Foreword

Frontex has undergone a significant transformation in 2016. Following an accelerated legislative process on 6 October it became the European Border and Coast Guard Agency. This agency is continuing the work of its predecessor, but also has new responsibilities and new tools to assist the EU Member States and the Schengen Associated Countries.

The European Border and Coast Guard Teams and the Technical Equipment Pool remain the main sources of operational resources for deployment in Frontex coordinated operational activities. Following the implementation of the new regulation, European Border and Coast Guard Agency established additional profiles for officers to be deployed in joint operations. The agency also created a rapid reaction pool of 1 500 officers, who can be deployed at the external borders in a crisis situation.

In 2016 responding to the continuing migratory pressure at the external borders of the European Union, Frontex deployed the biggest number of officers and technical resources. Throughout the year the agency deployed on average between 1000 and 1500 officers, 30 vessels and numerous pieces of other technical equipment including aircraft, patrol cars and Thermo Vision Vehicles.

In addition, the increased responsibilities of the agency in the area of returns resulted in the establishment of the pools of forced-return monitors, forced-return escorts and return specialists. The profiles of return experts have been developed by Frontex in cooperation with the national authorities and the European Commission.

Operational needs in 2016 exceeded technical resources that had been committed during the annual bilateral negotiations. Consequently

Frontex launched nine Open Calls for additional contributions to joint operations. The additional equipment was mostly needed for Frontex maritime operations but a significant number of human resources and terrestrial means was also required for land operations.

In 2016 Frontex also deployed over 70 Seconded Guest Officers (SGOs) as Frontex Support Officer, Screening Expert, Debriefing Expert or Second Line Airport Officer.

The Agency also made use of its framework contract for provision of Frontex aerial surveillance services, as well as the service contracts for transportation services by sea and land for its readmission operations.

In 2017, Frontex will focus on the establishment of its own operational capacity, especially by acquiring motor vehicles, such as patrol cars and transportation vehicles, as well as mobile surveillance systems. The Agency will put significant efforts into developing systems for managing the new fleet.

The European Border and Coast Guard Agency is better equipped to help the EU Member States and the Schengen Associated Countries deal with the current and future challenges at their external borders. The Agency will continue to work closely with its various partners, including other EU agencies such as EASO, EMSA, EFCA, Europol and eu-LISA, to provide a coordinated response to the new challenges. I am confident that the strengthened Frontex, hand-in-hand with the Member States and Schengen Associated Countries, will stand ready to handle future pressures at EU's external borders.

Fabrice Leggeri Executive Director

Introduction

This report provides information on the commitments of the Member States / Schengen-Associated Countries to the European Border and Coast Guard Teams (EBCGT) and the Technical Equipment Pool (TEP) in accordance with the European Border and Coast Guard Regulation*, i.e.

Article 20(12) "The Agency shall inform the European Parliament on an annual basis of the number of border guards that each Member State has committed and the numbers of border guards actually deployed to the European Border and Coast Guard Teams";

Article 39(13) "The Agency shall on an annual basis submit a report to the European Parliament on the number of items of technical equipment that each Member State has committed to the technical equipment pool."

The report presents the following aspects:

- The state of play of the EBCGT, established by MB decision 38/2016 of 23 November 2016 adopting the profiles and the overall number of border guards and other relevant staff to be made available to the European Border and Coast Guard Teams;
- The state of play of the TEP, including the Overall Minimum Number of Technical Equipment (OMNTE) 2017 – established by Decision of Frontex Management Board No 8/2016 of 31 March 2016;
- Deployment of resources from EBCGT and the TEP in Frontex Joint Operations 2016;
- Additional Open Calls for Contribution to Joint Operations 2016;
- Annual Bi-lateral Negotiations (ABN) 2017 – (taken place in October 2016) commitments of MSs/SACs to the EBCGT and the TEP covering the 2017 operational needs;
- Development of Frontex' own operational capacity – with procurement of:
 - Frontex Aerial Surveillance Services (FASS) for Frontex Joint Operations;
 - Mobile Field Offices for screening, debriefing and registration purposes;
 - Transportation vehicles;
 - Complete registration services covering the 2016 operational needs.
- Plans for acquisition of Frontex own equipment in 2017–2018.

* Regulation (EU) 2016/1624 of 14 September 2016, on the European Border and Coast Guard and amending Regulation (EU) 2016/399 of the European Parliament and of the Council and repealing Regulation (EC) No 863/2017 of the European Parliament and of the Council, Council regulation (EC) No 2007/2004 and Council Decision 2005/267/EC.

