- \*\*\* Consent procedure
- \*\*\*I Ordinary legislative procedure (first reading)
- \*\*\*II Ordinary legislative procedure (second reading)
- \*\*\*III Ordinary legislative procedure (third reading)

(The type of procedure depends on the legal basis proposed by the draft act.)

### ***Amendments to a draft act***

#### **Amendments by Parliament set out in two columns**

Deletions are indicated in ***bold italics*** in the left-hand column. Replacements are indicated in ***bold italics*** in both columns. New text is indicated in ***bold italics*** in the right-hand column.

The first and second lines of the header of each amendment identify the relevant part of the draft act under consideration. If an amendment pertains to an existing act that the draft act is seeking to amend, the amendment heading includes a third line identifying the existing act and a fourth line identifying the provision in that act that Parliament wishes to amend.

#### **Amendments by Parliament in the form of a consolidated text**

New text is highlighted in ***bold italics***. Deletions are indicated using either the ▯ symbol or strikeout. Replacements are indicated by highlighting the new text in ***bold italics*** and by deleting or striking out the text that has been replaced.

By way of exception, purely technical changes made by the drafting departments in preparing the final text are not highlighted.

## DRAFT EUROPEAN PARLIAMENT LEGISLATIVE RESOLUTION

**on the proposal for a regulation of the European Parliament and of the Council establishing an Entry/Exit System (EES) to register entry and exit data and refusal of entry data of third country nationals crossing the external borders of the Member States of the European Union and determining the conditions for access to the EES for law enforcement purposes and amending Regulation (EC) No 767/2008 and Regulation (EU) No 1077/2011  
(COM(2016)0194 – C8-0135/2016 – 2016/0106(COD))**

**(Ordinary legislative procedure: first reading)**

*The European Parliament,*

- having regard to the Commission proposal to Parliament and the Council (COM(2016)0194),
  - having regard to Article 294(2) and Article 77(2)(b) and (d), Article 87(2)(a) and Article 88(22)(a) of the Treaty on the Functioning of the European Union, pursuant to which the Commission submitted the proposal to Parliament (C8-0135/2016),
  - having regard to Article 294(3) of the Treaty on the Functioning of the European Union,
  - having regard to the opinion of the European Economic and Social Committee of 21 September 2016<sup>1</sup>,
  - after consulting the Committee of the Regions ,
  - having regard to Rule 59 of its Rules of Procedure,
  - having regard to the report of the Committee on Civil Liberties, Justice and Home Affairs and the opinion of the Committee on Budgets (A8-0057/2017),
1. Adopts its position at first reading hereinafter set out;
  2. Calls on the Commission to refer the matter to Parliament again if it replaces, substantially amends or intends to substantially amend its proposal;
  3. Instructs its President to forward its position to the Council, the Commission and the national parliaments.

**(6a) With a view to further improving the management of the external borders and, in particular, in order to verify the respect of the provisions on an authorised period of stay within the Schengen area, a system which registers electronically the time and place of entry and exit of third-country nationals admitted for a short stay to the Schengen area and which calculates the duration of their authorised stay should be established.**

*Justification*

*A recital which sets out the overall rationale of a setting up the EES should be added.*

(7) It is necessary to specify the objectives of the Entry/Exit System (EES) **and its technical architecture, to lay down rules concerning its operation and use and to define responsibilities for the system**, the categories of data to be entered into the system, **the purposes for which the data are to be entered**, the criteria for their entry, the authorities authorised to access the data **and** further rules on data processing and the protection of personal data.

