensic and non-forensic pathology services as 'fragile, and corrective action needs to be taken now'. A survey referred to in last year's Annual Report showed that of 463 consultant pathologists who conduct autopsies 26% intend to give up coroner autopsy work in the near future. Most cited 'poor remuneration' as the reason for doing so. The standard statutory fee for an autopsy, set by central Government but paid by local government, has remained static for ten or more years at the rate of £96.80 per body
133. For these reasons many coroners in different parts of the country continue to struggle to obtain regular services of pathologists, which in turn causes delay.
134. There is a lack of control and oversight over the provision of this service. Most pathologists who do this work have to make themselves available out of hours of their day jobs. This work is not part of their hospital trust contracts or job plans but extra work carried on outside normal working hours. Anecdotally we hear reports that this lack of support from their employers discourages pathologists from taking on this vitally important public service coroner work.
135. No government department wishes to take responsibility for this service. The Department of Health (DH) and the NHS do not consider that they have responsibility for pathologists in this work. The Home Office will, at present, only take responsibility for forensic pathologists.
136. The Chief Coroner repeats his belief that action is required in both the short term and the longer term. For the longer term he repeats the proposal that pathology services for coroners are organised regionally. Some 12 to 15 regional centres of excellence

18 <https://www.gov.uk/government/publications/review-of-forensic-pathology-in-england-and-wales>

should be created, providing mortuary, post-mortem examination and post-mortem imaging (CT scanning) facilities.

137. The proposal is that each centre would be funded through local authorities and the NHS both in England and Wales. Forensic pathologists and other pathologists would be employed by the NHS at these centres. A forensic pathologist would lead the team¹⁹. The employment of pathologists by the NHS to carry out coroner work would recognise that death investigation, for the benefit of the living, should be part of the NHS's core business. In the short term this would cost money. In the longer term substantial savings would be made, including the closure of small out of date local authority mortuaries which are expensive to maintain and even more expensive to replace.
138. The regional centre would have an on-duty pathologist at all times. The centre would operate a triage system. The centre would receive the body into the mortuary and (i) the pathologist would make an external examination of the body followed by imaging. (ii) The coroner's officer would receive the report of the death from the GP or hospital doctor and carry out any relevant initial inquiries including speaking to the family, especially asking if they have any concerns about the circumstances of the death. (iii) The coroner would receive information from stages (i) and (ii), discuss the pathologist's preliminary findings with the pathologist and decide whether a post-mortem examination was necessary and what further action should be taken, if any, before releasing the body to the family.
139. Under this scheme, or a variant of it, pathologists would be expected to provide a report, either preliminary or full, to the coroner within three days of the examination or earlier where possible. Training for all pathologists could be re-ordered and rationalised. The autopsy module provided by the Royal College of Pathologists would no longer be optional. It would become mandatory for all trainee pathologists, as it was before. Under this proposal further training for all pathologists should be provided by NHS England and Wales with additional skills training from the Home Office. All pathologists would need to be on a specialist register with their level of expertise identified.
140. The Chief Coroner's proposal suggests that regional centres could in the first instance be a mixture of units developed by local authorities (and independent of NHS trusts) or units based on premises on NHS England or Wales. Ideally they would be a combined NHS and local authority resource, funded by both. Small local authority mortuaries which are out-dated would in time be closed. At present there are too many smaller mortuaries.

141. Short-term solutions are much more difficult. In the absence of any Government

19 See Chief Coroner's *A Proposal for Coroner Pathology Services* (22 February 2016).

action, the Chief Coroner continues to encourage coroners and their local authorities to nurture and support existing arrangements as best they can. That is unlikely to be enough. In the short to medium-term at least, imaging facilities are likely to develop through the private sector, and, as is current practice, although not desirable, at a cost to the families (within the range of £400 to £1,000). In due course the NHS should provide post-mortem imaging for all cases. In many cases imaging will be able to replace more invasive post-mortems.

142. In the short term the NHS could make autopsy work by pathologists part of the working contract for separate fees. Learning lessons from death should once more become an integrated part of learning about life
143. As a result of the shortage of coroner's pathologists many coroners are facing delays in releasing bodies and taking cases to inquests. Although pathologists' reports should be provided to the coroner within three to four weeks, the dwindling numbers willing to do the work prevents this from happening. This needs to change.

(iii) Medical Examiners

144. As set out in the last Annual Report and restated at paragraphs 71 to 75 above, the introduction of the Medical Examiner (ME) system is welcomed. However, the Chief Coroner has some concerns about the impact on the coroner service over implementation. The concerns were set out in the response of the first Chief Coroner on 15 June 2016 to the Department of Health consultation exercise. The second Chief Coroner shares those concerns.
145. The primary concern of the Chief Coroner is over the likely increase in the workload of coroners without any additional resources. It is generally believed that the involvement of MEs will produce a significant increase in the number of cases referred to the coroner. These are cases that are likely to proceed to inquest and are likely to be the more difficult and more complex medical cases. The scale of the increase is uncertain.
146. Many coroner areas have been neglected for years in the provision of resources. They have a very modest number of coroners' officers to investigate and prepare cases for the coroner and very few administrative staff to support them. Local authorities are currently seeking to reduce their spending, as too are police authorities who employ most coroners' officers. Some are reluctant to send their coroners' officers to training as the cost of doing so is not regarded as 'essential' spending.
147. The Chief Coroner has concerns about the costs of the ME service and how costs will be met. The ME scheme is a vital part of the death investigation reforms of the 2009

Act and the resource implications need to be carefully considered.

148. The concerns about resources and impact are in addition to some basic concerns about payment for the ME scheme. Who will pay for the service? How much will they pay? Who will collect the payment? What will happen in the event of default of payment?
149. It seems clear that bereaved families will be burdened with this payment even if they have not obviously benefitted from the scheme. The suggested DH figure of £80 to £100 is not considered to be sufficient. Local authorities that spoke to the first Chief Coroner struggled to arrive at a projected minimum figure of £150. Funeral directors seem reluctant to collect payment off bereaved families in mourning. In default of payment local authorities will probably have to foot the bill.
150. Other concerns centre around the independence and quality of MEs. Will they be, and be seen to be, sufficiently independent of those they are scrutinising?²⁰ If they are (or were) hospital doctors, will they be sufficiently independent of their present and former colleagues and of hospital trusts in England and health boards in Wales? It is fundamental to the essence of the ME scheme that they must be independent in their appointment and in the execution of their functions.
151. Will they be of sufficient quality? Are there enough doctors or recently retired doctors at consultant level to provide this service?²¹ Will they be sufficiently accredited in this specialist field?
152. There is also a concern about possible delays. Increased coroner workloads without extra resources may lead to delays, both in releasing bodies and in concluding inquests. The ME service could also add delay by introducing an extra layer of investigation. And if MEs are part-time appointments will they be sufficiently available for early release of a body for burial or cremation? This issue is particularly acute for faith communities who want very early burial. Will MEs be available to make relevant decisions out-of-hours, at weekends and on bank holidays?
153. These are important considerations. A public service of death investigation which is not understood and valued by the public, particularly those required to pay, and where a lack of planned resources could lead to delays in releasing bodies and completing inquests, will not flourish. If local authorities have to meet increasing costs, coroners' services may suffer. The Chief Coroner restates the suggestion that there must be a clear resolution of these issues before the full implementation of the ME scheme.