1. Executive summary

Pursuant to the provisions of European Border and Coast Guard Regulation, in particular Articles 20 and 39 therein, Frontex established the EBCGT and the TEP as sources of operational resources for Frontex' Coordinated Joint Operations. Both pools are expected to increase Frontex response capacity as identified in Multi-Annual Plan 2015–2018 and Program of Work 2016.

About 5000* border guards are registered in Opera** as EBCGT*** members. These border guards are selected by MSs/SACs depending on their expertise related to the 16 different profiles developed by Frontex reflecting different areas of border management. MSs/SACs contribute to the pool according to the specialisation available in the respective country depending on the types of its external borders, as well as the size and availability of their national border guard pool.

In addition, Frontex contributes to the EBCGT by selecting Seconded Guest Officers (SGO) – who are border guards originating from MSs/SACs, seconded to Frontex and subsequently deployed by Frontex to different joint operations as members of the European Border and Coast Guard Teams.

As for technical equipment, by the end of 2016 the TEP was composed of more than 1000**** items owned by MSs/SACs. The TEP consists of about 370 maritime assets and 90 aerial means, 160 border surveillance vehicles and patrol cars, 40 dogs and more than 370 items of equipment for border control. Detailed figures are provided in Section 3 Technical Equipment Pool.

The Overall Minimum Number of Technical Equipment (OMNTE) is decided by the Frontex Management Board in March (year n-1) and serves as a reference for launching a Call for Contributions to MSs/SACs inviting them to propose technical assets to be deployed in (year n) joint operations.

The Annual Bi-lateral Negotiations (ABN) play a major role in ensuring that Frontex joint operations are supplied with adequate resources (human and technical). The ABN take place in the last quarter of the preceding year of operations. The aim is to agree between Frontex and MSs/SACs the overall amount of human and technical resources that will be deployed on joint operations during the following year. At the end of 2015, the ABN were successfully concluded in the form of an exchange of Letters of Agreement between Frontex and each MS/SAC. The agreements concluded are also considered as MSs/SACs' commitments to the pools.

In addition to the equipment provided by MSs/SACs, Frontex may acquire, either on its own or as co-owner with a Member State, or lease technical equipment to be deployed during joint operations, pilot projects, rapid interventions, return operations, return interventions, migration management support team deployment or technical assistance projects. Implementing this mandate in 2016 Frontex exploited its Service Contracts in various areas of activities such as aerial surveillance services and experts support to Frontex Joint Operations, Mobile Field Offices and transportation services.

* Source: OPERA.

** The Operational resources management system (Opera) is integrated web-based software application custom-designed for management of the operational resources pooled and deployed in Frontex coordinated activities.

*** The data provided in relation to the European Border and Coast Guard Teams refers to the content of the Teams at the end of 2016. Since at that time still there were no MS contributions to the newly established profiles i.e. Registration and Fingerprinting Officer, Dog Handler and European Coast Guard Function Officer data for these profiles will be provided in 2018 edition of the Report.

**** Source: OPERA.

In 2016 Frontex consolidated its approach for selection of technical equipment. This approach stipulates that the first priority in the selection is given to the assets proposed by the contributing MS/SAC. Subsequently, the remaining gaps are covered by Frontex own operational capacity. Offers received by Host MS/SAC are considered only exceptionally and as a last resort.

This approach promotes the principal of European solidarity, taking into consideration cost benefit analyses and avoiding double funding of MS/SAC assets acquired by different EU funds, as well as the operational suitability of the resources selected.

2. European Border and Coast Guard Teams

2.1. European Border and Coast Guard team

The EBCGT is composed of border guards originating from MSs/SACs national border authorities. Team members are deployed

Figure 1. European Border and Coast Guard Teams (EBCGT) composition by profile (2016)

during joint operations, rapid border interventions and in the framework of the migration management support team (Article 20(1) of Frontex Regulation). The EBCGT consists of 16 different border guard profiles covering specific areas of border control as represented in Figure 1.

Following a proposal by the Executive Director, the Management Board decides on the profiles and the overall number of border guards to be made available for the European Border and Coast Guard Teams. The profiles, as well as the overall number of border guards and other relevant staff to be made available by MS/SAC to the EBCGT pool were stipulated in the MB Decision No 38/2016 of 23rd November 2016 and amounts to 5 000 border guards. However, since this number refers to the annual average number of border guards being deployed on operational activities coordinated by Frontex, it is considered to be the minimum number of the members of the Pool.