(7) It is necessary to specify the objectives of the Entry/Exit System (EES), the categories of data to be entered into the system, the criteria for their entry, the authorities authorised to access the data, further rules on data processing and the protection of personal data **as well as the technical architecture of the system, rules concerning its operation and use and interoperability with other information systems. It is also necessary to define responsibilities for the system.**

## **Amendment 3**

### **Proposal for a regulation Recital 8 a (new)**

**(8a) Precise rules should be laid down as regards the responsibilities for the development and operation of the EES and the responsibilities of the Member States for the connection to the EES. Member States should be able to use resources available through their national programmes under the Internal Security Fund for the development and operation of the EES at national level. The Agency for the operational management of large-scale information systems in the area of freedom, security and justice, established by Regulation (EU) No 1077/2011 of the European Parliament and of the Council<sup>1a</sup>, should be responsible for the development and operational management of a centralised EES in accordance with this Regulation and the relevant provisions of Regulation (EU) No 1077/2011 should be amended accordingly.**

## EXPLANATORY STATEMENT

### Introduction

The increase in traveller flows at the EU's external borders in recent years has highlighted the inefficiency of the current border control systems, something which could get worse as the number of travellers rises, which is predicted to happen over the coming years. The number of third country nationals legally travelling to Schengen countries for a short-term visit is forecast to be around 300 million by 2025. Air traffic alone is predicted to grow at a rate of 2.6% annually over the next 20 years in Europe. Our traveller management systems need to be modernised, so that they become not only more flexible and efficient but also more secure, based on the premise that re-nationalising information and border control systems is not an option. The viability of these controls cannot depend exclusively on travellers' passports or on stamps inside them, which could have been falsified or could be illegible, and which are a heavy burden on the border authorities since they distract them from their actual work, thus compromising security. Not doing anything would lead, in the medium-term, to the collapse of our border crossing points and would require heavy investment in infrastructure and staff to cope with the flows.

Setting up a European Entry/Exit System (EES) will benefit passengers by reducing their waiting time at border crossing points; Member States, by processing *bona fide* passengers more quickly at the same time as tightening border security; infrastructure operators, by providing shorter connections in transit areas, with the direct and indirect economic benefits that this entails; border point operators, who would be able to optimise their resources, and carriers, whose work would be made easier. All of this while safeguarding the necessary protection of fundamental rights and of the data held in the system.

The European Agenda on Migration already identified 'border management' as one of the 'four pillars to manage migration better'. The transnational threats that the EU has been facing in recent times have shown that in a borderless area, the external borders need to be efficiently controlled. The link between effective border control and the strengthening of internal security is increasingly evident. The rapporteur is in favour of granting security forces access to the EES, with the aim of fighting against serious crime and terror threats, providing it with added value. This access needs to be controlled, necessary, proportional and should meet the appropriate safeguards for rights and data protection. A balance can and must be found between speeding-up border crossings and improving their security.

### The rapporteur's position

#### 1.- Objectives

The legislative proposal under review is to establish a system to facilitate border crossings, help to combat irregular migration among people exceeding the legal period of stay and support the fight against organised crime and terrorism. These objectives must be guaranteed and made compatible with the protection of data collected in the EES in terms of proportionality and necessity.

#### 2.- Architecture

The rapporteur is pleased with the changes brought in by the legislative proposal, many of which provide answers to the doubts raised during the preparatory work. However, he does not understand the decision to scrap the RTP, which Parliament saw as a bold way of speeding up border crossings.

### **3.- Interoperability with the VIS**

One of the most important parts of this proposal is the interoperability of the EES with the VIS, which points to the future structure of relations between the different information systems. Given that the principle of proportionality is upheld, this interoperability does not interfere in any way with the rights enshrined in Articles 7 and 8 of the Charter of Fundamental Rights (CFR).

Without advocating interoperability with the SIS II at this stage, clarification is needed regarding the procedure to be followed in connection with alerts signalling travellers who have exceeded their authorised stay in the Schengen area.

### **4.- Budget**

The EES will undoubtedly be expensive, but if no measures were taken it would be much more so in terms of spending on infrastructure and staff in order to cope with the increasing passenger flows, and also in terms of the Member States' security. The rapporteur supports budgetary rationalisation and expresses concern over the possible deviations that could occur throughout the implementation process, which entails the need for greater *ex ante* and *ex post* control.

### **5.- Biometrics**

The test phase revealed that the best option for combining speed and security in border crossings would be the combination of four fingerprints and facial image recognition. In line with the views expressed by Parliament, the number of biometric data collected is to decrease, allowing the data already held in the VIS to be imported, and resulting in less data-capturing and fewer duplications of the data stored. High quality standards must be ensured so that the data collected can be put to full use for their intended purposes.