20 Francis Report, Recommendation 275.

21 Francis Report, Recommendation 276.

154. The first Chief Coroner proposed in his response to the consultation exercise one possible way forward for the time being: to introduce in advance of full implementation further pilot schemes which are fully operational. At present none of the pilot schemes covers all deaths in the community. None of the pilots operates on a payment and collection of fee basis. The financial side has simply not been tested. One way forward suggested is to develop three fully pledged pilots in three different types of area: urban, rural and mixed.

(iv) Salaries and fees of coroners.

155. The Chief Coroner has no statutory responsibility for the payment or level of payment to coroners. As was stated in last year's annual report in order to promote greater consistency and transparency there should be a fresh approach to the payment of salaries and fees to coroners.

156. The Chief Coroner is aware that there have been discussions between representatives of the Coroners Society of England and Wales and local authorities and the Local Government Association on salary levels. The Chief Coroner hopes those discussions will result in a more unified approach to salary levels.

157. The Chief Coroner is aware that the level of fees paid to assistant coroners varies across areas. Some local authorities will pay a fee when an assistant coroner attends training – some do not. There ought to be payment to all assistant coroners to attend training. Some local authorities will reimburse travel costs to attend training, some will not. Training is compulsory and no assistant coroner should be 'out of pocket' when attending training.

Recommended law changes

158. The Chief Coroner recommends that consideration should be given to a number of changes in the law. The following recommendations were also proposed in the Chief Coroner's second annual report [2014-2015] and in last year's annual report: items (1), (2) (4) and (5). Items (3) and (6) also appeared in last year's report.

Item (1): Mergers of coroner areas

159. Under the law at present, each coroner area is to consist of the area of a local authority or the combined areas of two or more local authorities. Two coroner areas may not be merged into one area if that area will consist in total of less than the area of a local authority: paragraph 1(2) of Schedule 2 to the 2009 Act.

160. This has caused difficulties. For example, Kent consists of four separate coroner areas. Kent County Council, with the approval of the Chief Coroner, wishes all four areas to be combined into one coroner area, coterminous with the area of Kent County Council and Kent Police Authority. Kent would have liked to achieve this piecemeal, merging one area with another as and when a senior coroner from one of the coroner areas retires. But that is not possible under Schedule 2 of the 2009 Act in its present form. Hampshire County Council is in a similar position.
161. The provision therefore needs minor revision so as to provide greater flexibility. Whether the present position was intentional or not is not clear. It may have been oversight in the statutory drafting.
162. It is proposed that Schedule 2 be amended to permit two coroner areas to combine, by order of the Lord Chancellor, into one coroner area which consists of the area of a local authority or part of the area of the local authority. It is proposed that paragraph 1(2) of Schedule 2 to the Coroners and Justice Act 2009 be amended by the insertion of the words underlined so as to read as follows:

(2) Each coroner area is to consist of the area or part of the area of a local authority or the combined areas or parts of the area of two or more local authorities.

Item (2): Discontinuance without a post-mortem examination

163. Section 4 of the 2009 Act makes provision for the discontinuance of a coroner investigation, but only where the cause of death is revealed by a post-mortem examination. This was a new provision, not previously available to coroners.
164. In practice it allows a coroner who has commenced an investigation into a death under section 1 of the 2009 Act to bring the investigation to an end without having to hold an inquest. However, the coroner can only do so if the cause of death has been revealed by a post-mortem examination. In all other circumstances, once an investigation has been commenced, the coroner has no power to discontinue it; there must be an inquest²².
165. The effect of this provision is that even if the coroner discovers the cause of death by means other than by a post-mortem examination, for example through medical records that become available at a later stage, the coroner must nevertheless proceed to inquest even though the outcome may be a foregone conclusion. This is an unnecessary step. It is time consuming, may be costly and adds to the distress of a bereaved family.

22 Section 6, 2009 Act.

166. The solution is to amend section 4 of the 2009 Act so as to broaden the circumstances in which an investigation can be discontinued. It is proposed that the section be amended by the insertion of the words underlined so as to read:

Discontinuance where cause of death by post-mortem examination or other inquiry.

4.(1) A senior coroner who is responsible for conducting an investigation under this Part into a person's death must discontinue the investigation if-

(a) an examination under section 14 or other inquiry reveals the cause of death before the coroner has begun holding an inquest into the death, and

(b) the coroner thinks that it is not necessary to continue the investigation.

Item (3): Inquests without a hearing

167. There is no need for all inquests to be concluded with a hearing. In a case where the facts are not contentious, no witness are required to attend, the outcome is clear (at least on the balance of probabilities), the family do not want an inquest and there is no other public interest for conducting an inquest in a public hearing, the case could be concluded by a decision 'on the papers' with a written ruling.
168. A written ruling would have the advantage that it is a clear (and brief) decision with reasons, based upon the circumstances of the death, with findings of fact and a conclusion (short-form or narrative). This ruling could be handed down in open court and provided to the family for them to keep.
169. Such a ruling would be more focused than an *ex tempore* decision and more permanent. In some cases it need be no more than the completed Record of Inquest. In others, a page or two will usually suffice. There would be no need for an inquest, thereby saving court time, coroner time and other resources. Families would not need to attend court.
170. Rulings of this type are common in other jurisdictions – for example, in Australia, and work well. Families appreciate the process and welcome receiving a copy of the ruling. With the increasing use of digital technology across the mainstream Courts and Tribunals estate in England and Wales, there are fewer hearings in court, and this will lead in due course, in straightforward cases to inquests being concluded with the need for a hearing. Clearly, where an inquest must be held with a hearing or where there is a clear public interest in holding an inquest with a hearing, then a hearing will be held.