At the end of 2016, about 4 980 border guards were registered in the EBCGT indicating a positive trend and providing sufficient assurance that an adequate number of officers are available for potential deployment during the operational activities. It should be mentioned that the officers are registered by MSS/SACs under two or more different profiles.

All Guest Officers (GOs) deployed during joint operations, pilot projects and rapid interventions must belong to the pool and no exceptions have been made to this obligation. GOs have to be properly trained prior to their deployment to joint operations and pilot projects. To this end Frontex has developed

specific training for EBCGT members providing them with the necessary knowledge to perform their duties in joint operational activities.

2.2. Contributions of MSs/SACs to the EBCG team

All countries applying the Schengen acquis are represented in the pool. In addition, two Schengen Associated Countries (i.e. Norway and Switzerland) contribute to the pool. As Ireland and the United Kingdom do not apply the Schengen acquis, their participation in joint operations, pilot projects and rapid interventions is based on a case by case decision by the Frontex Management Board. However, the United Kingdom has indicated its willingness to contribute to the pool in the context of Article 12 of the Frontex Regulation. For the time being officers from the UK who are deployed in joint operational activities have the status of special advisors.

According to Article 20(12) of the European Border and Coast Guard Regulation, i.e. "The Agency shall inform the European Parliament on an annual basis of the number of border guards that each Member State has committed and the number of border guards actually deployed to the European Border and Coast Guard teams in accordance with this Article. This report shall list the Member States that have invoked the exceptional situation referred to in paragraphs 3 and 8 in the previous year. It shall also include the reasons and information provided by the Member State concerned".

Please note that, since the European Border and Coast Guard Regulation entered into force on 6 October 2016, at the moment of submission of this Report there is no previous year to refer. Furthermore, until the end of 2016, there were no registered cases of Member States invoking exceptional situations referred to in Article 20 paragraphs 3 and 8 of the above-mentioned Regulation.

Table 1. European Border and Coast Guards Team (EBCGT) composition by profile – 2016

Profile	No of EBCGT members	Share to total in %
Advanced-Level Document Officer	383	8%
Border Surveillance Officer	2 157	43%
Cross-Border Crime Detection Officer	36	1%
Debriefing Expert	395	8%
Field Press Coordinator	14	0,3%
First Line Officer	608	12%
Frontex Information Management Officer (FIMO)	122	2%
Frontex Support Officer	307	6%
Frontex Support Officer for Deployment and Log.	24	0.7%
Interview Expert	151	3%
Screening Expert	359	7%
Second Line Officer	341	7%
Stolen-Vehicle Detection Officer	83	2%
Total	4 980	

The contribution by Member States as regards their border guards to specific joint operations for the following year shall be planned on the basis of annual bilateral negotiations and agreements between the Agency and Member States. In accordance with those agreements, Member States shall make the border quards available for deployment at the request of the Agency, unless they are faced with an exceptional situation substantially affecting the discharge of national tasks. Such a request shall be made at least 21 working days before the intended deployment. If a Member State invokes such an exceptional situation, it shall provide comprehensive reasons and information on the situation to the Agency in writing, the content of which shall be included in this report.

Where necessary, the deployment of European Border and Coast Guard teams from the rapid reaction pool shall be immediately supplemented by additional European Border and Coast Guard teams. For that purpose, Member States shall, at the request of the Agency, immediately communicate the number, names and profiles of border guards

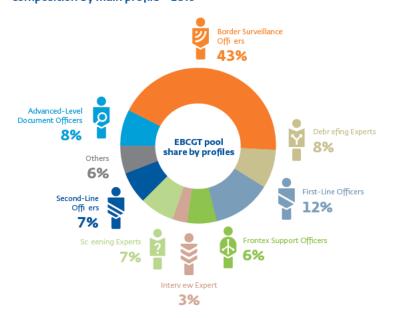

and other relevant staff from their national pool whom they are able to make available within seven working days from the start of the rapid border intervention. Member States shall make the border guards and other relevant staff available for deployment at the request of the Agency unless they are faced with an exceptional situation substantially affecting the discharge of national tasks. If a Member State invokes such an exceptional situation, it shall provide comprehensive reasons and information on the situation to the

Agency in writing, the content of which shall be included in this report.

The composition of the EBCGT is presented in Table 1 and Figure 2.