### **6.- Data and fundamental rights protection**

This regulation must guarantee protection for the data stored in the EES, in line with the CFR. In this regard, in order to be in compliance with Articles 7 and 8 of the CFR, the EES must fulfil the following criteria: have an appropriate legal basis; respect the principles of the charter, pursue a general interest; be proportionate and necessary. One of the ways in which this can be achieved is through measures such as reducing the amount of data registered in the system, the role of national and European data protection authorities (EDPS), correction and deletion procedures and methods and authorisations for accessing the system. It might be pointed out that the CJEU has recognised the objectives of the EES (border and migration control, the fight against serious organised crime and terrorism) as being of general interest.

### **7.- Data retention period**

The EES must uphold the principles of necessity and proportionality. The 181-day retention period which was initially proposed would hinder the system's effectiveness. From the traveller's point of view, this would not meet the objective of speeding up border traffic, since such a short period would require the data of frequent third country national travellers to be recorded repeatedly, slowing down the process. From the point of view of consulates and border authorities, there would no longer be any possibility of analysing travel histories and

carrying out risk analyses, which are intrinsic to decision making; and from the point of view of the security forces, relevant data, essential in the fight against serious crime and terrorism, would be destroyed.

The proposed timeframe is consistent with the system's objectives, and would facilitate interoperability with the VIS. However, the necessary guarantees must be given so that data subjects can access, correct and/or delete data where necessary.

#### **8.- Security forces' access to the system**

Granting national security forces and Europol access to the system from the start as a means of fighting organised crime and terrorism will give the system a huge added value. Making this possibility compatible with facilitating border crossings is necessary and legally viable, in line with the European legal system. The survival of the Schengen area partly depends on the protection of its external borders. The most useful tool we have in the fight against organised crime is intelligence and information: the ability to be prepared.

It is true that today some security forces are not making full use of the systems that exist, but it is also a reality that investment in training, the exchange of best practices and building mutual trust result in these systems being used more extensively and more effectively. During the system's implementation period, the authorities which will have access to it will need to receive some training.

#### **9.- The impact on carriers and travellers**

The role of carriers is crucial for the system's viability. They must have proportionate and restricted access to data in the EES that will help them carry out their tasks, with sufficient guarantees that the system's security will not be compromised.

Travellers must be able to see how long they have left to legally remain in the country. Setting up a system so that this information could be viewed online would be very useful. Accessing it must be simple and secure so only the traveller can view this information. eu-LISA would be responsible for managing this web service using a secure network, and should assess the possible risks so as to be able to identify the service's specific needs.

#### **10.- Governance**

eu-LISA will have to play an important role in the development and maintenance of the EES. Security, control and responsibility standards will have to be adapted during the implementation of the system and once it is running. Parliament must be involved in the various cycles of the EES, within the scope its competences.

## MINORITY OPINION

pursuant to Rule 52a(4) of the Rules of Procedure  
Marie-Christine Vergiat

In keeping with the stated aim of making it easier to cross the EU's external borders, the EES will be used to draw up a register of the third-country nationals entering and leaving the EU, facilitating interoperability with other databases and creating a vast system for the collection of data, in particular biometric data, including for children as young as 12. This constitutes a clear breach of international law and sets a dangerous precedent.

Police forces will be able to access the data in the same way as border guard services. This arrangement, which disregards the principles of necessity and proportionality and lumps together the issues of migration, terrorism and crime, will give rise to confusion between two very different objectives (monitoring borders and combating crime).

There will be 'good travellers' who enter EU territory on the basis of ad hoc administrative procedures, and there will be all the others, who will be presumed to be irregular, in a departure from the principle that each individual's circumstances should be considered. This will affect vulnerable persons in particular, whose presence will automatically be notified to the Member States.

Given the nature and significance of the proposal, and in view of the threat posed to the fundamental rights of thousands of men, women and children, the circumstances in which it has been considered have been prejudicial to proper legislative work.

At the very least, better account should have been taken of the recommendations of the European Data Protection Supervisor.