171. In most cases where there is no hearing, the public nature of the coroner's investigation and conclusion can be recognised by publication of the ruling, sometimes in a redacted form, or publication of the Record of Inquest (which is a public document²³).
172. The Chief Coroner therefore proposes the following amendment to the 2009 Act by the addition of a new section 6A:

6A Inquest without a hearing

- (1) *An inquest into a death must be conducted with a hearing, unless subsection (2) applies.*
- (2) *An inquest into a death shall be held without a hearing, if the senior coroner is of the opinion that –*
- (a) *the details required for the Record of Inquest are complete and not disputed,*
 - (b) *no interested person reasonably requires a hearing, and*
 - (c) *there is no public interest which requires a hearing.*

Item (4): Fresh Inquests

173. The first Chief Coroner previously recommended, and a previous Secretary of State for Justice agreed in principle²⁴, that there should be a change in the law by way of amendment to section 13 of the Coroners Act 1988 (as amended) in order to give the High Court greater flexibility when it quashes an inquest.
174. Section 13 allows the High Court, on an application brought with the permission of the Attorney General, to quash an inquest and order a fresh one where it is necessary or desirable in the interests of justice to do so, for example by reason of irregularity of proceedings, insufficiency of inquiry or the submission of fresh evidence.
175. At the moment the High Court's powers are limited to quashing an inquest and ordering a fresh one, as for example in the case of the Hillsborough inquests. Some section 13 cases could be sufficiently concluded without ordering a fresh inquest. In some cases it would be necessary only to amend the record of the inquest. The case of *Roberts v. Coroner for North and West Cumbria* [2013] EWHC 925 (Admin) is a good example. The outcome of the inquest recorded the deceased as a person unknown. Ten years later advances in DNA testing identified the deceased. A simple alteration of the record by the High Court from person unknown to the named person would have been sufficient, but under the law as it stands a fresh inquest has to be ordered. That involves extra time and expense, and above all, may cause extra

23 See Chief Coroner's Guidance No. 17 *Conclusions: Short-Form and Narrative*, at paragraph 12.

24 By the then Lord Chancellor, the Rt. Hon. Chris Grayling MP, in December 2013.

distress to the family.

176. Applications for the exercise of the power in section 13 are still relatively common. Despite the repeal of many sections of the Coroners Act 1988, Parliament retained the section 13 provision. The power has been in existence since 1887 and continues to be a useful provision. However, the powers of the High Court seem to be unduly restricted in the way described.
177. In many cases there will undoubtedly need to be a fresh inquest and the final decision will rightly be left to be made at that inquest and not by the High Court, as for example in the Hillsborough case. In other cases there will be no such need. The amendment proposed would mean that the High Court would not automatically be required to order a fresh inquest. The amendment proposed is by the addition of a new section 13A:

13A Where by virtue of the discovery of new facts or evidence or otherwise the High Court is satisfied that it is neither necessary nor desirable in the interests of justice that a fresh investigation or inquest should be held into the death, the High Court may direct that the particulars of the Record of the Inquest (Form 2, Schedule, Coroners (Inquests) Rules 2013) be amended as appropriate.

Item (5): Deaths at sea (body not recovered)

178. The Chief Coroner recommends that deaths at sea may be investigated by the coroner in the absence of a body, even if the death may not have occurred 'in or near the coroner's area'. As the law currently stands a death has to be 'in or near the coroner's area' for the coroner to request the Chief Coroner to direct the coroner to investigate: section 1(4)(a) of the 2009 Act. The effect of this is that if the death is beyond the reach of the coastal coroner's jurisdiction because it was not 'near' to the land, there can be no investigation or inquest.
179. In the last year the Chief Coroner has been sent 6 requests in circumstances such as this.
180. The Chief Coroner proposes that it would be preferable to adopt the approach as set out in section 6 of the Coroners Act 2009 No. 41 of New South Wales where the coroner may investigate if a death or suspected death occurred outside the State but had 'a sufficient connection with the State'.
181. Applying this kind of test to deaths at sea which are not 'near' the land of the coroner's area but are further out to sea, the coroner would be permitted to investigate the death if the deceased (or presumed deceased) had sufficient

connection to the land. Taking an actual example, a retired man regularly set out to sea to fish alone on his boat. One day the boat was found with the engine on, drifting several miles out, with no sign of the man. His death was presumed after and extensive maritime investigation. It occurred too far out from the land to be 'near' the coroners' area, but he had sufficient connection' with the land because he was resident there and/or he set out to sea from his usual mooring on the land.

182. Section 1(4)(a) could therefore be amended by adding to the words 'in or near the coroner's area' words such as 'or with a close connection to the coroner's area', as follows:

1 ...

(3) *A senior coroner who has reason to believe that-*

(4) *(a) a death has occurred in or near the coroner's area or with a close connection to the coroner's area,*

Item (6): Representation for families

183. In a small number of inquests the family of the deceased wish to have representation but do not have the means to provide it themselves and are unable to obtain legal aid funding. This often arises in situations where individuals or agencies of the state have state funding for representation as 'interested persons'²⁵. In some cases one or more of the agencies present such as the police, the prison service or ambulance service, may be separately represented. In some of these cases individual agents of the state such as named police officers may also be separately represented. While all of these individuals or agencies may be legally represented with funding from the state, the state may provide no funding for representation for the family.

184. Many less complex and less contentious inquests are conducted entirely satisfactorily in the absence of any legal representation for interested persons, including some cases involving the state. But in some cases the inequality of arms may be unfair or may appear to be unfair to the family. It may also mean that the coroner has to give special assistance to the family which may itself give the appearance of being unfair to others.

185. The Chief Coroner therefore recommends that the Lord Chancellor gives consideration to amending the Exceptional Funding Guidance (Inquests)²⁶ so as to provide exceptional funding for legal representation for the family where the state has agreed to provide separate representation for one or more interested persons.

25 For the meaning of 'interested person', see section 47 of the 2009 Act.

26 Published August 2015.

Statutory powers and duties

186. Set out below is a summary of the Chief Coroner's powers and duties under the 2009 Act and the 2013 Coroners Rules and Regulations and the actions taken by the Chief Coroner since 1 July 2016.
187. Where a senior coroner exercises his or her discretion to report to the Chief Coroner under section 1(4) of the 2009 Act that he has reason to believe that a death has occurred in or near the coroner's area, that the circumstances of the death are such that there should be an investigation into it, and the duty to conduct an investigation does not arise because of the destruction, loss or absence of the body, the Chief Coroner may direct a senior coroner to conduct an investigation into the death (section 1(5)). Since 1 July 2016 there have been 47 applications and the Chief Coroner has granted 39 of them.
188. The Chief Coroner must be given notice in writing of any request made by a senior coroner for an investigation to be carried out by another coroner including the outcome of the request (section 2(5)). In the last year the Chief Coroner has received 965 notifications.
189. The Chief Coroner also has a discretionary power to direct a coroner to conduct an investigation into a person's death even though, apart from the direction, a different coroner would be under a duty to conduct it (section 3). By this power the Chief Coroner may direct transfers of investigations from one coroner area to another. The Chief Coroner has exercised this power four times in the last year.
190. The Chief Coroner may notify the Lord Advocate that it may be appropriate for the circumstances of certain deaths of service personnel abroad to be investigated in Scotland under the Fatal Accidents and Sudden Deaths Inquiry (Scotland) Act 1976 (section 12 of the 2009 Act). A protocol facilitating the notification process has been agreed between the Chief Coroner, the Crown Office and Procurator Fiscal Service, the Scottish Government, the Ministry of Defence and the Ministry of Justice. The Chief Coroner has not yet made any notifications to the Lord Advocate.
191. The Chief Coroner also has a power in certain circumstances to direct a senior coroner to conduct an investigation into such a death despite the body being in Scotland (section 13). The Chief Coroner has not yet used this power.
192. The Chief Coroner may designate suitable practitioners to make post-mortem examinations (section 14). The Chief Coroner has not exercised this power.