More detailed information on the composition of the EBCG team, by profile, number and contributing MS/SAC is provided in Annex 1 – Total number of European Border and Coast Guard Team members by profile and by MS/SAC – 2016, to this Report.

Figure 2. European Border and Coast Guards Team (EBCGT) composition by main profile – 2016

2.3. Seconded Members of the EBCG team

Frontex shall contribute to the EBCG team with competent border guards (former Seconded Guest Officers – SGOs) or other relevant staff seconded by the Member States as national experts to the Agency. In accordance with Article 20 (11) of the Frontex Regulation these are members of the EBCG team seconded to Frontex on a temporary basis, for a maximum period of 12 months or more but in any event for not less than three months.

Subsequently, Frontex has the possibility to deploy the seconded members of the EBCG team to different coordinated activities based on operational needs and the recommendations of risk analyses, thus filling the operational gaps, taking advantage of the higher availability of experts (during the period of secondment it is up to Fron-

Table 2. Total number of Seconded Members of EBCG teams (former SGOs) deployments in 2016, by MS/SAC and by profile

tex to decide where and for how long the experts should be deployed), as well as reducing the administrative burden related to the deployment.

Table 2 provides information on the deployments of Seconded Members of the EBCG team (former SGOs) in 2016 by profile and number of deployments per MS/SAC.

Due to exceptional operational needs in 2016 for the first time along with the annual open call Frontex launched an additional extraordinary targeted call to cover the high demand on Seconded Members of the EBCG team (former SGOs). The extraordinary call was launched on 1 March and the selection was finalized on 18 May 2016. Six Member States submitted applications of 37 candidates in total. After the selection Frontex identified 22 additional successful candidates to be made available for deployment in 2016.

The deployment in 2016 and the selection for 2017 was conducted according the legal base applicable at that time. After the entry into force of the Frontex Regulation (EU) 2016/1624 on 14 September 2016 all deployments are governed by the new legal framework – Article 20 (11) of the above mentioned Regulation with a minimum duration of the deployment – three months.

2.3.1. Recruitment of Seconded Members of EBCG teams for 2017

On 18 April 2016 Frontex launched the annual open call for recruitment of Seconded Members of EBCG teams (former SGOs) for 2017. 13 Member States submitted 177 applications in total. Out of them 152 applications were found eligible.

Following the selection procedure closed on 6 September 2016, out of 152 eligible applications Frontex selected 88 candidates (thereof 15 as reserve candidates). In addition 112 SGOs out of the previous calls of 2015 and 2016 were put on the reserve list for 2017. The number of finally available SGOs for deployment in 2017 amounted to 196 officers, covering 244 potential deployments within 7 different profiles as presented in Table 3.

Table 3. Total number of Seconded Members of EBCG team (former SGOs), including applications for multiple profiles approved for 2017 by profile

No	Profile	Number of approved applications
1.	Advanced-Level Doc. Officers	27
2.	Debriefing Experts	44
3.	Frontex Support Officers	75
4.	Screening Experts	53
5.	Second-Line Airport Officers	14
6.	Second-Line Interview Experts	21
7.	Stolen-Vehicle Detection Off.	10
Total		244

3. Technical Equipment Pool

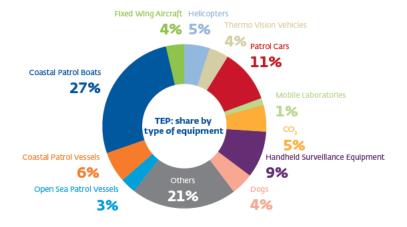

3.1. Technical Equipment Pool

The Technical Equipment Pool (TEP) is established on the basis of the provisions of Article 39(1) of the European Border and Coast Guard Regulation, i.e. "The agency shall set up and keep centralised records of equipment in a technical equipment pool composed of equipment owned either by Member States or by the Agency and equipment co-owned by the Member States and the Agency for its operational activities".

Table 4. Total number of Technical Equipment in the TEP, by category – 2016

Type of equipment	Number	Percent of the total
Maritime Means	375	36%
Aerial Means	90	9%
Terrestrial Means	167	16%
Dogs	46	4%
Others	366	35%
Total	1 044	100%

Figure 3. Total number of Technical Equipment (TE), by type – 2016

Furthermore according to Article 39(13) of the European Border and Coast Guard Regulation, i.e. "The Agency shall on an annual basis submit a report to the European Parliament on the number of items of technical equipment that each Member State has committed to the technical equipment pool in accordance with this Article. That report shall list the Member States that invoked the exceptional situation referred to in paragraph 8 in the previous year and include the reasons and information provided by the Member State concerned".