## **OPINION OF THE COMMITTEE ON BUDGETS**

for the Committee on Civil Liberties, Justice and Home Affairs

on the proposal for a regulation of the European Parliament and of the Council establishing an Entry/Exit System (EES) to register entry and exit data and refusal of entry data of third country nationals crossing the external borders of the Member States of the European Union and determining the conditions for access to the EES for law enforcement purposes and amending Regulation (EC) No 767/2008 and Regulation (EU) No 1077/2011 (COM(2016)0194) – C8-0135/2016 – 2016/0106(COD))

Rapporteur: Monika Hohlmeier

### **SHORT JUSTIFICATION**

The rapporteur is of the opinion that a better, more modern and efficient border management of our EU-external borders is essential, to guarantee a precise overview of the entries and exits of third country nationals. Furthermore, it is an instrument to accelerate border - checks, reducing waiting time at the borders and enhancing freedom of movement while at the same time enhancing internal security, stepping up the fight against terrorism and severe cross-border-crime and to detect illegal border crossings, identity fraud or overstayers. In particular, the Rapporteur stresses that there is an important gap in the landscape of existing information systems, which has to be addressed in order to efficiently secure the EU's external borders. No Member State acting alone is able to achieve an effective monitoring of entry/exit of third country nationals within the whole Schengen area. Therefore, an efficient European instrument urgently needs to be developed and implemented in all Member States.

In this regard, the Rapporteur welcomes the Commission's revised proposal for the Entry/Exit System (EES), which promotes interoperability and synergies of information systems in order to speed up, facilitate and reinforce check procedures for non-EU nationals travelling to the EU.

The Rapporteur welcomes the Technical Study on Smart Borders of the European Commission and the Final Report of the Smart Borders Pilot Project of eu-LISA which addresses the Parliament's concerns from 2013 by assessing, in concrete terms, the financial, technical and organisational challenges for each policy option as well as by operating a testing phase entrusted to eu-LISA.

The rapporteur recalls that in the 2013 proposals, 1.1 billion EUR was earmarked in the EU budget as an indicative amount for the development of an EES and an RTP. For the revised

proposal, based on the preferred option of a single EES system including the law enforcement access, the estimated amount needed is EUR 480 million. The outcome of the financial analysis seems more precise than in the former proposal. This amount is subject to the outcome of procurement procedure and the project analysis (integration of existing national systems and construction of the new system in all Member States).

The rapporteur favours that the financial support from the EU budget would cover not only the costs of central components at EU level for the entire MFF period (EUR 288 million - at EU level, both development and operational cost via indirect management) but also costs for integration of the existing national border infrastructures in Member States with the EES via the National Uniform Interfaces (EUR 120 million via direct management). In contrast to the proposal of the Commission the rapporteur recommends the installation of a crisis mechanism to guarantee that Member States with organisational and financial difficulties are enabled to establish the system in the foreseen time period.

The rapporteur also supports that once the EES would be in place, future operational costs in the Member States should be supported by their national programmes in the framework of the ISF (shared management), and encourages the Member States to identify cost efficient solutions.

Finally, the rapporteur suggests stronger rules on reporting back to the Parliament and the Council during and after the development of the EES, including an obligatory update on budgetary and cost developments, to ensure full parliamentary scrutiny and oversight of the process and to minimise the risk of cost overruns and delays.

## AMENDMENTS

The Committee on Budgets calls on the Committee on Civil Liberties, Justice and Home Affairs, as the committee responsible, to take into account the following amendments:

of *the authorised length of stay*.