193. The Chief Coroner must keep a register of notifications by senior coroners of investigations lasting more than a year (section 156). That register was first opened on 25 July 2014, one year after the statutory provisions came into force. A summary of the number of such cases this year is set out at paragraphs 31-39 above. Reference should also be made to the table at Annexe C.
194. The Chief Coroner must monitor and train coroners for investigations into deaths of service personnel (section 17). For details see paragraphs 75-78 above.
195. No appointment of a coroner may be made by a local authority without the consent of the Chief Coroner (and the Lord Chancellor)(section 23, Schedule 3). The Chief Coroner has given his consent to the appointment in the last year of four senior coroners, four area coroners and 20 assistant coroners: see paragraph 55 above.
196. The Chief Coroner has responsibility to train coroner and coroners' officers (section 37): see paragraphs 56-63 above.
197. The Chief Coroner may carry out an investigation into a person's death (section 41, Schedule 10). The Chief Coroner has not conducted any investigations this year.
198. The Chief Coroner may request the Lord Chief Justice to nominate a judge or a former judge to conduct an investigation (section 41, Schedule 10). The Chief Coroner may also request a former coroner to conduct an investigation (section 41, Schedule 10). He has made four requests to the Lord Chief Justice this year. All have been granted. See paragraph 98 above.
199. Senior Coroners who report to prevent future deaths under paragraph 7 of Schedule 5 to the 2009 Act and Regulation 28 of the Coroners (Investigations) Regulations 2013 (the Investigations Regulations) must send a copy of the report and any response to the Chief Coroner (regulations 28(4) and 29(6)). The Chief Coroner has received 375 of reports in the last year. The Chief Coroner may publish these documents (Regulations 28(5) and 29(7)). In practice they are all published, with redactions where necessary, on the judiciary website. The Chief Coroner seeks to publish as soon as is reasonably practicable after receipt of the reports. Email alerts are available for those who wish to subscribe on the Judiciary website.
200. Under Regulation 19 of the Investigations Regulations the Chief Coroner has power to direct the receiving local authority to bear the costs of an investigation transferred by direction under section 3 of the 2009 Act. The Chief Coroner has exercised this power once in the last year.
201. In addition under Regulation 25 the Chief Coroner has power to require information

in relation to a particular investigation or investigations. The Chief Coroner frequently requests details from coroners which are always complied with and as such has not needed to exercise this power.

202. The Chief Coroner also has the power under Regulation 27 to direct a coroner to retain documents for a period other than 15 years. The Chief Coroner has not used this power in the last year.

Conclusions

203. This is the fourth annual report of the Chief Coroner to the Lord Chancellor. In the opinion of the Chief Coroner significant progress has continued to be made in this period. The statutory reforms and the first Chief Coroner's reforms have been effective and positive and in the public interest.

204. The Chief Coroner acknowledges the enormous contribution made by his predecessor His Honour Sir Peter Thornton QC, is setting in place many systems, guidance and training that have continued after his retirement.

205. There is still much to be done. The Chief Coroner is confident that the system will develop and improve further for the benefit of all who come into contact with the coroner system. The Chief Coroner looks forward to working further with all coroners on the plans set out in this report.

HH Judge Mark Lucraft QC
Chief Coroner
June 2017

Annex A

CHIEF CORONER'S DEVELOPMENT PLAN 2016-2017

This Business Plan for 2016-2017 reflects the work of the Chief Coroner in implementing and developing the statutory reforms of the Coroners and Justice Act 2009 and the 2013 Coroners Rules and Regulations. Much of the work has been commenced and is ongoing; some of it will continue after 2017. But the purpose of this Plan is to identify the differing and evolving aspects of coroner reform and the advancement of a modern coroner system which serves the public efficiently, effectively and compassionately.

No.	TOPIC	ACTION	TIMESCALE	COMMENTS
-----	-------	--------	-----------	----------

A. STRUCTURES

1	MERGERS	With Lord Chancellor (LC) reduce 99 coroner areas to	Reduced to 88 (as of June 2017); ongoing	Purpose: to produce more effective, efficient size of coroner area with full-time senior
---	---------	---	--	--

		approximately 75		coroner; regular discussion with Ministry of Justice (MoJ) and local authorities (LAs)
2	APPOINTMENTS	New procedures for appointments of all coroners (open competition, consent by Chief Coroner and LC).	Completed; Guidance No.6 amended Jan 2016. Revised appointments pack developed 2017. Full audit of those in post completed in 2017.	Senior appeal judge swears in new senior coroners at RCJ with Chief Coroner; medical coroners assisted with General Medical Council revalidation (March 2015)
2A	APPOINTMENTS -TRAINING	New workshops for those assistant coroners wishing to be considered as area or senior coroners	Ongoing. First workshop booked for October 2016.	
3	CORONER TEAMS	Advice to senior coroners	First delivered Feb 2014, ongoing	Needs organisation at local level
4	TRIANGLE OF RESPONSIBILITY	Advice to senior coroners, local authorities and police	Completed 2014, ongoing	
5	ROLE OF SENIOR CORONERS	Identified by Chief Coroner with advice to senior coroners	Completed Feb 2014, ongoing	
6	SALARIES AND FEES	Survey levels of salaries/fees of coroners; consider national scheme	Survey completed Feb 2015; proposal to LC July 2015 (awaiting final reply); scheme under discussion	Future scheme including reference to Senior Salaries Review Body is being considered by LC; ongoing discussion with Coroners' Society (CSEW), MoJ, Local Government Association
7	CORONERS' OFFICERS (1)	Identify functions and duties	Drafted 2014, in	In discussion with CC's draft

			consultation	<i>Model Coroner Area</i>
8	CORONERS' OFFICERS (2)	Survey of numbers for coroner areas	Completed Feb 2015: CC makes requests	Purpose: to increase numbers in under-staffed areas
9	MEDICAL EXAMINERS	Discuss consequences of implementation with coroners, acting National Medical Examiner, pilot schemes, Government, LAs	Ongoing discussion since 2013; implementation by Government now scheduled for April 2019 at the earliest.	CC's response to DH consultation paper: 15 June 2016; further observations in 3 rd Annual Report