Since the European Border and Coast Guard Regulation entered into force on 6 October 2016, at the moment of submission of this Report there is no previous year to refer. Furthermore, until the end of 2016, there were no registered cases of Member States invoking exceptional situations referred to in Article 39, paragraph 8 of the above-mentioned Regulation.

At present the technical equipment pool consists of equipment owned by the Member States, as well as of equipment acquired within a Framework Contract for provision of aerial surveillance services for joint operations, transportation services for readmission operations, deployable facilities for screening, debriefing and registration activities. Detailed information on the abovementioned Framework Contract is presented in Section 6 – Development of Frontex' own operational capacity.

The TEP includes the following categories and types of equipment provided by MS/SAC (see Tables 4, 5 and Figure 3):

Maritime equipment;

- Offshore Patrol Vessels (OPV) vessels with more than 1 500 nm* autonomy;
- Coastal Patrol Vessels (CPV) vessels with autonomy between 600 and 1500 nm autonomy;
- Coastal Patrol Boats (CPB) vessels with less than 600nm autonomy;
- Fast interception boats;
- Equipment for aerial surveillance and patrolling;
 - Fixed-Wing Aircraft (FWA);
 - Helicopters;
- Mobile equipment for land border surveillance;
 - Thermo-Vision Vehicles (TVV) vehicles equipped with thermo vision camera for border surveillance;
 - Border surveillance vehicles vehicles equipped with a radar or any other sensors for border and coastal surveillance;
- Equipment for border control;
 - Mobile laboratories vehicles equipped with communication systems, computers, printers and other equipment for document checks;
 - Heart-beat detectors;
 - Carbon Dioxide (CO₂) detectors;
- Hand-held surveillance equipment;
 - Night Vision Goggles (NVG);
 - Hand-held thermal cameras;
- Service Dogs* *.

Detailed information about the composition of the TEP by type of equipment, number and contributing MSs/SACs is provided in Annex 2 – Total number of assets registered in the Technical Equipment Pool by MS/SAC and type of equipment – 2016, to this Report.

3.2. Overall Minimum Number of Technical Equipment

The Frontex Regulation stipulates that the TEP shall contain the Overall Minimum Number of Technical Equipment (OMNTE). The OMNTE is the amount of equipment, required

Table 5. Total number of Technical Equipment in the TEP, by type – 2016

Types of Equipment	Number	Percent of the total
Open Sea Patrol Vessel	33	3%
Coastal Patrol Vessel	64	6%
Coastal Patrol Boats	278	27%
Fixed Wing Aircraft	38	4%
Helicopter	52	5%
Thermo Vision Vehicles	40	4%
Patrol cars	111	11%
Mobile Radar Unit	1	0%
Mobile Laboratory	15	1%
CO ₂	54	5%
Handheld surveillance equipment*	95	9%
Dogs	46	4%
Others	217	21%
Total	1 044	100%

^{*} Handheld surveillance equipment contains NVGs and hand-held thermal and infrared cameras

to meet the needs of the Agency in particular as regards carrying out joint operations, migration management support team deployments, rapid border interventions, return operations and return interventions in accordance with its work program of the year in question. The OMNTE is established on an annual basis and is defined as "the number of required Asset-Months per type of equipment". This category of equipment has a specific status, obliging both parties: MSs/SACs - to make available, and Frontex – to deploy the equipment agreed to be part of OMNTE. Thus, the establishment of the OMNTE requires a decision of the Frontex Management Board.

The latter has the mandate to decide on an annual basis "on the rules relating to the technical equipment, including the required overall minimum number of items per type of technical equipment, the conditions for deployment and the terms for the deployment and reimbursement of costs, as well as on the limited number of items of technical equipment for a rapid reaction equipment pool". For budgetary purposes that decision

** Service Dogs are considered to be assets from the Technical Equipment Pool.

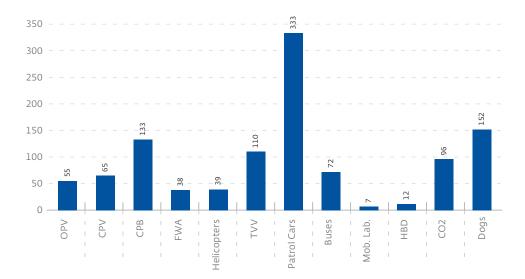

*** Management Board
Decision № 8 of 31 March
2016 adopting the rules
relating to the technical
equipment, including
Overall Minimum Number
of Technical Equipment
to be deployed during
operational activities
coordinated by Frontex
in 2017.

should be taken by the Management Board by 30 June each year (Article 39(9) of Frontex Regulation).