### *Justification*

*Excluding a stay in one of these States from the calculation of the authorised length of stay would lead either to having 5 calculation systems:*

*one for States fully applying the Schengen acquis and 4 for the others not applying it fully. This would lead to considerable unnecessary costs and mean that a TCN could reside on EU territory continuously by moving from a Schengen State to a non-Schengen State. Or having a single calculation system exclusively reserved for those States that fully apply the Schengen acquis, but with the abolition of passport stamp this option would mean that the 4 non-Schengen States would not benefit from the EES and be without any means to calculate the length of stay.*

### **Amendment 6**

#### **Proposal for a regulation**

#### **Article 6 – paragraph 1 – point b**

*Text proposed by the Commission*

(b) a National Uniform Interface (NUI) in each Member State based on common technical specifications and identical for all Member States enabling the connection of the Central System to the national border infrastructures in Member States;

*Amendment*

(b) a National Uniform Interface (NUI) in each Member State based on common technical specifications and identical for all Member States enabling the connection of the Central System to the national border infrastructures in Member States; ***Member States' national border infrastructures include the Schengen Information System, Interpol's SLTD and Europol databases and the national databases of law enforcement authorities;***

### **Amendment 7**

#### **Proposal for a regulation**

#### **Article 6 – paragraph 1 – point c**

*Text proposed by the Commission*

(c) a Secure Communication Channel between the EES Central System and the VIS Central System;

*Amendment*

(c) a Secure Communication Channel between the EES Central System, the VIS ***and the SIS*** Central Systems;

### *Justification*

*Next to full interoperability between EES and VIS, it is also necessary to include the Schengen Information System (SIS) to enable full data exchange.*

##### ***Interoperability with Eurodac***

- 1. eu-LISA shall establish a Secure Communication Channel between the EES Central System and the Eurodac Central System to allow interoperability between the two systems.***
- 2. This interoperability requirement shall allow the automated transfer from the EES Central System to the Eurodac Central System of the data referred to in Articles 14 and 15 concerning all persons having exceeded the permitted length of stay.***

#### **Amendment 10**

##### **Proposal for a regulation**

##### **Article 10 – paragraph 4**

*Text proposed by the Commission*

*Amendment*

4. Stays in Member States which are not *yet fully* applying the *Schengen acquis in accordance with their respective Acts of Accession* shall *not* be taken into account in the calculation of the duration of the authorised *stay in the Schengen area*. *Those Member States shall register the stays of third country nationals in the EES. The automated calculator in the system shall not however compute stays in Member States which are not yet fully applying the Schengen acquis as part of the authorised length of stay.*

4. Stays in Member States which are not applying the *provisions under Title III of Regulation (EU) 2016/399* shall be taken into account in the calculation of the duration of the authorised stay.

*Justification*

*Excluding a stay in one of these States from the calculation of the authorised length of a stay would lead either to having 5 calculation systems: one for States fully applying the Schengen acquis and 4 for the others not applying it fully. This would lead to considerable unnecessary costs and mean that a TCN could reside on EU territory continuously by moving from a Schengen State to a non-Schengen State. Or having a single calculation system exclusively reserved for those States that fully apply the Schengen acquis, but with the abolition of passport stamp this option would mean that the 4 non-Schengen States would not benefit from the EES and be without any means to calculate the length of stay.*

**Amendment 11**

**Proposal for a regulation**  
**Article 11 – paragraph 2 a (new)**

*Text proposed by the Commission*

*Amendment*

**2a. The data referred to in Articles 14 and 15 concerning all persons having exceeded by more than 15 days the permitted length of stay and whose entry/exit record contains no exit data shall be automatically transferred to the Eurodac Central System.**

**Amendment 12**

**Proposal for a regulation**  
**Article 34 – paragraph 1 – subparagraph 1**

*Text proposed by the Commission*

eu-LISA shall be responsible for the development of the Central System, the National Uniform Interfaces, the Communication Infrastructure and the Secure Communication Channel between the EES Central System and the VIS Central System. It shall also be responsible for the development of the web service referred to in Article 12 in accordance with the specifications and conditions adopted in accordance with the examination procedure referred to in Article 61(2).

**Amendment 13**

**Proposal for a regulation**

**Article 34 – paragraph 1 – subparagraph 2**

*Text proposed by the Commission*

eu-LISA shall define the design of the physical architecture of the system including its Communication Infrastructure as well as the technical specifications and their evolution as regards the Central System, the Uniform Interfaces, the Secure Communication Channel between the EES Central System and the VIS Central System and the Communication Infrastructure, which shall be adopted by the Management Board, subject to a favourable opinion of the Commission. eu-LISA shall also implement any necessary adaptations to the VIS deriving from the establishment of interoperability with the EES as well as from the implementation of the amendments to Regulation (EC) No 767/2008 referred to in Article 55.