B. INVESTIGATION

10	REPORTING DEATHS	Review criteria for which kind of deaths, and in what circumstances, deaths should be reported to the coroner.	Considered, discussed	Statutory list of criteria proposed in CC's 3 rd Annual Report
11	TRANSFERS	Receive notice of transfers; to consider exceptional use of section 3 powers	Ongoing	For details see Annual Reports
12	'NATURAL CAUSES'	Definition: review law and practice	Discussion commenced at Chief Coroner's Conference for Senior Coroners Feb 2015; ongoing	
13	PRELIMINARY INVESTIGATIONS	Section 1(7) of Coroners and Justice Act 2009 in force; monitor use by coroners	Ongoing	Awaiting Government review of coroner service following 2015 consultation

14	STILLBIRTHS	To consider whether stillbirths/near term deaths should be reportable cases	Discussion commenced	Likely to require Parliament to legislate eg in statutory criteria for reporting deaths (see above)
15	CHILD DEATHS	One-day training for coroners	14 Sept 2016	Chief Coroner attended Child Death Overview Panels' Conference; discussion with Local Safeguarding Children Boards; meets with charities; involved in revision of Kennedy Guidelines
16	DEATHS IN PRISON	One-day training for coroners	13 May 2015	Chief Coroner attends Ministerial Board on Deaths in Custody and meetings with PPO, Chief Inspector of Prisons etc
17	POST-MORTEM EXAMINATIONS (P-Ms) (1)	Encourage coroners to avoid invasive P-Ms by reference to wider information; develop use of alternatives such as post-mortem imaging	Commenced; continuing	See Chief Coroner's Guidance No.1 on Post-Mortem Imaging (Adults); reducing P-M rates (see MoJ statistics)
18	POST-MORTEM EXAMINATIONS (2)	Advice on P-Ms for deaths in prison; monitor	Advice produced 2014; ongoing monitoring	
19	POST-MORTEM EXAMINATIONS (3)	2 nd P-Ms in homicide cases	Proposal drafted April 2015, in consultation; round table discussion July 2016. Pilot scheme being considered.	Purpose: to reduce numbers of 2 nd P-Ms in cases of suspected homicide
20	PATHOLOGISTS	Draft standard instructions for pathologists	By March 2016	Draft CC Guidance on coroners and hospital trusts in discussion

21	TOXICOLOGY	Draft scheme for standardised coroner/provider arrangements	Drafted March 2015, continuing consultation	
22	DISPOSAL OF ORGANS, TISSUE ETC	Advice to coroners; monitor and discuss	Advice provided 2013; continuing monitoring and discussion with HTA. New guidance on the coroner approach to organ donation to be prepared.	
23	FUNERAL DIRECTORS	Draft scheme for standardised coroner/funeral director arrangements	By Nov 2015; issued 8 Dec 2015	
24	OUT OF HOURS SERVICES	Consider extending scope of service	Discussion commenced; pan-London scheme proposed 2014; police and LAs agree in principle at meeting convened by Minister of Justice to London service Dec 2014, detail being considered 2015	Law and resources limited; developing interest across E & W; 'light touch approach requires on call coroners' officers and open registrar's office
25	SECTION 1(4) REPORTS: INVESTIGATIONS WITHOUT A BODY	Guidance for senior coroners; draft template for use; monitor	Completed April 2015; updated Jan 2016; monitor ongoing (working well)	167 reports received, 148 directions made by Chief Coroner (July 2013-June 2016); law change on bodies lost at sea proposed (see below)
26	DISCONTINUANCE	Monitor use; consider amendment to section 4 of Coroners and Justice Act 2009	Continuing	Amendment proposed: see 3 rd Annual Report

		where no P-M		
27	SPECIAL CASES	Advice: Duty to Notify Chief Coroner in special cases, including mass fatality, military deaths, viral haemorrhagic fevers (eg Ebola), Regulation of Investigatory Powers Act 2000 etc	Issued Dec 2014, monitoring (working well)	Now used widely eg for MH17 (Ukraine) and Germanwings (France) air disasters and Sousse, Tunisia, killings, with special arrangements devised by Chief Coroner with coroners, police and Foreign and Commonwealth Office (FCO)
28	DEPRIVATION OF LIBERTY SAFEGUARDS (DoLS)	Guidance; discussion with coroners, Law Commission, LAs	Guidance No. 16 Dec 2014, updated Jan 2016; ongoing discussion. Revised guidance issued April 2017 in the light of the change to the definition of 'state detention'. Developments on the Law Commission plans awaited.	Substantial additional workload for coroners; special difficulties discussed, Chief Coroner advises; CC response to Law Commission June 2016 and 3 rd Annual Report both propose removal from coroner jurisdiction
29	DEATHS ABROAD	Review procedures, draft scheme and guidance	By April 2016; not yet finalised, except CC advice on executions abroad July 2015	Chief Coroner has discussed with FCO, coroners and charities
30	MASS FATALITIES	Scheme for coroners and role of Chief Coroner; regular discussion with Government	Scheme completed July 2014; training conference 10 May 2016; discussion, training ongoing and the major topic for all coroners training 2017-2018.	CC's <i>Mass Fatality Checklist</i> June 2016; CC attends police training events

31	ASPHYXIA RESTRAINT DEATHS	Monitor deaths in police/prison/other custody; provide advice where necessary	Ongoing	Evidence by CC to Dame Elish Angiolini's inquiry into deaths in police custody
32	TASER DEATHS	Monitor and provide coroners with information	Assistance provided; ongoing	
33	APPOINTMENT OF JUDGE CORONERS	Draft scheme for nomination process	By August 2015; completed Sept 2015	Chief Coroner also provides advice to judge coroners on process and arrangements with LAs
34	LEGAL AID	Encourage Government to provide through Legal Aid Agency for families in appropriate cases	Completed: generally and on some individual cases; letter to Minister sent	LC reconsidered his guidance in light of High Court decision in <i>Letts</i>
35	BEREAVED FAMILIES	Meet with families, organisations; discuss issues, concerns	Ongoing	NB Chief Coroner cannot overturn judicial decisions of coroners
35A	MOUs	Memorandums of understanding between various agencies and coroners being revised and updated and devised to be between the Chief Coroner and the agency.	Ongoing. Various meetings with the AAIB, RAIB and MAIB, FCO, CQC, DFS and others to deal with drafts.	

