- Based on the experience of the MS
  Basis for a geo analysis

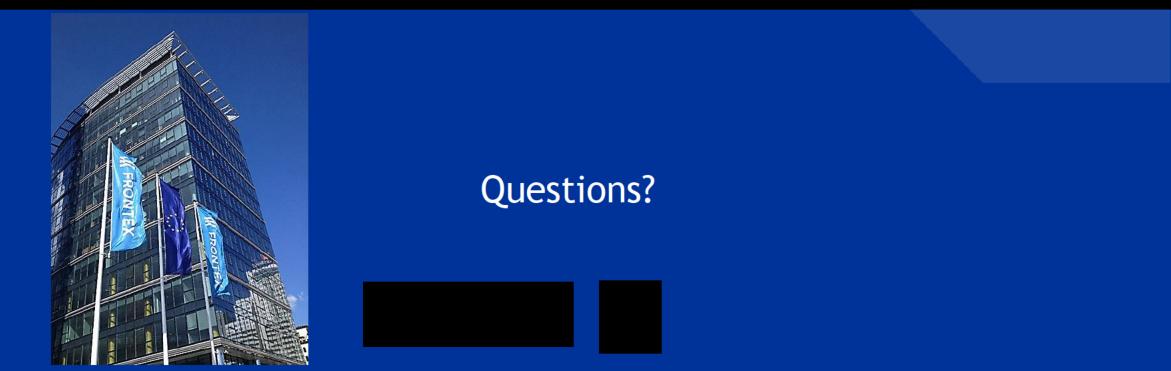

inuously improved

8 modules

## Model-RECAMAS: 8 modules

Common module	• Common features of the system (e.g. generate templates)
Apprehension module	• Registering the migrant (e.g. scanning identification documents)
Measures model	• Management of the migrant after apprehension (e.g. allocate to detention centre)
Detention module	• Manage the migrants that are in detention (e.g. detention period)
Identification and documentation module	• Manage the identification and acquisition of documents (e.g. plan visit to embassy)
Returns module	• Organise the actual return of the migrant (e.g. book the flight)
Case module	• Provide an overview of the migrant's case (e.g. support family case management)
Transportation module	• Manage the transportation of migrant to different facilities (e.g. between detention centres, to the hospital, to courts)