In March 2016 the Frontex Management Board adopted a Decision*** specifying the number of required Asset-Months per type of equipment, laying down the rules for deployment, and setting the requirements for the technical equipment to be deployed for Frontex-coordinated operational activities in 2017 was adopted.

Figure 4 shows the number of Asset-Months per type of technical equipment, as stipulated in the abovementioned Management Board Decision.

Figure 4. The number of Asset-Months for different types of equipment for OMNTE for 2017

4. Annual Bi-lateral Negotiations 2017

The main goal of the Annual Bi-Lateral Negotiations is Frontex and the Member States to agree upon the availability of both human and technical resources provided by the Member States from MS/SAC to be deployed on operational activities during the respective year. Since the Annual Bi-Lateral Negotiations for planning resources for the Year "Y" takes place in the "Y-1" the Annual Bi-Lateral Negotiations 2017 took place in October 2016.

With a decision of the Frontex Executive Director the members of the Negotiation Teams were specifically appointed and delegated powers according to their roles and responsibilities during the Negotiations. The abovementioned decision stipulated that the members of the negotiation teams are bound by the principle of transparency and fair treatment. The teams seek to ensure the broadest coverage possible of the planned operational activities and the adequacy of the resources offered in view of the operational needs, taking into consideration the principle of sound financial management, in particular the added value of the resources offered. Offers received from the Host Member States may be considered in exceptional circumstances and as a last resort.

The above approach promotes the European solidarity between the MSs/SACs and ensures an adequate level of commitment of the MSs/SACs with reference to their capabilities, as well as equal possibilities to participate in the operational activities.

The Annual Bi-Lateral Negotiations ultimately led to bilateral agreements that were concluded by sending to MS/SAC Letters of Agreement and submission to Frontex of Commitment Confirmations by each single

MS/SAC. Such agreements are considered as MSs/SACs' commitments to the pools.

4.1. Annual Bi-lateral Negotiations 2017 - Human resources, results

An overview of the Annual Bi-Lateral Negotiations 2017 results regarding the Human Resources to be deployed on Frontex Joint Operations in 2016 is presented on Figure 6. Gaps were identified for the following profiles: First-Line Officers, FSO for Frontex Situation Centre, Second-Line Airport Officers and Advanced-Level Document Officers, as well as for Stolen-Vehicle Detection Officers with a shortage ranging respectively from 22% up to 60%.

Table 6 presents an overview of the coverage of HR needs in number of officers per profile as a result of ABN 2017.

Detailed results from the ABN 2017 regarding the number of human resources to be deployed in Joint Operations 2017 by profiles, numbers, duration of deployment and MS/SAC are presented in Annex 5 – Annual Bi-lateral Negotiations 2017 – coverage of HR needs (breakdown), to this Report. An assessment of the Man-Days needs coverage per profile shows that gaps exists in the availability of the resources offered by MS/SAC, as shown on Figure 6.

Significant gaps in the number of Man-Days ranging from 18% for Second-Line Interview Expert up to 93% for Frontex Support Officer are identified, as presented in Table 7. The average gap against the overall Frontex heeds of Man-Days for 2017 amounts at 31%.

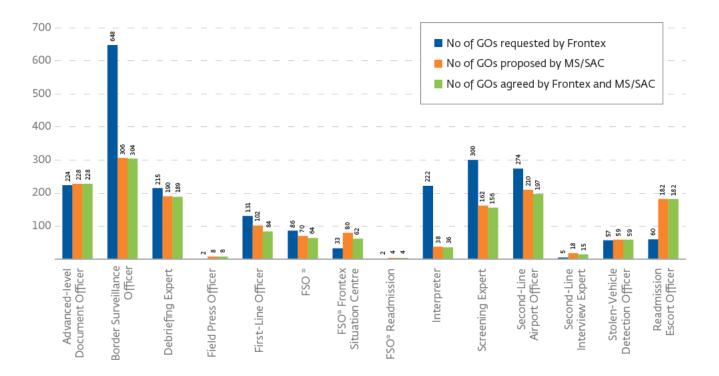

Table 6. Annual Bi-Lateral Negotiations 2017* – coverage of HR needs for 2017 Joint Operations (overview)

