Cross-checks against databases & targeting/profiling

Europol Unclassified: Basic Protection Level
Questions concerning PNR

• What databases/sources are used for the cross-checking of PNR data?

• Can the process of formulating targeting rules for PNR be used for targeting in other domains?

• Can the intelligence used for targeting PNR data be used in other domains?

• Is there already a form of interaction with other domains?
Thank you for your attention and participation
