Protecting the public using science and technology

A UK Perspective

Alan Pratt

Director, Home Office Scientific Development Branch

HOSDB

- Unique team of scientists and engineers at the heart of government
- Supporting
 - Policy
 - Law enforcement
 - Counter terrorism
 - Offender management
 - Immigration
- 23 technical programmes
- 160 projects
- 250 staff
- £25m per year

Sandridge -
St Albans, Herts

Langhurst-
Horsham, Sussex

1. Unrivalled scientific advice

- Impartial and accurate technical advice
- Setting technical standards
- Internationally renowned

2. Innovative technical solutions

- We develop new technologies where off-the-shelf equipment is not available
- Broker between commercial manufacturers and customers

3. Frontline support

- Hands-on technical support for security operations
- Central stock of search and surveillance equipment
- Support over 100 events a year

ISSUES IN EXPRESSING NEEDS AND ACHIEVING REAL SECURITY BENEFITS

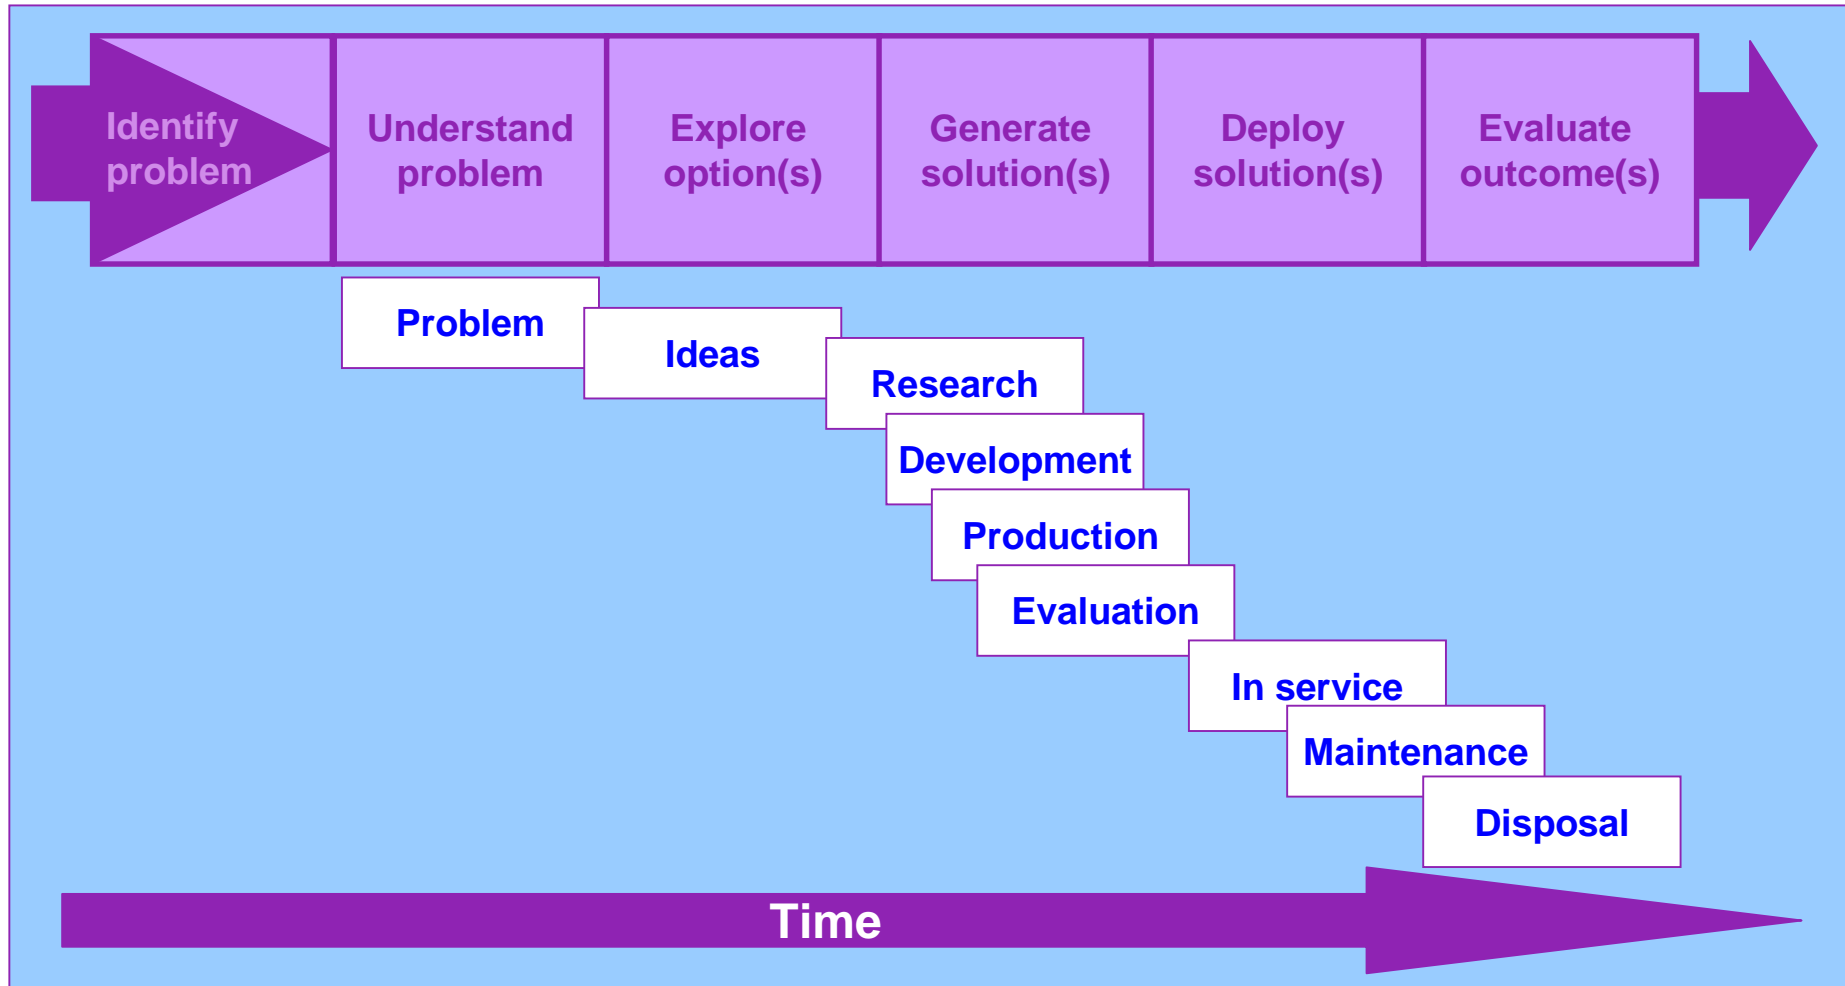

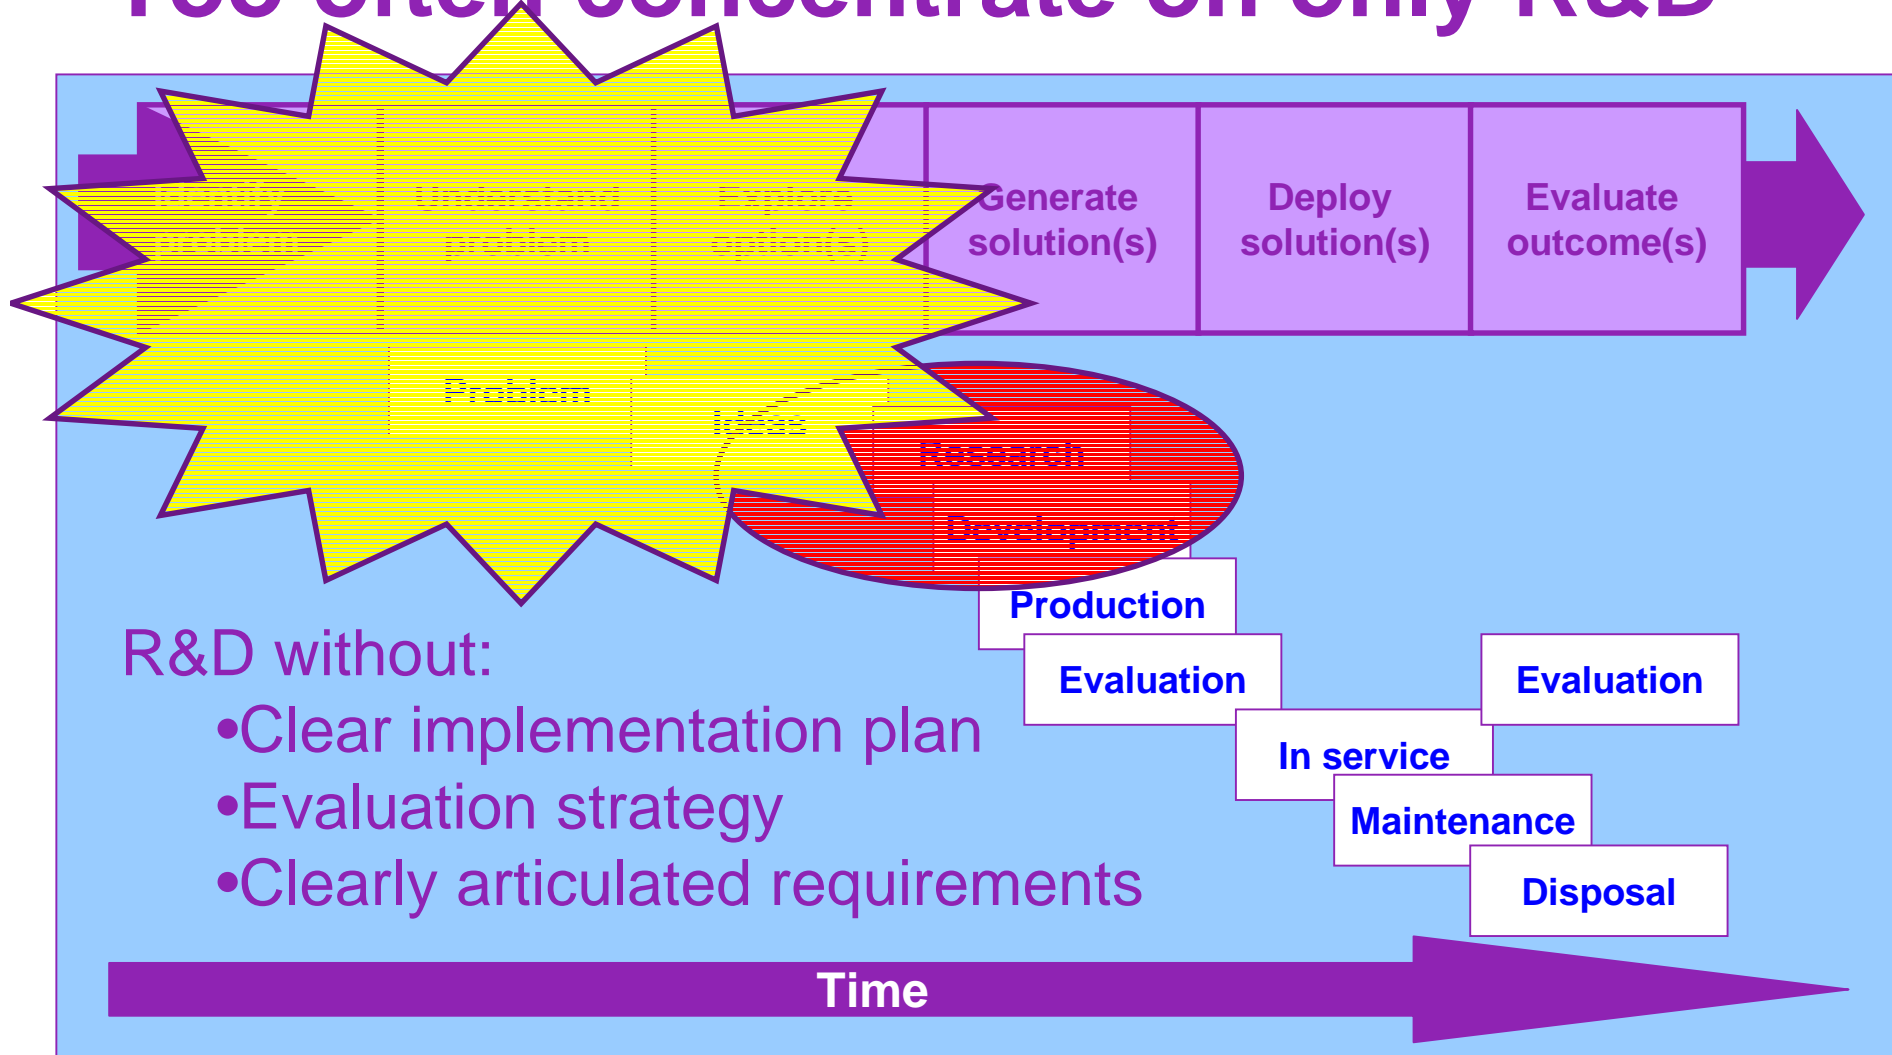

Real Life Cycle

Real lifecycle

Too often concentrate on only R&D

R&D without:

- Clear implementation plan
- Evaluation strategy
- Clearly articulated requirements

Understand operational needs

- Understand the context
 - strategies, policies and priorities
- Close contact with real users
 - What are their real problems? (don't focus on solutions)
 - What do they already have?
- Embed senior users
 - User groups, Project boards, police advisors
- First hand experience
 - Scientists and engineers on operations, 4 a.m., winter rain

Articulate needs

- Capture the essential operational goals
- For specific projects
 - Detailed Operational Requirements
 - Acceptance criteria (operational)
 - Implementation plans
- For general needs
 - Specify where most help is needed
 - Develop strategies to guide investment
 - Capability maps

Translate and Communicate needs

- Translate specific operational requirements into
 - Technical specifications (projects)
 - Scientific and technical challenges
- Create a compelling case
- Tell people!
 - Consistently
 - Clearly
 - Through multiple channels

Investigate
current &
future

Current concerns