C. INQUESTS

36	SETTING DATES	Encouragement to set dates for	Completed; ongoing	
----	---------------	--------------------------------	--------------------	--

		all hearings as early as possible	monitoring and encouragement	
37	DISCLOSURE	To produce Guidance	By August 2016; incomplete	
38	ARTICLE 2 INQUESTS	To produce Guidance	By August 2015; still in draft form (awaiting decision in <i>Tyrell</i>)	
39	EXPERT EVIDENCE	Review; devise scheme for use of, instructions for, and receipt of expert evidence	12-18 months; delegated to coroners for first draft (awaiting)	
40	PRE-INQUEST REVIEW HEARINGS	To produce Guidance	By end of 2015; completed Jan 2016	
41	INQUESTS WITHOUT HEARINGS	To consider whether (i) appropriate and (ii) law change required	By June 2016; proposal in 3 rd Annual Report July 2016 and restated in 4 th Annual Report July 2017.	Written judgment without a hearing where (a) facts are uncontroversial, (b) there is no special public interest, and (c) family agree
42	TIMELINESS	Monitor cases of over 12 months; reduce backlogs	Annual figures from coroners commenced 2014, second return due May 2015; continuing with advice and training. 4 th Annual report includes a schedule with all of the figures as returned by coroner areas.	In 3 years, number of cases over 12 months has reduced by 52%; nearly half of areas have less than 10 cases outstanding
43	USE OF FINDINGS IN FAMILY	Guidance; monitoring	Guidance No.13 April 2014 (working well);

HH JUDGE PETER THORNTON QC

CHIEF CORONER

22 April 2015 and 29 June 2016

HH JUDGE MARK LUCRAFT QC

CHIEF CORONER

Revised 29 June 2017

Annex B

A MODEL CORONER AREA

THE CHIEF CORONER'S RECOMMENDED MODEL

This document is intended to assist senior coroners, local authorities and police authorities as to the nature, scope and organisation of a model coroner area. All should work together to try and achieve, wherever possible, the aspirations of this model.

Size of coroner area; mergers

1. Approximately 225,000 deaths are reported to coroners in England and Wales each year.
2. The size of a coroner area should be such that the senior coroner receives approximately 3,000 to 6,000 reports of deaths each year. Areas which receive less than 2,500 reported deaths should consider merging with another area. Smaller, part-time jurisdictions may sometimes be less efficient and effective.
3. Applications to merge two or more coroner areas are considered by the Lord Chancellor. If two or more local authorities wish to merge their coroner areas into one combined area, they should apply to the Lord Chancellor through the Ministry of Justice (MoJ). The MoJ will ask the authorities to complete a business case for the merger in standard form before the Lord Chancellor formally consults relevant stakeholders.²⁷ The Chief Coroner is always available to discuss mergers.

Coroners

4. Each coroner area should have a senior coroner supported by assistant coroners. In some larger areas there will also be an area coroner.

²⁷ See Chief Coroner's Guidance No.14 *Mergers of Coroner Areas*.

5. Where there is an area coroner, the senior coroner's administrative workload should be shared with the area coroner by agreement.
6. The senior coroner, with the agreement of the local authority, must allocate the area coroner (if there is one) or an assistant coroner as the senior coroner's deputy. This is not a formal statutory post; the deputy should deputise for the senior coroner in their absence for leave or sickness.
7. New coroners should be appointed by the local authority following an open and transparent competition.²⁸
8. The role of the senior coroner, a post which came into force for the first time with the implementation in 2013 of the Coroners and Justice Act 2009, embraces the following. The senior coroner:
 - stands at the head of the local coroner service
 - provides collaborative leadership
 - leads on coroner work and manages the caseload
 - organises and supports the coroner team locally
 - works closely with the local authority and the police
 - manages the expectations of the public and bereaved people
 - is on call all the time (or on a rota basis) for urgent matters and for making decisions about organ and tissue donation, and
 - is prepared for a mass fatality disaster.
9. Senior coroners and area coroners are entitled to a salary. Assistant coroners are entitled to fees. Fees for assistant coroners should be paid at a daily (or half daily) rate for preparation and court casework as well as office work. The basis of all payments should be clearly agreed in advance.
10. Salaries and fees (and other terms and conditions) should be agreed from time to time between coroner and local authority. It is the Chief Coroner's view that an independent assessor (such as the Senior Salaries Review Body) should recommend levels of salaries and fees.
11. In the Chief Coroner's view the JNC Agreement on coroners' pay as set out in Circular No.51 (latest version 14 April 2011) lapsed in July 2013. The Coroners' Society of England and Wales and the Local Government Association, who entered into the JNC Agreement, both accept that it has lapsed. The agreement referred to terminology in an Act of Parliament which was been repealed. Accordingly, new agreements between coroners and local authorities should not include terms such as long inquest payments, county loading and assessment of 11.5% of annual caseload for payment of a deputy. Senior coroners should not be required to pay for any other coroner or pay for any expenses out of their salary.

²⁸ See Chief Coroner's Guidance No.6 *The Appointment of Coroners*.

12. Senior coroners should be expected to have and take an annual leave entitlement of 30 days.
13. Assistant coroners should be given a minimum of 15 days work a year (either sitting and/or office coroner work). They must first be assessed as competent and ready to work on their own.²⁹
14. There is a mentoring scheme for assistant coroners (and other coroners) who require additional assistance or advice and an appraisal scheme is to be piloted and launched across all areas in due course.³⁰
15. Where possible, senior coroners should provide 'shadowing' opportunities for aspiring assistant coroners.
16. Area coroners and assistant coroners should be appraised annually by the senior coroner. An appraisal scheme needs to be developed.
17. The senior coroner should hold regular (possibly monthly) meetings with the coroner team to discuss relevant coroner issues and work. There should also be regular meetings with the relevant local authority and the police, as well as local registrars. The senior coroner should also hold meetings with hospitals and GPs, and with community and faith groups.
18. Meetings of senior coroners within a region are encouraged.
19. The senior coroner should present a brief annual report to the local authority. The report, which should be published on the local authority website, should include relevant statistics on current and concluded cases (with comparison figures for previous years), an update on coroner work and relevant issues, a summary of the coroner team and staffing arrangements, and any plans for the future.
20. Coroners (including senior coroners) should be computer competent and therefore able to deal with correspondence and other necessary documentation themselves, if required. That is not to say that coroners should not be provided with necessary administrative support whether by a personal assistant or other staff (see below).

Coroners' officers

21. Coroners' officers are employed by the police authority or local authority. For their functions and duties as coroners' officers see the Chief Coroner's note on *The Functions and Duties of Coroners' Officers*.

²⁹ In accordance with the Chief Coroner's Guidance No.20 *Core Competencies for Assistant Coroners*.

³⁰ See Chief Coroner's Guidance No.19 *Mentors for Coroners*.

22. In order that coroners can carry out their functions, there should be a minimum of one coroner's officer for every 350-450 reported deaths. In complex jurisdictions, particularly those with prisons, more should be provided.
23. Those employing coroners' officers, whether police or local authority, should maintain a full complement of officers at all times. Arrangements should be in place so that proficient temporary cover is available whenever officers are absent through long-term sickness or suspension.
24. Employers of coroners' officers and councillors are encouraged to visit the coroner's office (by appointment) to discuss the work of coroners' officers and the issues raised by them.