HR Profile	No of GOs requested by Frontex	No of GOs proposed by MS/SAC	No of GOs agreed by Frontex and MS/SAC	Gaps in No of GOs	Gaps in No of GOs, %

Figure 6. Annual Bi-Lateral Negotiations 2017 – coverage of Man-Days needs for 2017 Joint Operations

4.2. Annual Bi-lateral Negotiations 2017 - Technical equipment, results

The results of the ABN 2017 show significant shortages in the needs coverage for almost all types of technical equipment. Currently, the identified gaps regarding the number of items of technical equipment requested ranges from 21% for Thermo Vision Vehicles up to 73% for Coastal Patrol Boats as shown in Table 8 and illustrated by Figure 7.

Detailed results of ABN 2017 related to the Technical Equipment to be deployed in 2017 Joint Operations by type of assets, number, duration of deployment and MS/SAC are presented in Annex 6 – Annual Bi-lateral Negotiations 2017 – coverage of TE needs (breakdown), to this Report.

It should be noted that the statistics regarding the number of assets and Asset-Days do

not take into consideration the offers made by the Host MS/SAC. Taking into account the principal of EU solidarity priority is given to the offers made by the Contributing MS/ SAC, therefore the offers of the Host MS/ SAC are subject to further consideration by Frontex.

After analysing the coverage of Asset-Days needs for 2017 Joint Operations certain gaps are visible regarding the availability of the assets. Figure 8 shows the difference between the requested, offered and agreed Asset-Days per type of equipment.

Significant gaps related to the availability of vessels and aerial means, as well as terrestrial means ranging from 12% for Offshore Patrol Vessels up to 41% for Coastal Patrol Vessels have been identified. Table 9 presents an overview on the coverage of gaps of Asset-Days as a result of ABN 2017.

Table 8. Annual Bi-Lateral Negotiations 2017 – coverage of TE needs for 2017 Joint Operations (overview)

Type of equipment	No of assets requested by Frontex	No of assets proposed by MS/SAC	No of assets agreed	Gaps in number of assets	Gaps in number of assets, %

5. Open calls for additional contributions to 2016 Joint Operations

In the course of 2016 Frontex faced rapid increase of the migratory pressure at the external borders of the EU. As a result, additional needs for operational resources over and above those negotiated during the ABN 2016* were identified. These needs were provoked by the enormously high rate of loss of life at sea, as well as the need to manage the incoming flow of migrants by the implementation of a proper and effective registration procedure, whilst maintaining the dignity of the people and not violating their Human Rights.

In order to provide an adequate response to the abovementioned situation at the external borders of the European Union in 2016 Frontex launched 9 Open Calls for additional contributions to Joint Operations. These open calls were focused on the acquisition of additional Technical Equipment mostly for Frontex maritime operations. However, a significant amount of Human Resources and terrestrial means were required also for Land Operations.

 Annual Bi-Lateral Negotiations 2016 took place in October 2015.

Table 10. Total number of Human Resources requested by Open Calls in 2016, by profile

Profile	Number of HR agreed through Open Calls in 2016	ABN 2016 agreed HR
First-Line Officer	90	136

Figure 10. Total number of Technical Assets requested by Frontex during the ABN 2016 and the Open Calls in 2016, by type

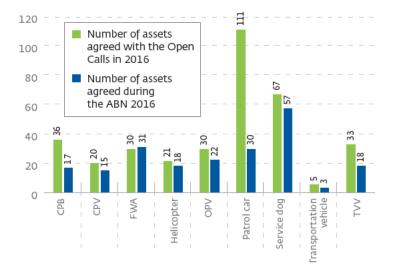

Table 10 presents the overall number of Human Resources by profile and number requested by Frontex in all the Open Calls over 2016 in addition to the resources requested during the ABN 2016.

Table 11 presents the number of Technical Equipment by type and number requested by Frontex with all the Open Calls over 2016 in addition to the resources requested during the ABN 2016.

6. Development of Frontex' own operational capacity

The Regulation (EU) 2016/1624 of 14 September 2016, on the European Border and Coast Guard in its Article 39 extends Frontex' mandate not only to deploy equipment from the MSs/SACs, but also to acquire by itself or in co-ownership with the MSs/SACs, or to lease technical equipment, for border control.

6.1. Acquisition of aerial surveillance services

In September 2015 Frontex signed a Framework Contract for aerial surveillance services and expert support.

