Table of Contents

Introduction	4
1. Number of data sets transmitted on persons referred to in Article 9(1), 14(1) and 17(1) of the Eurodac Regulation	5
2. Number of hits related to data for applicants for international protection who have lodged an application for international protection in another Member State	6
3. Number of hits related to data for persons apprehended irregularly crossing the external border of a Member State who have subsequently lodged an application for international protection	7
4. Number of hits related to data for persons found illegally staying in a Member State who had previously lodged an application for international protection in another Member State	8
5. Number of datasets marked, unmarked, blocked and unblocked in accordance with Article 18(1) and (3) of the Eurodac Regulation	9
5.1 Number of datasets marked	9
5.2 Number of datasets unmarked	10
5.3 Number of datasets blocked	10
6. Number of hits related to marked data for persons referred to in Article 18(1) for whom hits have been recorded following an application for international protection in another Member State	11
7. Number of hits related to data for persons referred to in Article 18(1) for whom hits have been recorded with a view to checking whether a third-country national or a stateless person found illegally staying within the territory of a Member State has previously lodged an application for international protection in another Member State	12
8. Number of fingerprint datasets rejected by the Central system due to insufficient quality and thus not lending to comparison	13
9. Number of requests made by law enforcement designated authorities to access Eurodac and hits received as referred to in Article 20(1) of Eurodac Regulation	14
9.1 Number of requests by law enforcement	14
9.2 Number of hits against data related to applications for international protection as per Article 9(1) of Eurodac Regulation and number of hits against data related to persons apprehended irregularly crossing the external border as per Article 14(1) of Eurodac Regulation	14

Introduction

Pursuant to Article 8(2) of Regulation (EU) No 603/2013¹ of the European Parliament and of the Council (here after referred to as the “Eurodac Regulation”), at the end of each year statistical data on Eurodac for each Member State² shall be made public as follows:

- the number of data sets transmitted on persons referred to in Article 9(1), 14(1) and 17(1) of the Eurodac Regulation,
- the number of hits for applicants for international protection who have lodged an application for international protection in another Member State,
- the number of hits related to data for persons apprehended when irregularly crossing the external border of a Member State who have subsequently lodged an application for international protection,
- the number of hits related to data for persons found illegally staying in a Member State who had previously lodged an application for international protection in another Member State,
- the number of data sets marked, unmarked, blocked and unblocked in accordance with Article 18(1) and (3) of the Eurodac Regulation,
- the number of hits related to marked data for persons referred to in Article 18(1) for whom hits have been recorded following an application for international protection in another Member State,
- the number of hits related to marked data for persons referred to in Article 18(1) for whom hits have been recorded with a view to checking whether a third-country national or a stateless person found illegally staying within the territory of a Member State has previously lodged an application for international protection in another Member State,
- the number of fingerprint datasets rejected by the Central System due to insufficient quality and thus not lending to comparison,
- the number of requests by law enforcement designated authorities to access Eurodac and the number of hits received as referred to in Article 20(1) of the Eurodac Regulation and as referred to in Article 21(1)³ of the Eurodac Regulation.

This document provides the above-mentioned statistics for the entire 2016.

The statistical data presented in this document is a collection of data available from the Eurodac Central system.

¹ Regulation (EU) No 603/2013 on the establishment of 'Eurodac' for the comparison of fingerprints for the effective application of Regulation (EU) No 604/2013 establishing the criteria and mechanisms for determining the Member State responsible for examining an application for international protection lodged in one of the Member States by a third-country national or a stateless person and on requests for the comparison with Eurodac data by Member States' law enforcement authorities and Europol for law enforcement purposes, and amending Regulation (EU) No 1077/2011 establishing a European Agency for the operational management of large-scale IT systems in the area of freedom, security and justice (recast). OJ L 180, 29.6.2013

² Under the term "Member States" the current document refers to the Member States of the EU and Associated Countries which are bound under Union law by the Regulation (EU) No 603/2013, if not further explained. Member States of the EU connected to Eurodac on 31 December 2016 were: Austria, Belgium, Bulgaria, Cyprus, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden and the United Kingdom. Associated Countries connected to Eurodac were: Iceland, Liechtenstein, Norway and Switzerland.

³ Europol was not connected to Eurodac by 31 December 2016, therefore no data for this point will be presented.

1. Number of data sets transmitted on persons referred to in Article 9(1), 14(1) and 17(1) of the Eurodac Regulation

⁴ Category 1 data as per Article 9(1) of Eurodac Regulation represents applicants for international protection of at least 14 years of age.

⁵ Category 2 data as per Article 14(1) of Eurodac Regulation represents every third-country national or stateless person of at least 14 years of age that is apprehended by the competent control authorities in connection with the irregular crossing by land, sea or air of the border of that Member State having come from a third-country and who is not turned back.

⁶ Category 3 data as per Article 17(1) of Eurodac Regulation represents a third-country national or a stateless person found illegally staying within the territory of a Member State.