Administrative support staff; the telephone system

25. Coroners and coroners' officers should be supported by administrative support staff employed by the local authority. The minimum ratio of coroners' officers to administrative staff should be approximately 3:1.
26. The work of administrative support staff employed by the local authority should be of a purely administrative nature. Administrative staff should not usually be carrying out the work of coroners' officers; their role is to support coroners and coroners' officers.
27. Administrative support staff should carry out the following functions: answer the telephone; copy documents (which cannot be scanned); distribute disclosure; deal with jurors and juries; manage invoices in connection with post-mortem examinations, toxicology and body removal/storage, as well as witnesses and jurors etc; collate management data; manage the computer system (ALS or another system); and deal with insurance companies and others.
28. Administrative staff, through a telephonist receptionist or other system, should answer all incoming telephone calls in the first instance. In doing so they should provide basic general information and information on specific cases, taken from a centralised computer system. In this way calls to coroners' officers should be greatly reduced.
29. The telephone system should be operated during working hours, ordinarily from 9am - 5pm (or 8am - 4.30pm), Monday to Friday, including the lunch hour. Calls should be answered promptly, ideally within 30 seconds. Where necessary, staff working hours should be staggered in order to permit good access to the coroner service. It is vital that all stakeholders, including doctors, pathologists, toxicologists, registrars, funeral directors and insurance companies, as well as members of the public, should have prompt access to the coroner service. Appropriate answering messages should be given for calls out of normal hours with appropriate emergency numbers. Telephone systems should not have complex 'menus'.

Accommodation

30. The local authority should provide office accommodation for all coroners, coroners' officers and administrative support staff. Ideally, all personnel should be close together in

one building. The coroner's court should be in the same premises where possible. Where the local court is not large enough for jury inquests, courts should be made available to the coroner for jury inquests on a regular basis. Coroner areas should actively work towards these arrangements.

31. Where the police employ coroners' officers, the police authority may share some of the necessary cost of accommodation. Coroners' officers should not be in different parts of the county or in police stations, but working together in one place with the coroner and administrative staff. This produces greater resilience, efficiency and effectiveness of working. It serves the public better.
32. The coroner's premises should, where possible, be close to the registration services and other relevant local authority staff (and Medical Examiner service when implemented).
33. In a busy jurisdiction there should be more than one coroner's courtroom in the premises: a larger court capable of holding jury inquests, and a smaller court for everyday work.
34. Senior coroners should not routinely use their home as an office. The local authority should provide them with an office.
35. The use of private email addresses for judicial work should be discouraged. The local authority should provide coroners with a secure email address. There should also be secure storage for documents.

Investigations and inquests

36. Coroners must act independently in making judicial decisions, including (but not exclusively) on the following issues:
 - deciding whether to commence an investigation or to complete Forms 100A and 100B
 - requesting a post-mortem examination
 - releasing a body for burial or cremation
 - issuing interim death certificates
 - discontinuing an investigation
 - conducting hearings
 - completing inquests
 - making Out of England orders, and
 - writing reports to prevent future deaths
37. Coroners are expected in most cases to follow the Chief Coroners Guidance on practice and procedure. Coroners may depart from guidance, however, where there are good reasons to do so, but they should provide their reasons either in open court or in correspondence. As independent judicial office holders, coroners must make their own judicial decisions. The Chief Coroner may not interfere with those decisions, nor amend or reverse them, except when he sits in the High Court.

38. Doctors should have a statutory duty to report deaths to coroners in specified circumstances. In the current absence of statutory regulation, doctors should comply with the recommended reporting requirements set out in the notes for doctors on the Medical Certificate of Cause of Death.³¹ Coroners should not require doctors to make reports (referrals) in any other circumstances.
39. Deaths should be reported (referred) to the coroner immediately (at the latest within 24 hours) and electronically, by email or other means, such as a web-based solution, in standard form. Doctors should not be paid by the coroner for referral reports.
40. All bodies should be released for burial or cremation within three days of the report of the death to the coroner, or where possible earlier.
41. Most inquests should be completed within six months of the death being reported. Coroners should aim to complete 40% (or more) of all inquests within one month and a further 20-25% (or more) within one to three months.
42. In some cases, such as deaths overseas, deaths in custody, or where the police or other agency have ongoing investigations, this timescale may not be possible. But coroners should keep a close watch on such cases to ensure that they are completed within a reasonable time.
43. In cases where the death occurs overseas the coroner should take a realistic view when no useful purpose would be served in deferring further the inquest. Similarly, where the body has been lost at sea or in a river and may never be recovered, the coroner should not delay unreasonably in making a section 1(4) request to the Chief Coroner to hold an inquest in the absence of the body. Some such cases in the past have been deferred almost indefinitely. Earlier inquests may be needed, even though information may be limited.
44. A coroner area should avoid a backlog of cases. There should be no more than a handful of cases which are not completed or discontinued within 12 months of the report of the death. Coroners must report annually to the Chief Coroner with details of all cases not concluded within 12 months.
45. All inquests should be opened in open court, in a local courtroom. Open court means a court arranged in a building in such a way that any member of the public can drop in to observe the hearing (any hearing) unannounced.
46. At the opening hearing a date should be fixed either for the inquest itself or, in more complex cases, for a pre-inquest review hearing. Normally, the name of the coroner who will be hearing the case should be announced. The coroner should not as a matter of course fix review hearing dates instead of inquest dates at the opening hearing.

³¹ Paragraph 5.3.

47. Reports, including, post-mortem reports should be required from pathologists within three to four weeks, except where further reports from toxicologists or other experts are required. Timescales should be announced at the opening hearing.³²
48. All hearings should be recorded. Coroners should usually avoid obtaining a transcript of a hearing.
49. Interim hearings and final hearings should be notified to the public by notice on the coroner's or local authority website.³³
50. In non-contentious cases, where no witness is required, the family have no concerns and there is no particular public interest, inquests should be concluded with brief paper rulings. This proposal will require a change in the law.
51. In more complex cases, coroners should hold pre-inquest review hearings (PIRs). The coroner should set an agenda in advance and give rulings either at the hearing or shortly afterwards. All rulings should be reduced to writing (in brief) and distributed to Interested Persons. Topics for a PIR agenda may include:
- identity of Interested Persons
 - representation
 - scope of inquest
 - whether Article 2 is engaged
 - whether jury is required
 - venue
 - timescale
 - list of witnesses
 - disclosure
 - jury bundle
 - other outstanding issues
52. Where a person dies in a care home or hospital subject to a Deprivation of Liberty Safeguard authorisation (DoLS), the coroner may proceed to a brief paper inquest, preferably within two weeks of the death, in the following circumstances: the coroner obtains (i) a copy of the authorisation and (ii) a medical report indicating that the death was from natural causes, and (iii) the coroner checks with the family that they have no particular concerns about the death.
53. Coroners, through their officers, should check with all families in all cases to see whether they have any particular concerns about the death.
54. Coroners, through their officers, should provide families with early information and early explanation about the forthcoming coroner process. Officers should keep families and

³² See Chief Coroner's draft Guidance *Coroners and Healthcare Providers*.

³³ See Chief Coroner's Guidance No.9 *Opening Inquests*.

other interested persons informed of the progress of the investigation including the reason for any delay.