During the 18 month period of the Framework Contract exploitation Frontex awarded 8 Specific Contracts to different companies within the contracted ones and delivered 286 days overall duration of deployment services. This represents 9.5 asset-months and consumed budget of almost €2M out of €10M allocated. 6 out of 8 Specific Contracts were assigned to maritime operations and the remaining 2 were implemented for the purpose of land border operations.

The exploitation of the FWC for FASS brought significant operational and logistics benefits for Frontex, such as:

- Service availability practically the service is available at any moment when operational need is identified, within the contractually specified administrative terms;
- State-of-the-art technology the surveillance sensors and communication (voice and data transfer) equipment, as well as the data sharing solutions are implemented by state-of-the-art technology;

- Multi-purpose missions capability the services allow that tasks of other stakeholders within the Border and Coast Guard domain – other EU Agencies, such as EMSA, EFCA can be incorporated in the assignment and implemented in cooperation with these stakeholders;
- Flexibility of the contractors related to the deployment period, deployment location, amendments made in the course of the deployment implementation;
- Simplified administrative and procurement procedure – exploitation of the FWC turned into business as usual.

Furthermore, due to the re-opening of the competition for each specific call and the attractiveness of the assignment a significant level of cost-efficiency was reached. The average cost per flight hour for maritime operations is estimated to 1873.85 EUR, all inclusive.

Mobile field office

During the exploitation of the Framework Contract Frontex and the Host Member States identified many technical issues related to the data transfer, security of the information, as well as to the general scope of the contract which have to be improved. In this regard Frontex plans to launch an open tender procedure and to establish a new Framework contract with extended scope in accordance with the new mandate stemming from

Regulation (EU) 2016/1624, as well as where the lessons learned and the best practices identified to be incorporated.

Detailed information on the Specific Contracts Implemented, by periods of implementation, deployment locations and budget spent is presented in Annex 7 – Specific Contracts Implemented within the Framework Contract for Frontex Aerial Surveillance Services, to this Report.

6.2. Mobile Field Offices

In 2016 in order to cover the needs for office space Frontex rented 25 mobile field offices. These offices were deployed in the Mediterranean (Greece and Italy), as well as in the Balkan (Bulgaria) regions. They were used for the purposes of screening, debriefing and registration of migrants, as well as for as daily by the deployed Frontex staff. The mobile field offices were made available throughout the entire year 2016.

6.3. Transportation services for readmission operations

In order to implement the engagements of the common EU-Turkey Statement of 18 March 2016, Frontex established capacity for transportation services by air, sea and land for the purposes of readmission operations from the Greek Islands to Turkey. Since April 2016 until the end of the year Frontex implemented 11 operations by air readmitting 114 Syrian nationals and 24 operations by sea readmitting 794 third country nationals. In support to these operations passenger transfer services by land were provided.

7. Way forward

7.1. European Border and Coast Guard Team

In 2017 Frontex will continue deploying border guards and relevant staff corresponding to the profiles defined in the MB decision 38/2016 adopting the profiles and the overall number of border guards and other relevant staff to be made available to the European Border and Coast Guard teams.

Given the enhanced status of rapid border interventions as an important tool for the EU response in crisis situations and setting-up of the rapid reaction pool designed as a standing corps composed of 1500 border guards and other relevant staff corresponding to the EBCGT profiles, Frontex will take the necessary initiatives to ensure that the members of the pool have received relevant training.

It should be highlighted that the increased responsibilities of the Agency in the area of return resulted in the establishment of the pools of forced-return monitors, forced-return escorts and return specialists based on the MB decision 41/2016 to be deployed to return operations and interventions as of 2017. Frontex will continue cooperating with MSs to encourage contribution to the pools and will intensify its actions related to the obligation to provide relevant training to the pools' members.

7.2. Technical Equipment Pool

In 2017 Frontex will continue working on the development of its own operational capacity by acquisition of different types of technical equipment. Taking into consideration the availability of technical means within Member States, the equipment to be potentially acquired by the latters via ISF – Specific Actions, as well as the respective timeframe for such acquisition in 2016 Frontex made operational needs' assessment and defined the main categories of equipment needed. Following this analysis in 2017 Frontex will focus on the acquisition of terrestrial means vehicles and light equipment, while the heavy equipment will be priority for acquisition by Member States. The equipment should be acquired mostly through purchase of goods.

Furthermore, for fleet management Frontex will outsource the relevant associated services such as insurance, maintenance, parking space, fuelling etc. Frontex expects the acquired equipment to be available for operational purposes starting from Q2 of 2018.