*Amendment*

eu-LISA shall be responsible for the development of the Central System, the National Uniform Interfaces, the Communication Infrastructure and the Secure Communication Channel between the EES Central System and the VIS Central System **and between the EES Central System and the Eurodac Central System**. It shall also be responsible for the development of the web service referred to in Article 12 in accordance with the specifications and conditions adopted in accordance with the examination procedure referred to in Article 61(2).

*Amendment*

eu-LISA shall define the design of the physical architecture of the system including its Communication Infrastructure as well as the technical specifications and their evolution as regards the Central System, the Uniform Interfaces, the Secure Communication Channel between the EES Central System and the VIS Central System and **between the EES Central System and the Eurodac Central System** and the Communication Infrastructure, which shall be adopted by the Management Board, subject to a favourable opinion of the Commission. eu-LISA shall also implement any necessary adaptations to the VIS deriving from the establishment of interoperability with the EES as well as from the implementation of the amendments to Regulation (EC) No 767/2008 referred to in Article 55.

## Amendment 14

### Proposal for a regulation

#### Article 34 – paragraph 1 – subparagraph 3

*Text proposed by the Commission*

eu-LISA shall develop and implement the Central System, the National Uniform Interfaces, the Secure Communication Channel between the EES Central System and the VIS Central System, and the Communication Infrastructure as soon as possible after the entry into force of this Regulation and the adoption by the Commission of the measures provided for in Article 33.

*Amendment*

eu-LISA shall develop and implement the Central System, the National Uniform Interfaces, the Secure Communication Channel between the EES Central System and the VIS Central System **and between the EES Central System and the Eurodac Central System**, and the Communication Infrastructure as soon as possible after the entry into force of this Regulation and the adoption by the Commission of the measures provided for in Article 33.

## Amendment 15

### Proposal for a regulation

#### Article 34 – paragraph 3 – subparagraph 1

*Text proposed by the Commission*

eu-LISA shall be responsible for the operational management of the Central System, the Secure Communication Channel between the EES Central System and the VIS Central System and the National Uniform Interfaces. It shall ensure, in cooperation with the Member States, at all times the best available technology, subject to a cost-benefit analysis. eu-LISA shall also be responsible for the operational management of the Communication Infrastructure between the Central system and the National Uniform Interfaces and for the web-service referred to in Article 12.

*Amendment*

eu-LISA shall be responsible for the operational management of the Central System, the Secure Communication Channel between the EES Central System and the VIS Central System and **between the EES Central System and the Eurodac Central System** and the National Uniform Interfaces. It shall ensure, in cooperation with the Member States, at all times the best available technology, subject to a cost-benefit analysis. eu-LISA shall also be responsible for the operational management of the Communication Infrastructure between the Central system and the National Uniform Interfaces and for the web-service referred to in Article 12.

## **Amendment 16**

### **Proposal for a regulation Article 34 a (new)**

*Text proposed by the Commission*

*Amendment*

#### **Article 34a**

##### **Crisis mechanism**

***The Commission and the Member States shall design a crisis mechanism to be activated in the event that a Member State is faced with organisational and financial difficulties. This mechanism shall guarantee that the development and integration of national systems, the completeness of the project planning, the interoperability with the VIS and the SIS Central Systems and the implementation of this Regulation are achieved simultaneously and in a timely manner. Furthermore, it shall ensure that all Member States fully participate in the system.***

#### *Justification*

*To ensure the full operation, it is crucial that all Member States can run the system independently from their financial situation.*

## **Amendment 17**

### **Proposal for a regulation Article 34 b (new)**

*Text proposed by the Commission*

*Amendment*

#### **Article 34 b**

***Without prejudice to Article 58, the Commission shall ensure that each Member State is provided with sufficient financial support with a view to integrating the existing national border infrastructures with the EES via the***

***National Uniform Interfaces. This financial support shall cover all national integration costs and expenses related to the implementation of this Regulation and shall be proportionate to the individual administrative needs of each Member State.***

## **Amendment 18**

### **Proposal for a regulation Article 58 – paragraph 1**

*Text proposed by the Commission*

1. The costs incurred in connection with the establishment and operation of the Central System, the Communication Infrastructure and the National Uniform Interface shall be borne by the general budget of the Union.