⁷ Cyprus was connected to Eurodac as from 12 April 2016, hence there was no traffic from 01 January till 11 April.

2. Number of hits⁸ related to data for applicants for international protection who have lodged an application for international protection in another Member State

⁸ Hits repartition category1 against category 1. Member States on the left have sent, over the reporting period, a certain amount of cases which have produced hits against the Member States listed across the top. Local hits are produced when the two datasets generating the hit are from the same country. Number of local hits depends on Member State settings when performing a search on Eurodac. Member States might exclude own searches, which will result on the fact that local hits will not be returned and, at the same time, it will not be recorded in the statistics.

3. Number of hits⁹ related to data for persons apprehended irregularly crossing the external border of a Member State who have subsequently lodged an application for international protection

⁹Hits repartition category 1 against category 2, Member States on the left have sent, over the reporting period, a certain amount of cases which have produced hits against the Member States listed across the top. Local hits are produced when the two datasets generating the hit are from the same country. Number of local hits depends on Member State settings when performing a search on Eurodac. Member States might exclude own searches, which will result on the fact that local hits will not be returned and, at the same time, it will not be recorded in the statistics.

4. Number of hits¹⁰ related to data for persons found illegally staying in a Member State who had previously lodged an application for international protection in another Member State

¹¹ It is not technically possible to retrieve the number of unblocked datasets.

¹² A category 1 dataset shall be marked (by the initiating Member State) as soon as international protection is granted, as per article 18.1. Following the marking by the initiating Member State, all datasets (category 1 and/or category 2) which are linked to the dataset initially marked shall also be marked by the relevant Member State (marking following the initiator).

5.2 Number of datasets unmarked¹³

¹³ As per article 18.3, datasets which are marked shall be unmarked as soon as the status (international protection granted) has changed and is either revoked or ended or the renewal is refused. Similar to the marking, unmarking by the initiator can affect category 1 dataset, and unmarking following the initiator can affect category 1 and/or category 2 datasets.

¹⁴ As per article 18.2, a blocked dataset represents a marked record, which is no longer accessible to law enforcement searches as international protection was granted at least 3 years ago. As per the point 5.1 above a marked record can be a category 1 data following the granting of international protection and thus marked as initiator or category 1 and/or category 2 data which were linked to the dataset initially marked as thus marked following the initiator. The dataset blocked for law enforcement searches remains, on the other hand, accessible (not blocked) for asylum purposes. The table shows the number of datasets which are blocked, therefore not accessible for law enforcement searches. To be noted that datasets from the Associated Countries (Iceland, Liechtenstein, Norway and Switzerland) and Denmark are also not accessible for law enforcement as the law enforcement elements of the Eurodac Regulation do not yet apply to them. Those datasets are not counted in the table as the table shall only consider dataset from countries implementing the law enforcement elements of Eurodac.

6. Number of hits related to marked data for persons referred to in Article 18(1) for whom hits have been recorded following an application for international protection in another Member State¹⁵

¹⁵ Hits repartition category 1 against marked category 1 and marked category 2. Member States on the left have sent, over the reporting period, a certain amount of category 1 searches which have produced hits against the marked datasets (marked category 1 and marked category 2) of Member States listed across the top. Local hits are produced when the two datasets generating the hit are from the same country. It is possible that not all Member States are represented, this means that the missing Member States did not produced any hit or that no other Member State had hits against the missing Member State.

7. Number of hits related to data for persons referred to in Article 18(1) for whom hits have been recorded with a view to checking whether a third-country national or a stateless person found illegally staying within the territory of a Member State has previously lodged an application for international protection in another Member State¹⁶

¹⁶ Hits repartition category 3 against marked category 1. Member States on the left have sent, over the reporting period, a certain amount of category 3 searches which have produced hits against marked datasets (marked category 1) of the Member States listed across the top. Local hits are produced when the two datasets generating the hit are from the same country. It is possible that not all Member States are represented, this means that the missing Member States did not produced any hits or that no other Member State had hits against the missing Member State.

8. Number of fingerprint datasets rejected by the Central system due to insufficient quality¹⁷ and thus not lending to comparison

¹⁸ Category 4 data as per Article 20(1) of Eurodac Regulation represents the searches performed by the law enforcement designated authorities. The law enforcement elements of Eurodac Regulation do not apply for the time being to the Associated Countries (Iceland, Liechtenstein, Norway and Switzerland) and to Denmark. This will be possible only after the conclusion of separate agreements currently under negotiations. Practically this means that the five countries cannot perform category 4 searches, and their data is blocked for law enforcement purposes (i.e. not searchable by other Member States).

¹⁹ Criminal-print-to-print search.

²⁰ Latent-to-print search.

²¹ Hit repartition of category 4 against category 1 data. Member States on the left have sent, over the reporting period, a certain amount of searches which have produced hits against the Member States listed across the top. Local hits are produced when the two datasets generating the hit are from the same country.

²² Hit repartition of category 4 against category 2 data.