55. Coroners' officers should not normally be required to remain at court during an inquest.

56. In due course, Records of Inquests should be published (subject to any necessary redaction) on the coroner's or local authority's website. Similarly, where inquests are permitted to take place without a hearing (see paragraph 50 above), the final rulings should also be published.

Reports to prevent future deaths

57. All coroners are encouraged to write reports to prevent future deaths in appropriate cases. They are of value to the family concerned and the wider public.

58. Reports should be completed using the standard template. A copy of the report and any response must be forwarded to the Chief Coroner's office by email.³⁴ The report and any response will usually be published on the judiciary website (sometimes with redactions).

Out of hours services

59. The senior coroner, in collaboration with the police and the local authority, should provide an out of hours coroner service.

60. In view of current financial limitations, an out of hours service (overnight, weekends and bank holidays) should be arranged on a 'light touch' basis. This should require as a minimum the availability of one or more coroners' officers on a rota system, in the first instance answering calls and having access to case records on a centralised local computer system. It should also require an on call rota of coroners, special opening hours for registrar's offices and occasional access to local authority mortuaries.

61. A local coroner should always be available for emergencies such as homicide cases, mass fatalities and decisions on organ and tissue donation. In some areas an out of hours service will require more, particularly in order to assist families who seek early burial for their loved ones or Out of England orders.

62. The registrar's office should be open for a limited period at the weekend and on bank holidays for the registration of deaths and the provision of death certificates. This will complement out of hours arrangements in the coroner service and provide a more coordinated system for death investigation and registration.

63. Since the coroner service continues to be funded locally, the cost of providing an out of hours service will fall on the local authority and local police authority.

³⁴ See Chief Coroner's Guidance Nos.5 and 5A *Reports to Prevent Future Deaths* and *Practical Guidance: PFD Reports*.

Mortuary and pathology services

64. Mortuary and pathology services should be arranged on a regional basis. Local authorities and NHS England and NHS Wales should combine to provide regional medical centres of excellence. These should include mortuary services, a hierarchy of pathologists (with forensic pathologists at the highest level), CT scanning and ideally other facilities such as toxicology and other forensic testing.
65. The Chief Coroner will be working actively with NHS England, NHS Wales, the Department of Health, as well as coroners, local authorities and others, to encourage developments in this direction.
66. Until regional centres are available, coroners should have access to CT scanning facilities (although this may be a facility which requires payment of a fee by families).
67. Coroners should aim towards a post-mortem examination (autopsy) rate of 30% of reported deaths or below. (Current post-mortem rates in coroner areas across England and Wales vary from 22% to 62%.) Coroners are encouraged, as in other jurisdictions, to judiciously manage resources proportionately, allocating to any one case an appropriate share of resources, while taking into account the need to allot resources to other cases.

Tendering

68. Tendering for services from external providers should be undertaken every three or four years. Relevant providers include toxicology and funeral directors.
69. The precise process of tendering is a matter for each relevant authority in discussion with the senior coroner.
70. Tendering criteria should always focus on more than just cost. Quality and delivery of service are essential.
71. Funeral directors who have a contract with the coroner and local authority for 'coroner's removals' (removal of a deceased person on the authority of the coroner from the place of death to the coroner's mortuary) should not solicit bereaved families for business at the time of removal. They may, however, leave behind with the family a Notice of Transfer (or similar document) in the terms suggested by the Chief Coroner.³⁵

Local authorities

72. The relevant local authority should discuss issues including financial issues with the senior coroner and staff on a regular basis. Good, frequent and collaborative contact is essential.
73. Local authorities should understand that coroners are independent judicial officers and that the local authority may not interfere in matters within the exclusive jurisdiction of the

³⁵ See Chief Coroner's Advice *Contracts for Coroners' Removals*.

coroner. This does not, however, mean that coroners have exclusive rights over all things coronial. Much needs to be the subject of sensible discussion and agreement. Senior coroners are not chief officers of the local authority, although in some cases there may be useful analogies from the way chief officers and other council departments operate.

74. When the senior coroner is approaching retirement (ideally at least a year in advance), local authorities should consider succession planning and, if a small jurisdiction, possible future merger with another coroner area or areas.
75. Local authorities should provide the senior coroner with a dedicated website or a page of the local authority website, so that information about the coroner service and details of forthcoming inquests (and, in due course, outcomes) may be posted.

Training

76. Compulsory training is provided for all coroners (380) and coroners' officers (590), from basic learning to continuing development, as part of the modern requirement for a professional public service. Training is devised, arranged and delivered by the Chief Coroner together with the Chief Coroner's course directors (selected by competition). Training is provided under the auspices of the Judicial College which trains all judges, magistrates and tribunal members. The College funds and administers the training.
77. Newly appointed assistant coroners receive compulsory residential induction training.
78. Newly appointed assistant coroners should also receive local in-house training at the coroner's premises. They must satisfy the core competencies for assistant coroners (see paragraph 13 above).
79. In order to ensure that assistant coroners are sufficiently skilled in coroner work for the benefit of local people, local authorities should remunerate assistant coroners for attendance at training (by way of daily rate for lost working time) and pay their reasonable expenses. Where assistant coroners hold posts in more than one jurisdiction, these costs should be shared between relevant local authorities. The training, accommodation and meals are provided by the Judicial College free of charge.
80. All coroners receive compulsory residential training each year (which is similarly arranged by the Chief Coroner).
81. In addition, the Chief Coroner provides one-day courses on specific topics such as deaths in prison, deaths of children, mass fatality events, medical topics, as well as special training for his cadre of coroners for military deaths.
82. Coroners' officers also receive (as of 2015) compulsory residential training from the Chief Coroner (as above) each year. They should also receive extensive in-house training while learning in post, both from the coroner and coroners' officer manager. Local registrars should also be invited in to help train coroners' officers.

83. Where possible, senior coroners (or a member of the local coroner team) should make themselves available to instruct GPs and hospital doctors about the coroner service and requirements for reporting deaths and contents of MCCDs.

Discipline

84. Coroners' officers and administrative support staff are line-managed and disciplined where necessary by their employers (police or local authority) and not by the senior coroner. Police and local authorities should, however, discuss with the senior coroner the implications of enforcing discipline.
85. Coroners are appointed (but not employed) by local authorities. As independent judicial office holders, they cannot be dismissed or removed from office by local authorities. By statute, a coroner (like other judges) may only be removed from office by the Lord Chancellor, with the agreement of the Lord Chief Justice, for 'incapacity or misbehaviour'.
86. In practice complaints against coroners over personal conduct should be made to the Judicial Conduct Investigations Office which investigates and makes recommendations to the Lord Chancellor. Complaints about judicial decisions by coroners should be made through the High Court.
87. The Chief Coroner has no role, statutory or otherwise, in the disciplinary process of coroners.

HH JUDGE MARK LUCRAFT QC
CHIEF CORONER

Revised 30 June 2017