*Amendment*

1. The costs incurred in connection with the establishment and operation of the Central System, the Communication Infrastructure and the National Uniform Interface shall be borne by the general budget of the Union. ***Before starting the procurement procedure the Commission shall undertake a precise analysis of the technical requirements for the integration of existing national systems, of the technical standards, of the requirements concerning the content and the accessibility of the EES.***

*Justification*

*The digitalisation of border controls is a growing trend at national level in the EU and in third countries. 11 EU Schengen Members as well as Bulgaria, Romania and the UK operate entry/exit-like systems usually limited to selected airports. However, experience with the development of other large-scale IT systems at EU level like the SIS II and VIS systems revealed that these initiatives experienced escalating costs. Therefore, it is important to clarify the costs as precise as possible beforehand in order to minimise the risk of cost overruns.*

## **Amendment 19**

### **Proposal for a regulation Article 64 – paragraph 2**

*Text proposed by the Commission*

2. By [Six months after the entry into force of this Regulation – OPOCE, please replace with the actual date] and every six months thereafter during the development phase of the EES, eu-LISA shall submit a report to the European Parliament and the Council on the state of play of the development of the Central System, the Uniform Interfaces and the Communication Infrastructure between the Central System and the Uniform Interfaces. Once the development is finalised, a report shall be submitted to the European Parliament and the Council explaining in detail how the objectives, in particular relating to planning and costs, were achieved as well as justifying any divergences.

*Amendment*

2. By [Six months after the entry into force of this Regulation – OPOCE, please replace with the actual date] and every six months thereafter during the development phase of the EES, eu-LISA shall submit a report to the European Parliament and the Council on the state of play of the development of the Central System, the Uniform Interfaces and the Communication Infrastructure between the Central System and the Uniform Interfaces. ***The report shall include an overview of budgetary and cost developments with a detailed technical and financial assessment, precise information on cost increases and changes in design requirements and the reasons for these divergences. Where the crisis mechanism is triggered, the report shall state the reasons for and ramifications of the triggering.*** Once the development is finalised, a report shall be submitted to the European Parliament and the Council explaining in detail how the objectives, in particular relating to planning and costs, were achieved as well as justifying any divergences.

*Justification*

*Experience with the development of other large-scale IT systems at EU level like the SIS II and VIS systems revealed that these initiative experienced long delays and escalating costs. To ensure full parliamentary scrutiny and oversight of the process and to minimise the risk of cost overruns and delays, it is suggested that the eu.LISA's reporting back to the Parliament and the Council during the development of the EES, will include an obligatory update on budgetary and cost developments*

**Amendment 20**

**Proposal for a regulation  
Article 64 – paragraph 5**

*Text proposed by the Commission*

5. Three years after the start of operations of the EES and every four years thereafter, the Commission shall produce an overall evaluation of the EES. This overall evaluation shall include an examination of results achieved against objectives and the impact on fundamental rights, and assessing the continuing validity of the underlying rationale, the application of the Regulation, the security of the EES and any implications on future operations, and shall make any necessary recommendations. The Commission shall transmit the evaluation report to the European Parliament and the Council.

*Amendment*

5. Three years after the start of operations of the EES and every four years thereafter, the Commission shall produce an overall evaluation of the EES. This overall evaluation shall include an examination of results achieved against objectives and the impact on fundamental rights, and assessing the continuing validity of the underlying rationale, the application of the Regulation, the security of the EES and any implications, ***in particular those with a budgetary impact***, on future operations, and shall make any necessary recommendations. The Commission shall transmit the evaluation report to the European Parliament and the Council.

*Justification*

*To ensure full parliamentary scrutiny, budgetary oversight and planning and in order to detect possible changes with a budgetary impact as early as possible, it is suggested that the overall evaluations include an overview of possible budgetary implications of future operations.*
